Comments:

19. What kind of interface do users have to access your online systems for the available types of patent documents? For example, for published patent applications, granted patents, patent term extensions, fee payments.

There are multiple web pages or portals for different types of information, and-
The web pages or portals all share the same input formats (e.g. query flags, number formats, data formats, etc)
Comments:

20. Do your online systems use the same web pages or portals for different types of industrial property rights provided by your Office? For example, patents for inventions, plant patents, design patents, inventors' certificates, utility certificates, utility models, patents of addition and others. Answer yes here even if there are multiple web pages or portals for different types of documents (application, legal status history, assignments, etc), as long as each type of IP right is available on the same web page or portal.

Note- this question is about different types of IP rights. Question 17 is about different types of patent documents.

YES
Comments: The newest system of the Office (https://sis.ukrpatent.org/en/search/simple/) uses the same web page for different types of industrial property rights. There are previously created systems though, and there are different web pages for different types of industrial property rights (https://ukrpatent.org/en/articles/bases2)

21. If there are separate websites or portals for these other types of industrial property provided by your Office, please list them.

The list is available at https://ukrpatent.org/en/articles/bases2

22. Do your online systems contain information on documents issued under international or regional IP protection systems, which have (potential) effect in your jurisdiction?

YES
Comments:

23. If so, what types of documents are available, e.g. PCT documents or translations?

Not available for users.

24. Is international or regional data searchable in the same online systems as national documentation?

Yes, international / regional data is available and searchable
Comments:

25. What functionality would you like to see in the systems provided by other Offices?
