

DOCUMENTATION

“MINIMUM DOCUMENTATION” UNDER RULE 34.1(B)(III) OF THE REGULATIONS UNDER THE PATENT COOPERATION TREATY (PCT)

The International Searching Authorities have agreed that, for the purposes of PCT Rule 34.1(b)(iii), the published items of non-patent literature to be included in the PCT “minimum documentation” should be the items published in the periodicals listed below during the five-year period preceding the time at which an international search report is established, it being understood that an International Searching Authority (ISA) would not be precluded from consulting issues of the said periodicals published prior to the beginning of the said five-year period. It has been agreed by the PCT Committee for Technical Cooperation that the periodicals need be consulted by the ISA only in respect of issues published after the effective inclusion of such periodicals in the list. The list is preceded by explanatory notes facilitating an understanding of the indications contained therein.

The list was originally agreed upon at a meeting held in Geneva on April 12, 1978. The present list was agreed upon by the ISAs at the Meeting of International Authorities under the Patent Cooperation Treaty (PCT/MIA) held from April 7 to 9, 2008, with effect from January 1, 2009. This list replaces the list published in a Special Issue of the *PCT Gazette* No. S-02/2003, dated March 27, 2003, and in the *WIPO Handbook on Industrial Property Information and Documentation* (pages 4.2.1 to 4.2.34, dated December 2006). This list was updated by the PCT Minimum Documentation Task Force established by the PCT/MIA and reflects the information for each periodical as at June 1, 2020.

Explanatory Notes

1. Each entry of the list gives information for each of the 445133 periodicals by using letter codes “A” to “U” as defined below. Each PCT identification number relates to either:

- (a) one periodical or
- (b) a periodical (with a pre-existing PCT identification number) which has now split into several periodicals or several parts of the same periodical. Where there has been a split, each part is preceded by (A), (B), (C), ...

- A – PCT identification number
- B – Title of the periodical
- C – Publisher’s name and address
- D – Abbreviated SO 4 abbreviated title of the periodical according to the database ISSN Online (identified during June 2004 – March 2005)
- E – ISSN Number
- F – Indication of language of the periodical by using the following symbols:

“de” for German	“ja” for Japanese
“en” for English	“nko” for DutchKorean
“es” for Spanish	“nl” Dutch
“esfr” for SpanishFrench	“pt” for Portuguese
“fr” for FrenchItalian	“ru” for Russian
“it” for Italian	“zh” for Chinese

- G – Year when the periodical was first included in the list

H – Range/activity period

- I – Indication of website internet address(es) where one or more of the following is possible:
- (a) information about the periodical
- (b) searching the contents of the periodical; and
- (c) browsing the articles of the periodical.

The internet addresses were verified during March 2005 or on addition of items added after that time. June 2020. Internet addresses may change, or become unavailable, over time.

U – Comments

2. The titles of the periodicals are arranged in ascending order of the PCT identification number, subject to the following:

(i) when several editions of a periodical exist in different languages (e.g., by cover-to-cover translation), the periodical is listed according to the title of the English edition, if any, together with the original title in parentheses. If no English edition exists, the original title is used for the purposes of the list;

(ii) where the title of a periodical has changed, or the periodical has merged or split, the PCT identification number is retained, where practical.

3. Where the title of a periodical has changed, only the new title, is indicated in the list in column A. Where there is a former title, the most recent former title is shown in column “U – comments” together with the previous ISSN number and the year the former title ended. For example refer to PCT Identification Identification Number 10:

ex Industrial & Engineering Chemistry – ISSN: 0096-4484, end date: 1946

An ex precedes the former title. In the case, of there being more than one former title, only the most recent former title is given except in exceptional circumstances (to avoid confusion).

4. If the journal has more than one current name, there is provided the name of the title in English and the name in the language other than English, separated by a forward slash. An example of this can be seen in PCT Identification Number 185:

Technical Physics Letters / Pis'ma v Zurnal Tehniceskoj Fiziki

The names of Japanese / Russian publishers are indicated in English, followed by a transliteration of the Japanese / Russian name into Latin characters in parentheses. An example of this can be seen in PCT Identification Number 005033:

Japan Chemical Society for Bioscience Biotechnology and Agrochemistry of Japan; (Nippon Nogeikagaku Kai Kagakukai)

5. Further information on the titles, abbreviations, ISSN numbers, publishers and selection of abbreviations for the titles of periodicals in this list can be obtained (at the time of publication of this document) through:

- ISSN online website at <http://www.issn.org/> <https://www.issn.org/>;
- Ulrich's International Periodicals Directory (TM) website at <http://www.ulrichsweb.com/ulrichsweb/>
- UlrichsWeb™ Global Serials Directory website at <http://ulrichsweb.serialssolutions.com/login>;
- Genamics™ JournalSeek website (freely available) at <http://journalseek.net> <http://journalseek.net/> and
- the specific websites (or their respective publishing houses) stated for each entry. Most of the websites listed under column "I" contain freely available information about the title.

6. For reference purposes, Appendix 1 to the current list of periodicals contains all the periodicals which have been deleted from the original list, including those journals for which publication has been discontinued. The year of deletion or discontinuation is given under letter code "H" of each entry. Appendix 2 contains an alphabetical index in order to facilitate the location of "active" periodicals and their abbreviated titles for which the PCT identification number is not immediately known.
