PREFACE

A diplomatic conference, to which all the countries members of the Paris Convention for the Protection of Industrial Property were invited and which was held in Locarno (Switzerland), adopted, on October 8, 1968, the Locarno Agreement Establishing an International Classification for Industrial Designs (hereinafter referred to as "the Locarno Agreement" and "the Locarno Classification," respectively). The text of the Locarno Agreement is reprinted in this Volume.

The Locarno Classification comprises:

- (i) a list of classes and subclasses;
- (ii) an alphabetical list of goods in which industrial designs are incorporated, with an indication of the classes and subclasses into which they fall;
- (iii) explanatory notes.

The original list of classes and subclasses was attached to the Locarno Agreement when it was adopted.

The Locarno Agreement set up a Committee of Experts, in which each country party to the Locarno Agreement is represented, and the Agreement empowered the Committee to make "amendments" in or "additions" to the original list of classes and subclasses. It entrusted the Committee to establish the alphabetical list and the [explanatory notes](#) (which were not established in the diplomatic conference), and it empowered the Committee to amend and supplement (make additions to) each and any of the three parts (list of classes and subclasses, alphabetical list of goods, [explanatory notes](#)) of the Locarno Classification.

The Locarno Classification has been revised several times by the Committee of Experts. The present (eighth) edition of the Classification incorporates all the revisions made in and before November 2002.

In this most recent edition, the list of classes and the list of classes and subclasses consist of 32 classes and 223 subclasses. The alphabetical list of goods, which contains 6,831 entries, is presented in two parts: the first part lists all the goods in a single alphabetical list, irrespective of the class to which each of them belongs; the [second part](#) lists, separately for each subclass, in alphabetical order, the goods that belong to that subclass. The [explanatory notes](#) are incorporated in the list of classes and subclasses.

The Locarno Classification is "solely of an administrative character" and does not bind the contracting countries "as regards the nature and protection afforded to the [industrial] design [classified in a certain manner]" (Locarno Agreement, Article 2(1)). The Locarno Agreement requires the industrial property office of each contracting country to "include in the official documents for the deposit or registration of [industrial] designs, and, if they are officially published, in the publications in question, the numbers of the classes and subclasses of the Locarno Classification into which the goods incorporating the [industrial] designs belong" (Article 2(3)). Recommendations of the Committee of Experts deal with the manner in which the classes and subclasses should be indicated in the said documents and publications. These recommendations are reprinted on page(XVI).

On April 15, 2003, the following 41 countries were party to the Locarno Agreement: Austria, Belarus, Bosnia and Herzegovina, Bulgaria, China, Croatia, Cuba, Czech Republic, Democratic People's Republic of Korea, Denmark, Estonia, Finland, France, Germany, Greece, Guinea, Hungary, Iceland, Ireland, Italy, Kazakhstan, Kyrgyzstan, Malawi, Mexico, Mongolia, Netherlands, Norway, Republic of Moldova, Romania, Russian Federation, Serbia and Montenegro, Slovakia, Slovenia, Spain, Sweden, Switzerland, Tajikistan, The former Yugoslav Republic of Macedonia, Trinidad and Tobago, Turkey, Uruguay.

The International Bureau of the World Intellectual Property Organization (Geneva) and the Benelux Designs Office (The Hague) also use the Locarno Classification in their registers and in the publications they issue under the Hague Agreement Concerning the International Deposit of Industrial Designs and the Benelux Designs Convention, respectively.

This (eighth) edition of the Locarno Classification, published in September 2003 in the two authentic versions (English and French), will enter into force on January 1, 2004, and will replace the previous one.

The English and French versions of this (eighth) edition of the Locarno Classification may be ordered from the World Intellectual Property Organization (WIPO), 34, chemin des Colombettes, CH-1211 Geneva 20 (Switzerland).

Geneva, September 2003

RECOMMENDATIONS CONCERNING THE APPLICATION OF THE LOCARNO CLASSIFICATION

The Committee of Experts set up under Article 3 of the Locarno Agreement recommended, at its sessions in September 1971 and March 1993, to the member countries of the Locarno Union that they apply, in their official documents and publications relating to registrations and renewals of industrial designs, the International Classification for Industrial Designs in the following manner:

(a) the class number should be indicated in Arabic figures; the subclass number should also be indicated in Arabic figures and it must always contain two digits; for the subclasses, therefore, the numbers 1 to 9 should be preceded by a 0; the class number should be separated from the subclass number by a dash (for example, Subclass 4 of Class 1 should be indicated as "1-04");

(b) the class and subclass numbers should be preceded by the indication "Cl." (for example, Cl. 1-04);

(c) if the numbers of several classes or subclasses must be indicated for one and the same deposit or registration, the classes should be separated by semicolons and subclasses by commas (for example, Cl. 8-05, 8; 11-01);

(d) the numbers of the classes and subclasses should be preceded by the abbreviation "LOC" and the edition according to which the industrial designs have been classified should be indicated by an Arabic figure in round brackets (for example, LOC (8) Cl. 8-05).

LIST OF CLASSES AND SUBCLASSES, WITH EXPLANATORY NOTES

GENERAL REMARKS

(a) The titles of the classes and subclasses provide a general indication as to the area to which the goods belong. Some goods may be covered by more than one such title, however. It is therefore advisable to consult the Alphabetical List to make sure of the classification of various goods.

(b) Explanatory notes relating to a class are not repeated in the subclasses which they concern. It is therefore advisable to consult them when studying the notes appearing in the subclasses themselves.

(c) In principle, goods are classified first according to their purpose and subsidiarily, if this is possible, according to the object that they represent. This latter classification is optional.

(d) Where there is no special classification provided for goods intended to form part of another product, those goods are placed in the same class and subclass as the product of which they are intended to form part, if they cannot normally be used for another purpose.

(e) Goods, which are multipurpose composite objects are, with the exception of multipurpose composite pieces of furniture, placed in all the classes and subclasses that correspond to each of the intended purposes.

GUIDANCE FOR THE USER

1. The List of Goods is reproduced in alphabetical order and in class order.
2. The List in alphabetical order is printed in two sets of four columns on each page, as follows:
 - the first column:* contains the numbers of the classes and subclasses to which the goods belong;
 - the second column:* contains the serial numbers of the goods in the English version of the Locarno Classification;
 - the third column:* contains the indications of the goods in English;
 - the fourth column:* gives the serial numbers of the goods in the French version of the Locarno Classification.
3. The List in class order is printed in two sets of three columns on each page, preceded by the headings of the classes and subclasses. Here, the order is as follows:
 - the first column:* contains the serial numbers of the goods in the English version of the Locarno Classification;
 - the second column:* contains the indications of the goods in English;
 - the third column:* gives the serial numbers of the goods in the French version of the Locarno Classification.
4. When consulting the Alphabetical List, the following should be noted:
 - (a) In the Alphabetical List, an expression between round brackets may constitute a different indication of the product in question, which in that case also is listed (a so-called cross-reference) in its appropriate place in the Alphabetical List. In other cases, an expression between round brackets may begin with a general term (e.g., apparatus, conducting, machines) under which the product cannot be listed in the Alphabetical List. The text preceding the round brackets is considered the most important part of the indication of the product in question, and is replaced within the brackets by "–".
 - (b) In the Alphabetical List, an expression between square brackets is in most cases intended to define more precisely the text preceding the brackets, since the said text is ambiguous or too vague for classification purposes.
