INVENTORS, INNOVATORSA NDCREATORS -THEINTELLECTUALCA PITALOF NATIONS -MEXICANINVENTORSD EVELOPMENTORGANIZAT ION

DocumentpreparedbyMr.GuillermoGonzálezCamarenaBecerraAcosta,Director General,GuillermoGonzálezCamarenaFoundation,MexicoCity

INTRODUCTION

- 1. Mexicoisacountryofboundlessgenius.Creativityisoneofthemanyinnatequalities oftheMexicanpeople.However,thedevelopmentofsuchtalentsrequiresconstantsupport. Today,manysectorsofMexicansocietyhavenegl ectedthepromotionofinventionand scientificresearch.Asaresult,manyprojectshaveremainedunexploredandhavetherefore failed,whileafewothershavesoughtforeignsupportandhavebeenconcludedabroad.
- 2. Insofarastheycannotfin dsufficientlocalsupport, Mexicaninventorseitherabandon theircreativeeffortsorleavethecountryinsearchofbetteropportunities. This is unfortunate since Mexico could very well benefit from its talents, while promoting the economy and national welfare. Each project that leads to the production of goods and services will bring about the proliferation of employment, and will stimulate economic growth.
- 3. Overthelong, difficultandsometimes disappointing road that must be run before an idea, a discovery oranin vention can be applied, we stumble upon conflicting interests, successes, and failures. Intellectual property, patents, bonuses, inventions, technology transfer, skepticism, economic growth, industrial espionage and plagiaris m, patent legislation, research financing, sale and purchase of processes and prototypes, rewards for researchers and inventors, and the increasing technological dependence of the Third World upon the First World: all these representarestriction that proventions are events us from enjoying to day what very few thought of yesterday, for the joy and benefit of many.
- 4. *Invenovation* is a term created by Amado Santiago, a Mexican engineer, inventor and researcher. Withit, he tries to synthesize in one word the multiple supports that are required for an ovelty to be transformed into a community.
- 5. Theessentialthingistoconsiderthatatechnologicalnoveltyisonlytheconsequence of an an anivention or discovery, and that it could just remain as a nide aifitis not subject to the process of *Invenovation*, in order to be transformed into an innovative commodity. The technological novelty doesn't survive by itself, and, if it is not invenovated, it will not be carried through.
- 6. Therear etwoparametersthatcondition *Invenovation*. One is continuity of effort; the other is evolution. These factors which seem contradictory are very closely linked, one cannot be isolated from the other and the failure or success of what becomes of the inventor depends on their handling.
- 7. Policies should be directed towards the future, taking into account that the most probable outcome will be their continuous modification according to the frame of reference and available means; fixed goals should be characterized in terms of their mobility and transitory nature. The capacity for change in our *Invenovation* policies should be both permanent and immediate to guarantees table continuity.
- 8. With *Invenovation* it is essential to try an dpredict the future. To anticipate the future is such arisky under taking, that we should have the continuous possibility to change the options for technological innovation, to modify what we have to day, with the aim that what is obtained to morrow will not be obsolete and worthless.

- 9. Situatinganinnovationinatemporalcontextisthemaintaskof *Invenovation* and surelythemostcomplex,themostdifficultandtheonethatwillfacemostobstaclesinthe future.
- 10. Manyofthec urrentideascannotbeintegratedintooursocietytoday,buttheywillbe functionaltomorrow.Ontheotherhand,thedayaftertomorrowtheywillbeobsolete.This is difficult to understand, mainly for those that condition the world of the future on the economic and so cial foundation of the present and the past.
- 11. Technologicalinnovationcreatestechnologyand,ifyouinvenovateitasanessential condition,itwillproduceandmultiplytheinnovation. *Invenovation*ispartofachain;a link thoseconditionsuse,consumptionandevolution.Throughevolution,innovationhas transformedourhabitsandourcustoms.Innovationgeneratesinarapidmannerformsof thinkingthatconditioneducationandsocialrelations.
- 12. Thisco mmunicationvortexatthebeginningofthenewmillenniumisbothaprovider andapanaceaofevolution,adetonatorandapalliative,aninnovationandaresult. The imbalanceandlackofadaptabilitythatwillproducetheinnovationwillhaveconsequenc theroadtowardsthefuture. Evolution, asalwayshappens, facestwocurrents: those that desireit, and those that fearit, but which in away helptocreate it by means of the consumption of innovation.
- 13. Itwasimperativetoestablis han *Invenovation*bodyinMexicoforthepurposeof creatingastrategicoperationschemeofferingsystematicsupportforthedevelopmentofthe capacitiesoftheinventors' community, in addition to promoting the establishment of a national *Invenovation*c ulture through an enterprise for the improvement of technological innovations.
- 14. Beinginvolvedinthistask,weapproachedtheMicroEntrepreneurialGlobal Programme,whichisbeingimplementedinMexicobytheUnitedNationsDevelopment Programme(UNDP)andtheMexicanGovernmentthroughtheNationalDevelopmentBank.

THEMICRO -ENTREPRENEURIALGLOB ALDEVELOPMENTPROGR AMME

- 15. AlmosttwoyearsagotheMexicanGovernmentDevelopmentBank,Nacional Financiera(NAFIN),recognizedtheu rgencyofinstitutingadevelopmentprogramspecially designedtopromoteandsupportthedevelopmentofthesmallestproductionunitsinthe country;aprogrammewithmassivecoverage,thatnotonlyfocusesoneffectiveaccessto credit,butisalsointe ndedtoimpactonthosefactorsthatrepresentobstaclestothe developmentofmicro -enterprises.
- 16. Aninvestigationwascarriedoutinordertoidentifywhathasbeendoneindifferent countries, mainlyin Mexico, to support micro enterprises, specific neglected sectors and the poorest communities. The methodological proposal smade by foundations, bilateral agencies and multilateral organizations were carefully analyzed.
- 17. Itwasdecidednottowaitforthecompletemethodologyto beconcludedorfor normativeprocedurestobegin. Itwasdecidednottouseoperatingmanualsonthedesksof NAFINorconsultancyfirms, buttoadvancejointlyintheconstruction of the program with several players from the public, private and socials ectors, and mainly with the critical and

committed participation of micro - entrepreneurs and micro - producers from poor and even excluded sectors and communities.

Thus, designand implementation of the Programme was carried out through five initiatives that we retermed Pilot Projects, and through the combined efforts of several players suchasthegovernmentsoffivefederativeentities; the Secretary for Social Development and Environmental Protection of the Federal Government; the Mexican IndustrialProperty MexicanInstitute; the National Women's Commission; the Guillermo González Camarena Foundationand, specially, with the United Nations Development Programme (UNDP), which signed a cooperation agreement with NAFIN in order to promote theGlobalProgramme.For overayear collaboration with UND Phasbeen extremely important and active. Thus far, morethan 1,000 micro - producers have worked intensively on the methodology, underlying theGlobalProgramme.Theyformedsixlegally -baseddeve lopmentorganizations -OrganizacióndeFomentoinSpanish(ODF's) andfiveCompetitivenessandDevelopment FundsincommercialbanksrepresentinganaccumulatedamountofUS\$235,000.00,which allowedthemtoactivateacreditlinebeginningatUS\$270.00 0.00andwillbeduplicated everysixmonthsuntilanaccumulatedamountofUS\$17.2millionisreached,intwoanda halfyears'time.

I. BASICPRINCIPLES

- 19. Thepilotexperienceandcommittedparticipationofalltheplayershasenabledthe basicprinciplesprovidingsustainedjustificationfortheGlobalProgrammetobeconfirmed, adaptedandenriched.
- (a) ACategoricalDenialofaPatronizingApproach ,recognizingthatefficiency and competitiveness are not intrinsic conditions of productionestablishments. The Programme is not aphilanthropic undertaking designed to solve problems, but a strategic plant opromote the initiative sofmic ro-producers and micro-entre preneurs so that they will be able to solve those problems by them selves . The Global Programme has not been designed to operate as a public sector instrument. It has been conceived as an action proposal formic ro-entre preneurs and micro-producers to achieve complete development of their undertakings.
- (b) TheGlobalProgram incorporatesFinancialSustainability asafundamental paradigm. Itisnotacceptedthat supports hould necessarily be subsidized. This is in fact the challenge: to achieve a situation where by all support instruments can operate according to elementary principles of profitability. The essential continuity of the Programme will be achieved only in this way. If a patronizing approach is really eliminated, all the requirements of entrepreneurial practice are accepted as valid.
- (c) PovertyAlleviationand CommunityDevelopment aretwoofthemainobjectives oftheGlobalProgramme.Financialsustainabilityshouldinitiateaseriesof'virtuousspirals' ofeconomicempowerment,andincreasethewell -beingofmicro -entrepreneursandmicro -producers.Inthe caseofthesmallestproductionunits,simpleaccesstocreditcansometimes beuselessandevencounterproductive.Manyotherformsofsupportarerequiredsothat communitiesandmicro -entrepreneursmayenhancetheirwelfarelevelsasaresultoftheir productionactivity.Financialsustainabilityisnotevaluatedbyitself;therepercussionsfor povertyalleviationandcommunitydevelopmentarealsoconsidered.

- (d) The Programme adds a fundamental paradigm: the promotion of equitable development which implicitly helps to eliminate the obstacles and structural limitations that in hibit equal opportunities in economic and so cial development, maintaining as its principle, respect for human rights.
- 20. IntheGlobalProgrammemicro -enterprisesarenotconsideredtobehigh -priorities simplybecausetheyaresmall. Thehigh -prioritygoaloftheGlobalProgrammeistoensure that very small production units, as well as micro -entrepreneurs and micro -producers will no longer beignored by the formal system of entrepreneurial support. The specific intention is precisely to promote equal opportunities in economic activities. That is why within the implementation of the Global Programme eights pecific programmes will be setup, as follows:
 - Inventors/micro-entrepreneursand/orproducers;
 - Womenentrepreneurs -womenproducers;
 - Youngmicro -entrepreneurs/producers;
 - Elderlymicro -entrepreneurs/producers;
 - Disabledmicro -entrepreneurs/producers;
 - Micro-producersofartisticandculturalactivities;
 - Micro-entrepreneurs/producersofpopularart;
 - Micro-producersfromindigenouscommunities and excluded groups.
- (e) Thedevelopmentofcompetitiveness becomes a strategic paradigm, within the Global Programme. Support is provided formic or enterprises not only to survive but also to play an active role in the process of economic modernization. Men and women in non formal areas are not excluded from the benefits of the Global Programme. On the contrary, they are a fundamental part of it, but support is granted precisely to enable producers and entrepreneur stoparticipate in the formal economy, while recognizing that it is not possible for them to develop and remain competitive whils tremaining in the informal sector.

II. STRATEGY

- (a) IndividualIni tiativeandCollectiveAction:ASpecialJointVenture.
- 21. The Programme also recognizes that the main limitation and disadvantage for small producers, in particular micro enterprises, are due to the fact not that they are small, but that they act on their own. They operate in isolation, in an economy that is increasingly closely inter-linked.
- 22. ItisafactthatinMexico,forcertainmicro -entrepreneursandmicro -producers,theonly waytoexpand,andinsomecasestosurviveist obewillingandabletojoinforceswithother economicunitsinvolvedinsimilaractivitiessothattheymayallbenefitandbeinabetter positiontocompete.
- 23. Theideaofthespecialjointventureisnot,however,thatofaco -operativeormerger, butratherameansofcollaboration,astrategicalliancewhich,respectingeachmicro enterpriseandeachperson'sindividuality,encouragesandfacilitatesjointeffortstoachieve morenegotiatingpower.

- 24. Micro-entrepreneurs/producersmayenterintoorceasetoformpartofspecialjoint ventures, provided there is a valid business reason for doing so. There are no formal written undertakings. Experience has proved that joint action works only when there is the freedom to cho ose whether to participate.
- 25. Specialincentivesarealsoexcluded, since they tend to misrepresent the idea of joint effort. Participants should always be sure that it is more beneficial to do so mething jointly rather than individually. Any collective initiative, which fails to result in increase drevenues, has not achieved its objective.
- 26. UnderthisGlobalProgramme,membersoftheMicro -EntrepreneurialProjectGroup maycollaboratebutalwayshavethefreedomtoactonthei rownaccountandadvanceattheir ownpace.Theoutcomeandparticularprofitlevelswillalwaysdependonthequalityand extentofpersonaleffortofeachparticipatingindividual.
 - (b) DevelopingCompetitiveAdvantages .
- 27. Itisaccepted thatmicro -enterprisesmaynotonlysurvivewithoutspecialprotection,but infacttheyhavecertaincompetitiveadvantages,whichwillenhancetheirabilityfor development. Itis, of course, recognized that the setypes of advantage only become element of competition if and when they are properly developed. In the pilot projects the following competitive advantages have been identified:

S

- Betterconditionsofflexibilitytocreateorincorporatetechnologicalinnovationin anopportunemannerandwithowercostsandinvestments;
- $\bullet \qquad \text{Better capacity to specialize in the manufacture of reduced volumes of goods and services of high quality in relation to design and raw materials; }$
 - Betterstructuralpossibilitiestoachieveprofitableandflexiblespec ialization;
 - Bettercapacitytoestablishpersonallinkageintheirproductionrelationship.
- 28. TheGlobalProgrammerecognizesthatoneofthemainlimitationsofthesmallest productionunitsliesinthewrongchoiceofmarketorsupplyso urce.Worsestill,experience hasshownthatonlyinveryfewcaseshavethecompetitiveadvantagesaffordedbytheirsize beentakenintoaccount,whenchoosingtheproductsandservicestheyprovide.The DevelopmentOrganizationendeavorstocorrectth islimitation.
 - (c) SupplyandDistributionLinks .
- 29. OneofthemostimportanttasksoftheGlobalProgrammeistosupport inventors/micro-entrepreneursandhelpthemestablishformallinkswiththerightmarketsas wellasreliableandlong -termsuppliersofgoods,rawmaterialsandservices.
- 30. Inthecaseofmicro -suppliers, the Development Organizations support the minrelation to their normal commitments to supply medium and large sized companies in their respective regions. The Development Organization, with the collaboration of the Support Committees, UNDP and NAFIN in particular, not only encourages subcontracting but also specific programmes for supply and distribution systems' development.

(d) AdditionofotherDevelo pmentInitiatives.

31. The Programmese ekstosupport and to supplement, but not to duplicate or to displace other instruments and support programmes that are already operational invaried public, private and social institutions in the country. It is intended to supplement the efforts of the local, national and for eignplayers to promote the development of micro entrepreneurs/producers in support of inventors, and to promote the creation of an ational innovation culture.

(e) AnIntegralSupport .

- 32. The Programme accepts that in order to develop inventors/micro entrepreneurs and micro-producers require effective access to financial support; it also recognizes, however, that creditis not sufficient and that it is essential to offer int egral support in relation to promotional and organizational development, information, training, technical assistance, trade promotion and technological alternatives.
- 33. WithintheimplementationoftheGlobalProgramme,thehighestpriorityisa ttachedto inventors/micro-entrepreneursand/orproducersachievingeligibilityforsupportfromformal institutions.

II. THEBENEFICIARIES

- 34. The Global Programme en compasses all Mexican menandwomen who decide to dedicate part of their i metoproduction activities, as well as those already involved in business that wish to obtain more than just areward for their work and are willing to make a special effort to do so.
- 35. The Global Programme has been designed also to supports malleconomic units, which are excluded instructural terms from formal technical and financial support systems.
- 36. Whenamanorwomaniswillingtoriskputtinghis/herefforts,skills,ownmoneyand reputationintoabusinessventurewithno formofprotectionotherthanhis/herownabilityto compete,theGlobalProgrammeendeavorstoensurethathe/sheobtainsthenecessarysupport whichincludesinformation,training,financing,technicalassistance,intellectualproperty professionalcouns eling,tradepromotionandtechnologicalalternatives.

(a) Micro-EntrepreneursandMicro -Producers

- 37. The Global Programme makes a strategic distinction between producers and entrepreneurs, depending upon the degree of importance and stature that they might attach to the four basic functions of production entrepreneurial activity: acquisition, production, sales promotion and administration.
- 38. Amanorwomanwhochoosestoconcentratehisorhereffortsintheareasof acquisition, salespromotion and administration, qualifies a samicro entrepreneur. Usually, he/shebecomes directly involved in production only if he/she has no alternative and, at the first opportunity, he/she will hire one or more workers to whom he/she tendst odelegate all production responsibilities.

- 39. Bycontrast, amicro -producer prefersto focushis/hercreativity and enthusiasmon production. Amicro -producer usually regrets having to use his/her production time and effort to carry out the three additional functions (acquisition, sales promotion and administration).
- 40. The difference between entre preneurs and producers has been included in order to highlight the different kinds of support and promotional activities available und erthe Global Programme, designed not only to support entre preneurial development but also to give producers the option of a chieving an effective, reliable and controlled support operation. It should be stressed that the Global Programme considers both mi cro-entre preneurs and micro-producers to be of equal importance.

(b) Micro-EntrepreneurialProjectGroup

- 41. The criterion for defining each project could be one of whether to support micro entrepreneurs and producers from certain regions or locations, or to strengthen specific branches of economic activity of amore specialized nature. Ideally, the initiatives will come from the communities themselves.
- 42. Toactivateinitialprojects,theGlobalProgrammerecommendsthefollo wingcriteria, relatingtohigh -priorityandstrategicapproaches:
 - (i) High-priorityapproach
- 43. Projectsinmarginalizedcommunities, where the Global Programme could actively contribute to overcoming poverty levels.
- 44. Projectstatcouldbeusedasprototypeandpilotexamples, and could be reproduced in different regions to promote the empower ment of those communities.
- 45. Thoseprojectsmostlikelytoberealized and produce goodshort -term results.
 - (ii) Strategic approach
- 46. Projectswheregoodsproducedcanreplacethosecomingfromabroad.
- 47. Projectswhich, according to their production feasibility and marketing potential, could be sustainable and financially viable in the short term.
- 48. Productionprojectsutilizinglocalcapacities and rawmaterials produced within the community or municipality itself.

(c) Projectparticipation

- 49. Aspecific projectis only realized if inventors/micro -producers and/orent repreneurss o decide, and a Micro -Entre preneurial Project Grouphas been formed by way of a Letter of Commitment through which participants undertaketo:
- <u>AgreeonaBusinessPlan</u> with their Development Organization for the specific purpose of making bigger profits/ income, and agreeing to share profits with said Organization in accordance with the terms laid down in the Global Programme;

- <u>Makeregular contributions</u> to the Competition and Development Fund, in accordance with the terms and conditions of the Global Programme;
- <u>Shareexperiences</u> and provide technical and training assistance to other members of the Micro-Entrepreneurial Project Group;
- <u>Participateintakingthenecessarysteps</u> toincreasethecollectivecapacityto compete;
- <u>Whererequired, undertake particular commitments</u> with the Micro Entrepreneurial Project Group;
 - <u>Appointrepresentatives</u> to the Development Organizations' Board of Directors.

IV. INSTITUTIONAL SUPPOR TINFRASTRUCTURE

- 50. Localplayersthatparticipateinthesupportac tionsforeachprojectincludethestateand federalgovernments,localofficesandagencies,successfulentrepreneurs,universitiesand traininginstitutes,researchcenters,industrialassociations,professionalunionsandall organizationsconcernedwit hmicro-entrepreneurialdevelopment,thecreationofanational innovationculture,povertyalleviation,andtheempowermentofwomenandindigenous populations.
- 51. Theactive participation of certain national players, such as departments and agencies of the Federal Government, private institutions of national scope, chambers of commerce and industrial associations, national universities, NGOs and commercial enterprises of fering national coverage, is also promoted.
- 52. Multilateral financialorganizationsareconsideredtobeexternalplayers. These include United Nationsagencies, international foundations, and bilateral agencies for development cooperation, fair -tradeorganizations and other international institutions willing to provide support for the implementation of the Global Programme.
- 53. TheseplayerscanparticipateinpromotingandsupportingtheprojectsandtheGlobal Programmethroughdifferentactions:
- ◆ Someoftheexpenditures, initiatives and investmentst hat are carried out to consolidate the pilot phase of the Global Programme are financed with resources for the institutional strengthening of one of the loans granted to NAFIN by the Inter American Development Banktosupport the micro, small and medium size denter prises in the country;
- ◆ TogetherwiththeSecretaryforForeignAffairs,NAFINhasalreadybegundealings withgroupsofMexicanimmigrantsintheUnitedStates,inordertoachievetheirsupportfor projectstheircommunitiesandstatesoforigin .Thecollaborationschemenotonlyenvisages economicsupportbutalsotechnicalandpromotionalassistancesothatthecommunities, throughtheirODF's,canselltheirproductsabroad.

(a) ProjectSupportCommittee

- 54. ForeachprojectaSu pportCommitteeissetupwiththeactiveparticipationoflocal, nationalandexternalplayers. ThisCommitteemaycarryoutitsfunctions and responsibilities inmany different ways:
- ProvidingorobtainingexternalsupportfortheMicro -Entrepreneurialprojectgroup and itsDevelopmentOrganizationinprojectimplementationandproblemsolving;
- Recommending to the Micro Entrepreneurial Project Group and its Development Organization ways to fulfill project objectives more effectively, together with hebasic principles and guidelines of the Global Programme;
- HelpingtheDevelopmentOrganizationtoconcludespecificcollaboration agreementswiththelocalentrepreneurialsupportinfrastructure. The first seven collaboration agreements have been signed with local institutions in the pilot projects;
- Providinggrantsortemporarycontributionstothemicro -entrepreneurialproject group, designed to create or strengthen their Competition and Development Funds;
- Channeling purchase orders through the Micro-Entrepreneurial Project Group, thus helping participants to expand their market alternatives;
- Makingstaffavailabletoprovidetechnicalassistanceandtraining.Inthesixpilot projects,morethan15managersoflargeandsuccessfulenterprises haveofferedtheirbest technicianstoparticipateastrainingcourseinstructors;
- Inthecaseof supply companies, granting Micro Entrepreneurial Project Group members similar treatment to that given to their major clients;
- Inthecaseofbuyers, prov iding commercial advice and spaces under special conditions, so that the Micro Entrepreneurial Project Group can market its products directly, through its Development Organization;
- Inthecaseofeducationalinstitutionsandresearchcenters, carryingou tresearchand studiesthatmaybeusefultotheMicro -EntrepreneurialProjectGroup;
- Proposing to the Micro Entrepreneurial Project Group candidates for the position of special members on the Development Organization's Board of Directors;
- Proposingto the Micro-Entrepreneurial Project Group candidates for the position of Director General of the Development Organization.
- 55. NoneofthemembersoftheSupportCommitteemayauthorizeactionsorparticipatein thedecision -makingprocessrelating toprojectimplementationorDevelopmentOrganization operation.SuchfunctionsandresponsibilitiesareexclusivetotheMicro -Entrepreneurial ProjectGroupandwillbeexercisedbyitsrepresentativemembersontheBoardofDirectors oftheDevelopment Organization.ThedonationofresourcestotheMicro -Entrepreneurial ProjectGroupsoastoactivateitsCompetitivenessandDevelopmentFundortheprovision notoftechnical,administrativeorevenfinancialsupport,doesnotprovidetherightto participateinthefundamental -decision-makingprocess.

(b) SpecializedSupportCommittees

- 56. TheseCommitteeswillbeformedbyoutstandingprofessionalsandwilloperateatthe state,regional,nationalorinternationallevel.Membersagreeto offerpartoftheirtimeto providetechnicalassistance,orientationandadvicetotheDirectorGeneralandtothe DevelopmentOrganization'sstaff.TheCommitteesarebeingsetupaccordingtodifferent disciplines:
 - ProductionEngineering;
 - Financing;
 - Marketing;
 - Environmental protection;
 - Equaldevelopment;
 - ◆ Technology;
 - Acquisitions;
 - Industrial sectors.

(c) InnovationCommittees

57. The Group Coordinators for each project form Innovation Committees, together with students, professors and high -ranking industrial design professionals. The specific task of each Innovation Committee will be to ensure that the innovations, goods and services of the Micro-Entrepreneurial Project Group meet the criteria of secrecy, originality, excellence and authenticity, as well as the particular requirements of the market niches that have been defined as commercial objectives.

(d) VolunteerCommittees

58. Peopleinterestedinhelpingtopromotethedevelopmentofmicro -enterprises, crea ting annationalinnovation culture, and alleviating poverty; as well as helping young, handicapped and elderly people and women, and infostering the empowerment of indigenous populations, are invited to participate in Volunteer Committees which provide different support activities.

(e) NAFINSupport

- 59. Inadditiontofinancial support, NAFIN:
- IsresponsiblefordraftingandupdatingGlobalProgrammemanualsand information;
- Organizesglobaltrainingprogrammesandprovideson -goingtech nicalsupportto stafffromDevelopmentOrganizationsinordertoenhancetheirprofessionalskills;
- ActivelyencouragestheestablishmentofjointagreementsbetweenDevelopment Organizationsandpublic,privateandsocialsupportinstitutions;
- CirculatesprojectresultstotheDevelopmentOrganizationsandarranges meetingstoencouragecommunicationandexchangesofideasandexperiences;

- UndertakesapermanentsupervisoryroletoensurethatDevelopment OrganizationscomplywithGlobalProgrammere gulations;
- ActsjointlywithDevelopmentOrganizationsinpromotinggoodsandservices bothnationallyandinternationally,andinnegotiatingwithmajorbuyersandsuppliersfrom Mexicoandabroad;
- Promotesandnegotiatestechnicalandfinancialsuppo rtwithmultilateral organizations, bilateralagencies and cooperative development foundations, intellectual property organizations, women's institutions, environmental protection institutions, fairtrade organizations, as wellas Mexicanimmi grants' associations and clubsoverseas.

VI. THEDEVELOPMENTORGA NIZATION

- 60. The Development Organization is a legally -established company owned exclusively by the Micro-Entrepreneurial Project Group. It works directly with micro-entrepreneurs and micro-producers in designing and implementing business plans and assists in obtaining the necessary information, training, financing, technical assistance, tradepromotion and/or technological alternatives, in addition to acting a salink between the entrepreneur is a community and the support infrastructure.
- 61. The Micro-Entrepreneurial Project Grouphires professional stomanage the Development Organizations. NAFIN, UNDP, UNIFEM and the Support Committee act as backupin order to increase their efficiency and effectiveness.
- 62. The purpose of the business plans prepared by each member, with the active participation of his/her Development Organization, is to achieve a specific target relating to increase d profits/income.
- 63. Thesebusi nessplansarenotaconventionalkindofstrategy. Theyarespecially designed formicro entrepreneurs/producers and take into account the local situation and social reality, as well as the prospects for economic activity. The seplansare based upon joi nt analysis; Development Organization staff and micro entrepreneur sidentify and implement those measures which at a lower cost, and with less time and effort, will allow them to achieve their goal of increasing profits/income.
- 64. Micro-producers request Development Organization stode alwith acquisition, administration and sales promotion tasks, there by allowing such producers to concentrate on what they do and know best, i.e. production.
- 65. ForthepurposeoftheGlobalProgramme,be ingmorecompetitivealwaysmeanslarger profitsformicro -entrepreneursandagreaterincomeformicro -producers,thanthat anticipatedpriortojoiningtheGlobalProgramme.
- 66. If changedoes not bring about the required results in terms of revenues, there is no purpose in changing. Likewise, if technical and financial support does not translate into increased profits, the measures taken are in a dequate and unjustifiable.
- 67. ThatiswhyDevelopmentOrganizationscanonlysurviveand dobusinessiftheir supportisproductiveandsuccessful.

- 68. Micro-entrepreneursandmicro -producersagreetoshare25percentofanyadditional profits/incomewiththeDevelopmentOrganization.However,iftheBusinessPlanproves unsuccessful,thentheDevelopmentOrganizationwillreceivenomoneyatall.Thealliance isaspecialjointventurewherebyparticipantsprovidethenecessarygoodwillandmeansof production,andtheDevelopmentOrganizationitsexperienceandexpertise,aswella sthe linktothesupportinfrastructure.
- 69. IthasbeenconsideredthatDevelopmentOrganizationswillcooperatewitheachother inordertohiretheservicesofinterdisciplinarygroupsofexpertswhichprovideallofthem withspecializedsupportandtostrengthentheircapacitytocarryouttheirfunctionswith greaterefficiencyandbroaderapplication.Respectingtheprincipleofincrementalprofitsas anobjectiveofandexplanationforentrepreneurialservices,thesemutualsupportgroups will sharewithODFstafftherevenuesderivedfromtheirparticipationintheincrementalprofits. Throughtheconsolidationoftherequirementsandactionsofallcommunitiesparticipatingin theGlobalProgramme,thecapacityforcollectivenegotiatio nwillbeincreasedevenmore, mainlyintheacquisitionofinputs,rawmaterialsandcapitalgoods,andinpromotionand marketingtasksbothinMexicoandabroad.
- 70. Topromotethisinitiative,NAFINformalizedanagreementwiththeCenter for AdministrationResearchandAdvancedStudiesoftheInstitutoPolitécnicoNacional (NationalPolytechnicInstitute),themostimportanttechnicaleducationinstitutioninMexico, andaninterdisciplinarygroupof10experts,whichhasalreadybegunto collaboratewiththe directorsofthesixDevelopmentOrganizationsinoperation,forthespecificpurposeof consolidatingtheirprojectsandparticipationintheGlobalProgramme.NAFINalso concludedacontractwiththeUNAM(NationalAutonomousUnive rsityofMexico),themain publicuniversityinthecountry,toencouragetheformationofnewSupportGroups,oncethe GlobalProgrammeisactivatedformallythroughoutthecountry,atthebeginningof2001.

VII. COMPETITIONANDDEVE LOPMENTFUNDS

- 83. Theinfrastructureofcommercialbanksorreputablenon -bankingfinancial intermediariesisalsousedforoperationalpurposessothattheygraduallyreplaceNAFINin thetakingofcreditrisk(throughastrategicalliancewiththeDevelopmentO rganization).

(a) Amountofcredit

84. ThusitshouldalwayscorrespondtotheamountrecommendedbytheBusinessPlan, butwhereamicro -entrepreneurisgrantedcreditandmakestherepaymentsontime,the memberwillgraduallypavethewayto receivingincreasedfinancialsupport.Insuchacase, he/shewillautomaticallybeeligibletoreceivesubsequentcreditofupto1.5timesthe amountoftherepaidloan.Thus,theGlobalProgrammeacknowledgesthecreditworthiness ofthosemicro -entrepreneurswhocomplywiththeirobligationsandcommitments.

(b) Interestrates

- 85. Asregardsthecostoffunds,theGlobalProgrammerecognizesthat,paradoxically,itis absolutelytruethatmicro -enterprisescanmorereadilyassimilate theimpactofhigherinterest rates,sincethisrepresentsaninverseproportionalrelationshipbetweenthesizeofthe businessandthefinancialinternalrateofreturn.
- 86. Thisgreatercapacitytopayhigherinterestratesallowsmicro -enterprisestocovertheir alsorelativelyhigheroperationalcostswhenaccessingcreditandalsocompensatesforthe lackofconventionalcollateralandthefactthattheyaretraditionallyseenasahighriskbythe formalbankingsystem. Of course, dynami cschemesandspecialized micro -credittechnology arenecessaryifoperations are to be profitable. The Global Programme works in this direction with the system of financial intermediaries.
- 87. Althoughitishealthytodiscardthemyththatmic ro-enterprisesneedsubsidized interestrates, it is also clear in the Global Programmethat this does not mean that micro enterprises can always absorbexcessive and disproportionate interestrates in real terms, particularly in relation to the financing of manufacturing activities and fixed asset investments.
- 88. Itisrecognizedthatwhatisreallyimportanttothesmallerproduceriseffectiveand timelyaccesstoanappropriatesourceofcredit,althoughitisequallyrelevanttoundersta nd thatextremelyhighinterestratesaffectmicro -businessdevelopmentandonlycontributeto financialintermediaries' profits -thisofcoursedoesnothelptoalleviatepovertyineconomic orsocialterms.
- 89. UndertheGlobalProgramme,Dev elopmentOrganizationsandmicro -entrepreneursin receiptofloans,makefixedrepaymentsofcapitalandborrowingcostsatthesameinterest ratestheywouldhavetopaytoabank,iftheyhadaccess.Inotherwords,theyreceive similartreatmenttotha tofferedtoacommercialbank'spreferentialcustomers,despitethe factthattheirinitialloansareonlyforrelativelysmallamounts.Thisispossibleowingtothe factthattheDevelopmentOrganizationdoesallthenecessaryworkpriortocredit authorization.
- 90. However,NAFINdoesnotpurporttoremainindefinitelyasthefirst -tierfinancial institution. The purpose of the Global Programme, in relation to financial support, is that micro-entrepreneurs and micro-producers have the opportunity to demonstrate their credit worthiness to formal financial intermediary institutions. The idea is also to show commercial banks and other formal credit institutions that micro -enterprises can be attractive clients from a business point of view.

(c) Leasingscheme

- 91. The Global Programme attaches special importance to fixed asset investment, a sit is only in this manner that micro enterprises can modernize production and a chieve gross capital formation.
- 92. Thefinancialschem eoffersameanswherebyaDevelopmentOrganizationisgiven creditbyNAFINoranotherfinancialintermediary,anddirectlyacquiresthefixedassets requiredbyentrepreneurs. TheDevelopmentOrganizationinturnissuesaleasingcontract witheachoft hemicro-entrepreneurs,underwhichtheyareobligedtopayanagreedrentona duedate,andhavetherighttoretaintheassetattheendoftheleaseperiodinreturnfora verysmallsumofmoney.
- 93. Fortheirpart, beneficiaries agreethat in the event they are unable to meet their financial commitments, the goods and rights are automatically transferred to anothermic roent repreneur who agrees to assume responsibility for forthcoming repayments. In that case, a micro-entrepreneur receives and utilizes the goods, and capitalizes on any repayments already made by the previous lessee.

IX. TRADEPROMOTION

- 94. ThispartoftheGlobalProgrammefocusesondesignimprovementandproductquality sothatgoodsmaybesoldinmoresophiticatedmarketswherehandiworkandindividual skill,aswellasspecializedproduction,areproperlyvalued.Anyintermediariesare eliminatedandtheproductsaresolddirectlybytheMicro -EntrepreneurialProjectGroups throughtheirDevelopmentOrgani zations.
- 95. Infact, one of the Global Programme's fundamental guidelines is to encourage micro entre preneurs and producers to gear themselves towards particular marketniches, where small producers have important competitive advantages.
- 96. Atthesametime, the setting -upofalliances and working agreements with branches of shops, superandminimarkets is important, just a sit is necessary to try and encourage participants to produce the goods required and accepted by those markets.
- 97. The Global Programme promotes and encourages the establishment in Mexico and abroad of micro-entre preneurial tradecenters, which are to be owned by participants through their Development Organizations and must operate in accordance with the principles and support of the "Fair Trade" Organizations that promote the practice of fair and equal development in several developed countries.
- 98.
