# IPAS Report

- Word templates must be MailMerge Word files linked to a specific IPAS/ORACLE data source contained in two text files which must reside in the computer where the IPAS Application Server executes:
- *C:\ompi\temp\cabecera.txt contains the names of the MailMerge fields.*
- *C:\ompi\temp\datos.txt contains the actual data of the MailMerge fields.*

# IPAS Report

- These text files are ***only used for the configuration of the templates, and are not actually*** used when IPAS produces reports based on those templates.
- In fact, Word is not used for the production of reports but a commercial Java library called *Aspose is used*.
- Therefore, **it is not even necessary to have a Word license in the server computer** but its recommended for editing the files.
- The text files are regenerated automatically by IPAS based on the configured MailMerge fields (as described below) at several times:

# IPAS Reports

What sort of data can these reports contain

- Owner Information
- Nice Class
- Payment Information
- File Status
- Filing Date
- Mark Name
- Agent Name
- File Number etc

# IPAS Report Ideas

What sort of data can these reports contain

- Payment Report (File No, Nice, Amount & date Paid)
