DOCX Filing and XML Conversion

Patent Center

New and unified system to replace EFS-Web and PAIR

Single interface

- Features single interface for filing and managing patent applications

Recent technology

- Integrates recent technology
- Allows for enhanced system operations
- Enables increased functionality

Authentication

- Use your USPTO.gov account that also allows access to EFS-Web and Private PAIR
- Allows role based access—Patent Practitioner, Practitioner Support, Independent Inventor, and guest access.

DOCX submissions

- DOCX is a common word-processing file format, which is supported by most popular word-processing applications.
  - Microsoft Word, Google Docs, LibreOffice, and Pages
- The USPTO began accepting structured text (DOCX) in August 2017.
- Applicants are currently able to file utility nonprovisional, provisional, and national stage (371) patent applications (specification, claims, and abstract) in DOCX format.

DOCX benefits and features

- Safe and stable for creating, authoring, and processing IP documents
- Drag and drop for document upload
- Requirement to convert DOCX into PDF for filing is eliminated
- Detects and splits specification, claims, abstract found in a single file (i.e., multi-section)
- Automated document code assignments saves initial processing time
- Provides content-based validations pre-submission, saving examination, and initial processing time
  - Specification paragraph numbering detection
  - Independent and dependent claim count
  - Duplicate or missing claim number detection
  - Improper multiple claim dependency
  - Abstract word count
- Secure: automatic metadata detection and scrubbing
