

THOMSON REUTERS

THOMSON INNOVATION[®]

THE WORLD'S MOST COMPREHENSIVE IP RESEARCH AND ANALYSIS PLATFORM

SPARK NEW DISCOVERIES

Access the world's most comprehensive patent data to help stimulate new ideas and accelerate innovation.

Your Thomson Innovation subscription allows you to search the following first-level patent content:

UNITED STATES

- US Granted (1836 - Present)
- US Applications (2001 - Present)

EUROPE

- EU Granted (1980 - Present)
- EU Applications (1978 - Present)
- GB Applications (1916 - Present)
- FR Applications (1971 - Present)
- DE Granted (1968 - Present)
- DE Applications (1968 - Present)
- DE Utility Models (1983 - Present)

ASIA-PACIFIC

- JP Applications (1976 - Present, English-translated abstracts)
- KR Applications (2000 - Present, English-translated abstracts)
- KR Granted (1979 - Present, English-translated abstracts)

OTHER AUTHORITIES

- WIPO Applications (1978 - Present)
- INPADOC (DocDB) (1850 - Present, Bibliographic data and some abstracts from 70+ authorities)

Also included are:

- **Derwent World Patents Index** titles are displayed on result sets and record views, providing a value added view of the search results.
- **INPADOC legal status data**, US litigation and reassignment, and European post-issuance data allows you to follow the patent over its life to support decision making by tracking reassignments, possibly early expiration due to unpaid maintenance fees, extensions of the protected time period and reexaminations that may affect validity.

Thomson Reuters is proud to provide access to Thomson Innovation as a part of the World Intellectual Property Organization's (WIPO) Access to Specialized Patent Information (ASPI) program.

INCREASE PRODUCTIVITY AND ENHANCE COLLABORATION

Optimize productivity throughout your organization by putting accurate, reliable and relevant information at the fingertips of each employee. Use Thomson Innovation to analyze, manage and mine information all within one platform using the following solutions:

- **Save your work and easily share it** with colleagues using Work Files.
- **Quickly spot relevant key words** in search results using multi-color keyword highlighting.
- **Easily compare original document figures** with patent drawing viewer.
- **Stay in the know** of technological and competitive development using Alerts and watched records.
- **Download large amounts of patent data**, including front page images and all figures.

QUICKLY ANALYZE SEARCH RESULTS

Use Charting and Citation Maps to cut through data for clear analysis, turning large volumes of data into meaning.

- **Charting** quickly converts thousands of documents from search results or Work Files into an easy visual to identify key competitors, people, technologies or trends.
- **Citation Maps** display all backward and forward references for your patent record in an interactive graphical map, allowing you to trace the evolution or dependencies of technology through time.

ABOUT ASPI

The Access to Specialized Patent Information (ASPI) program was launched in 2010 by the World Intellectual Property Organization in cooperation with partners, including Thomson Reuters. The aim of the partnership is to support developing countries in more fully exploiting their innovative potential by leveraging valuable information contained in patent documents to develop new solutions to technical problems faced at the local and international levels.

ABOUT THOMSON REUTERS

Thomson Reuters is the world's leading source of intelligent information for businesses and professionals. We combine industry expertise with innovative technology to deliver critical information to leading decision makers in the financial, legal, tax and accounting, scientific, healthcare and media markets, powered by the world's most trusted news organization. With headquarters in New York and major operations in London and Eagan, Minnesota, Thomson Reuters employs more than 50,000 people in 100 countries. For more information, go to thomsonreuters.com.
