THEROLEOF INTELLECTUALPROPERT Y(COPYRIGHT)ANDFUTURE CHALLENGESTOCREATORS,INDUSTRY,LEGISLATORSANDSOCIETYAT LARGE:THECHALLENGEFORPOST -COMMUNISTCOUNTRIES

Mr.HeikiPisuke,ProfessorofLaw,Head,ChairofPrivateInternationalLawand IntellectualProperty,InstituteofLawandAdvisertotheMinisterofJustice, Estonian MinistryofJustice,Tallinn,Estonia

Introduction

- 1. Inordertojustifymyacademicbackground,letmeapproachthetopicsofthissection fromamoreacade micperspectiveasopposedtothepracticalapproachtakenbymy colleagues.
- 2. Innovationandcreativityarecharacteristicofhumannature.Creatorsassuchhave existedfromtheveryfirstyearsofhumanhistory.Thefirststoneaxeandwa llpaintings drewontheknowledgeandinformationexchangeofthattime.Althoughitisnotquiteright tocomparethetimedatingbacktothousandsofyearswithtoday'sKnowledge -BasedSociety andInformationSociety,thesubjectofcreativity -ahuma nbeing -haslargelyremained unchangedinhisorhernatureandmotivesofaction.Ahumanbeingischaracterizedby curiosityandpassiontocreatesomethingnew,and,inadditiontoinnermotivation,the currentneedsofanindividualandasocietyco nstitutethedrivingforceofcreativity.
- 3. Attitudestocreativeworkasanactivitychangedwhenitsresults -inventions and creations -startedtobeprotectedbylaw. This did not happen until as recently as late as the 17thand18 thcent uries.Creativeworkcrossedtheboundariesoftheindependentsystemof regulation of law when it turned into a direct social factor creating economic values, when thand18 thcenturiest hat industriesbasedoncreativeworkwereborn.Itwasonlyinthe17 interestgroupsrelatedtocreativeworkwontheprotectionfortheirspecificeconomic th century, the interests a sindependent rights guaranteed by the State. At the end of the 18protection of theso -called moral rights of authors was also ensured b ylawinthecontinental Europeanlegalarea. The exclusive intellectual property rights based on the property law according to the Roman law system were aster forward in comparison to the system ofprivilegesappliedintheMiddleAges.Butthelawof thenewerawhichgrantedspecific protection to innovations and literary and artistic works was initially of local importance. withintheboundaries of one country, group of countries or region (in this presentation lookingatthesubjectfromtheEuropea nangle). Intellectual property became global only at theendofthe19 th century with the adoption of the Parisand Berne Conventions. The Europeanregionalintellectualpropertyprotectionsystemthusdevelopedintoaglobal intellectualpropertysyste m.
- 4. Contemporarylegalandsocialtheoryspeaksofagloballegalsociety(oragloballegal systemorworldlegalsociety). Accordingtosomescholars, such agloballegalsociety may wellalready exist. Other sargue that we neither do nor will in the future have agloballegal society. The argumentagainst the global society is that law (as a normatively structured communication system) at the level of aglobal society is no more than a set of legal systems that integrates all the different national systems within itself (Professor Werner Krawietz).
- 5. Letmeraisetwoquestions.Isitpossibletospeakaboutagloballegalsocietyinthe fieldofintellectualpropertyaspartofthegloballegalsociety?Theanswerisprobably yes.
- 6. Whatisagloballegalsocietyinthefieldofintellectualproperty? This is a situation where uniform basic social principles are globally recognized in the protection of intellectual property, and where the minimum standards have be en agreed upon at least in the following areas: what is protected, which rights are granted and to whom they belong, how the rights are limited in the interest of society and by what means and in what manner the rights are ensured and protected.

- 7. Ithinkthatinthefieldofintellectualpropertywearemovingtowardsagloballegal society(differentlyfrom,forinstance,financiallaw,propertylaw,familylaw,thelawof successionandotherbranchesoflaw). The fact to day is that, of all the countries in the world, by more than half have become part of a global intellectual property protection system (by joining the existing WIPOC onventions), and have national intellectual property systems created and implemented on the basis of unified international standards. There are probably also some countries that have no contemporary intellectual property protection system at all.
- 8. When we speak of a global legal society, the question arises of what is "global." Whether it represents 100%, 76% or 90% of the whole is a matter of opinion.
- 9. Thespeedofmovementtowardsagloballegalsocietyinthefieldofintellectual propertyincreasedsignificantlyinthe 1990s as are sultofadoption of international conventions. First and foremost Imean the activities of WIPO and the GATTUruguay Round, which led to the establishment of the World Trade Organization with its TRIPS Agreement. We can also speak of a regional legal area and the regional harmonization of intellectual property in the European Union. Every regional legals ociety contributes to the global one.
- 10. Myprognosisisthattherewillbeauniversal, globalintellectual property system —in the form of a unified and standardized body of rules en acted international conventions and national legislation. It concerns first and foremost the traditional fields of intellectual property, copyright and industrial property, but it may also include related rights and new sui generis forms of intellectual property typrotection. To date, intellectual property has been developed in the world for three centuries and international global harmonization for a little over one century, and the results are not bad given the dynamics of the process. How much time this will take I he sit at etosay; may be we need another 100 years.
- 11. Forcomparison, contractlaw, for example, evolved in Europe for over about 1500 years if we take the sixth century codification of the Emperor Justinian, to day known as the *Corpus Iuris Civilis*, as the point of departure; the latter resulted from developments over the previous 12 centuries, but the global harmonization of contract law has yet not reached the same level as intellectual property harmonization.
- 12. Whoareth eglobalplayers(orsocialoperators)formingsuchaworldwideintellectual propertylegalsystem?Firstofall,StatesandgroupsofStates.ButbeyondtheStatesand theircommunitiesitisindustries,representedbylobbygroupswhodirecttheplay. Industries aretheglobalmarketplayerstoday.Today'stechnologicaladvantages —theglobal informationsociety -canconnectalltheplayersviatheInternetwithinseconds.
- 13. Ishouldliketoposesomeotherquestions, justforconsiderat ionandpossible discussion, without giving any answers myself.
- 14. Inwhosename,forwhatpurposeandinwhoseinterestsdotheabove -mentionedglobal playersact?
- 15. Basedonwhoseinterestsisthe21 stcenturyglobalintellectual propertysystem constructed?

- 16. Doesahumanbeing, anindividual, aperson oragroup of personshave anindependent roletoplayinthis global process?
- 17. Doestheauthor, who in the continental European tradition has been the beall in building intellectual property legislation, retain his role?
- 18. Dotheprinciplesofthe 18 th century humanists regarding the sacredness and integrity of creative work, embodied in the great achievement of the 20 th century the human rights conventions—survive? To day there is no place for an author and the "romantic" concept of authorship anymore. But also in the 21 st century, we should fight for the human dimension in order to retain the human initiative on which all creative work is based.
- 19. Withinthecontextofformationofaglobalintellectual property society, Ishould like to tackle briefly the situation in post -communist countries, mostly on the example of the former Soviet Union.
- 20. Thein fluenceofpolitics and ideology on law as the State's normative system was remarkable in the socialist system. Literary and artistic works as well as technical works in the socialist society were State oriented, centrally planned and controlled. State involvement in the field of copyright was important: the ideology determined both the legal framework for the protection of works as well as the direction of the creative work of authors. Creative work progressed in one of ficial ideological direction, devi ations were not to lerated and opposition was punished. The Soviet Union did not join the international copyright protection system until as recently as 1973, when it became party to the Universal Copyright Convention of 1952.
- 21. Asaresultof the collapse of the Soviet Union and the establishment of independent States in 1991, all the formers ocialist republic shad to carry out reforms that affected the whole of society and encompassed first and foremost the political, economic and legal reforms. This meant the transformation of the entire legal system, starting from the adoption of an ew Constitution.
- 22. Inthefieldofintellectualpropertytherewerealotofcrucialissueswhichdemanded radicallegalsolutions.Letmementionjustafewofthem:
 - A TheplaceofintellectualpropertyintheState'spoliticalandideologicalsystem
- 23. Several countries adopted a position that intellectual property rights are the fundamental rights of a person, provided for in the characteristic fundamental rights and freedoms. As a rule, those chapters relied on the European Convention of Human Rights (1950) and corresponding United Nations conventions.
- 24. The Constitution of the Republic of Est onia (1992), Chapter II Fundamental Rights, Freedoms and Duties § 39. An author has the inalienable right to his or her work. The State shall protect the right soft heauthor.
 - B TheplaceofintellectualpropertyintheState'seconomicsystem
- 25. Asaresultoftransitionfromthesocialistplannedeconomytoamarketeconomy, intellectualpropertybecameaninstrumentofmarketeconomy.InEstonia,forexample,a

so-calledliberalmarketeconomyisbeingimplemented, with the role of the regulating economic relations being seen as minimum.

C	Thepla	<u>iceofintellecti</u>	ıalpro	perty	<u>yrulesintheState'</u>	'slegals	ystem

- 26. The Soviet legal system embodied the following intellectual property institutions: authors' rights (copyright), rights in inventions and rights indiscoveries, forming separate parts of the Civil Code. Soviet doctrined id not recognize the theory of intellectual property consisting of economic rights.
- 27. Newlyestablishedlegalsystemsregulateinte llectual-property-relatedissuesinseparate laws,outsidetheframeworkoftheCivilCode.

D <u>Modelsofnewintellectualpropertysystem</u>

- 28. WhenonespeaksofmodelsoftheintellectualpropertysystemsofEuropean post-communistcountries,th epracticalimplicationsofthedoctrineofaglobalintellectual propertysocietybecomeparticularlyclear. AlltheformerSovietrepublicsthatbecame independentandthepost -communistcountriesofCentralandEasternEuropehavereliedon theWIPOtr eatiesandtheWTOTRIPSAgreementwhendraftingtheirownintellectual propertylegislation. TencountriesofEasternandCentralEurope, includingtheBaltic countries, areassociatemembersoftheEuropeanUnion, theirlegislationbeingalsomodelled onthebasisofEUdirectives, inadditiontotheconventionsmentioned.
- 29. LetmebrieflymentionafewfactsaboutEstonia,anassociatememberwithwhichthe EuropeanUnioncommencednegotiationsin1998.Bythebeginningofthisyear,all EuropeanUnioncopyrightandrelatedrightsdirectiveswereharmonized,andEstoniahad signedthetwonewWIPOCopyrightandRelatedRightsTreatiesof1996.AfterEstonia's independencewasrestablishedin1991,tenspecialActswereadoptedindifferent fieldsof intellectualproperty,andEstoniaaccededorresumeditsadherenceto14international conventionsinthefieldofintellectualproperty.NewversionsofseveralActshavesince beenadopted.
- 30. Theadoptionofinternationalconven tionsandthestandardsofEClegislationisan internationalobligationonthesepost -communistcountrieswhicharenowassociatemembers countriesoftheEuropeanUnion.Thekeywordcharacterizingthelegislativedraftingprocess ofpost communistcoun triesisharmonization.Thisalsodeterminesthedirectionandcontent ofthenewintellectualpropertylegislation.
- 31. Finally, Ishould like to make one more comment on this subject. During the first years of reforms, it was relatively easy to adopt new legislation and incorporate in it the provisions of international conventions and the laws of foreign countries, as well asscientificide as (academic shave always written and a restill writing laws in Estonia). Now, lobby groups of industries have also become an influential factor in post -communist countries, and at times have succeeded in blocking some provisions not favorable to the minthe process of harmonization of national law with the provisions of conventions or EU directives.

E Implementation

32. Thenewlegislationbasedoninternationalmodelshasgivenapowerfulimpetustothe developmentofinstitutionsresponsiblefortheimplementationofintellectualproperty.State intellectualpropertyagencies,Statepatentof fices,copyrightdepartmentsattheministriesof cultureorjustice,collectiveadministrationorganizations,specialpolicetaskforcestofight piracyandsoonaresomeexamplesoftheinstitutionsspeciallysetupordeveloped.

F Enforcement

33. The dichotomy between the law in law books and the law in real life is particularly well expressed in enforcement is sues. A reply to the question whether the former communist countries are prepared to transpose the standards of advanced countries is to be found in the field of enforcement. It is easier to create a new law, especially in a country that has lacked a law in a given area. For example, so me post - communist countries have enacted more extensive consumer legislation than in several member. States of the European Union. The unwillingness of a society to a dopt standards is visible in enforcement. Implementation is such a problem because in most cases, the law cannot be implemented, whereas in somethere is now is hto do so for one reason or another.

G <u>Informationofthepublic</u>

- 34. HenryOlssonisabsolutelyrightwhenhespeaksoftheneedtoimproveinformation effortsrelatingtointellectualpropertyandprovidepracticaladvice. Thisisrelevantalso particularlyrelevant topost-communistcountries. Trainingisoneofthekeyissuesinthe presentknowledge-basedsociety. Trainingofjudges, civilservants, policeandcustoms officersandoftrainers, studentsandothertargetgroupsisoneofthekeyissuesinthe enforcementofnewintellectualpropertylaws. Theroleof WIPO in providing information and training and in granting practical assistance is most significant.
- 35. Toconclude, Ishouldonce again like to focus on human initiative. There is a genera known recommendation on how to cope with one self which is to live one day at a time and, on waking up in the morning, to think about the coming day only and not about the possible future. However, some body must assume the difficult task and responsibi lity of looking into the future and drawing up ascientificaction plan for moving in that direction. The organizers of this Forum on creativity and inventions a better future for humanity in the 21 st century—have taken on that difficult task, and the reis no doubt that such a collective exchange of ideas is a milestone on the road towards the global intellectual property society.
