## QUESTIONNAIRE ON ARTIFICIAL INTELLIGENCE POLICIES

### BACKGROUND

Artificial Intelligence (AI) has become a strategic priority for many governments across the globe. In addition, data are a critical component of AI since AI applications rely upon machine learning techniques that use data for training and validation.

As well as AI capacity building, education and regulatory measures, there is a question whether the established intellectual property (IP) system should be modified to in response to AI developments. WIPO has been requested by Member States to provide a forum for discussion of AI and IP Policy, which also includes data. WIPO has therefore started an open conversation on AI/data and IP, including a draft issues paper<sup>1</sup>, and is planning to continue the conversation in Geneva on May 11-12, 2020.

### REQUEST FOR INFORMATION

In order to aid this discussion, WIPO is seeking to collate country/regional information regarding strategies, frameworks and legislation of relevance to AI/data and IP.

This questionnaire aims at taking stock of the different national and regional landscapes of legislation and instruments applicable to AI/data and IP.

A summary of the answers provided in this questionnaire will be used to create a publically available resource to facilitate information sharing. Personal information provided, such as contact details of individual persons, will not be made publically available but may be used solely by the Division of AI Policy to share the results of the questionnaire and to gather further information in the future.

Please send the completed questionnaire, including null responses, to [ai2ip@wipo.int](mailto:ai2ip@wipo.int).
