

Singapore ranking in the Global Innovation Index 2024

Singapore ranks 4th among the 133 economies featured in the GII 2024.

The Global Innovation Index (GII) ranks world economies according to their innovation capabilities. Consisting of roughly 80 indicators, grouped into innovation inputs and outputs, the GII aims to capture the multi-dimensional facets of innovation.

Singapore ranks 4th among the 51 high-income group economies.

Singapore ranks 1st among the 17 economies in South East Asia, East Asia, and Oceania.

> Singapore GII Ranking (2020-2024)

The table shows the rankings of Singapore over the past four years. Data availability and changes to the GII model framework influence year-on-year comparisons of the GII rankings. The statistical confidence interval for the ranking of Singapore in the GII 2024 is between ranks 3 and 8.

Year	GII Position	Innovation Inputs	Innovation Outputs
2020	8th	1st	15th
2021	8th	1st	13th
2022	7th	1st	14th
2023	5th	1st	12th
2024	4th	1st	11th

Singapore performs worse in innovation outputs than innovation inputs in 2024.

This year Singapore ranks 1st in innovation inputs. This position is the same as last year.

Singapore ranks 11th in innovation outputs. This position is higher than last year.

Singapore has 1 cluster in the top 100 S&T clusters of the Global Innovation Index.

> Global Innovation Tracker

The Global Innovation Tracker 2024 shows what is the current state of innovation in Singapore, how rapidly is technology being embraced and what are the resulting societal impacts.

For Singapore, 3 indicators have improved in the short-term and 7 indicators have worsened.

Science and innovation investment

Scientific publications	R&D investments	Venture capital		International patent filings
		Deal numbers	Deal values	
▼-5.4%	▲ 10.3%	▼ -16.9%	▼ -36.1%	▼-5.1%
2022 - 2023	2019 - 2020	2022 - 2023	2022 - 2023	2022 - 2023
▲ 3.2%	▲ 4.3%	▲ 30.9%	▲ 17.3%	▲ 7.6%

▼ -2.4% 2022 - 2023	▼ -0.2% 2021 - 2022	▲ 1.8°C 2023
▲ 2.2% 2013 - 2023	▲ 0.1% 2012 - 2022	n/a
191,807 USD in 2023	82.9 years in 2022	

Notes: Not all indicators of the Global Innovation Tracker are used to calculate the Global Innovation Index. Long-term annual growth refers to the compound annual growth rate (CAGR) over the indicated period. For each variable, a one-year growth rate is set for the short run, and ten-year CAGR is set for the long run; time windows might differ when gaps exist in data availability. The end period corresponds to the most recent available observation, which may differ among countries. Temperature change is an exception: it indicates the change in degrees Celsius with respect to the average temperature in the country from 1951–1980. Figures are rounded.

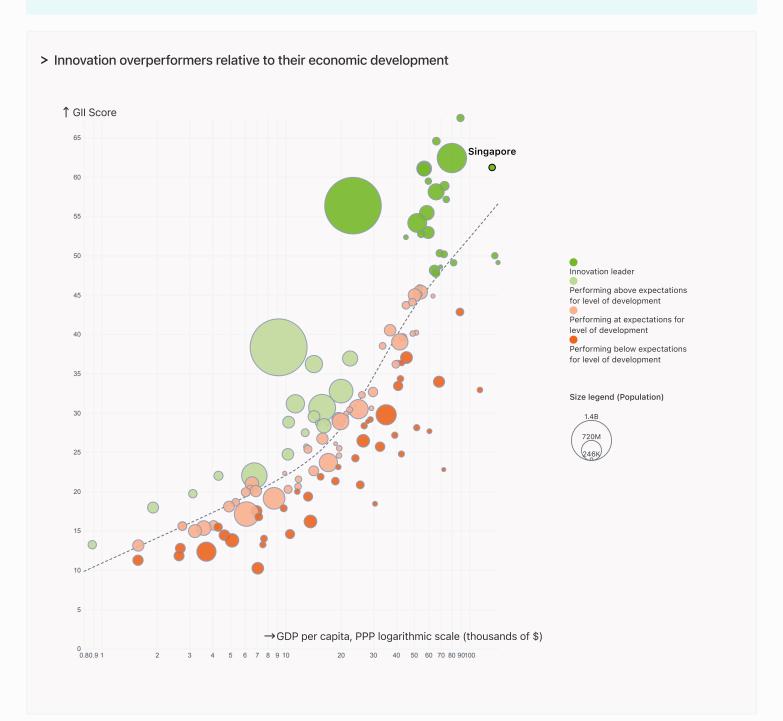

Expected vs. observed innovation performance

The bubble chart below shows the relationship between income levels (GDP per capita) and innovation performance (GII score). The trend line gives an indication of the expected innovation performance according to income level. Economies appearing above the trend line are performing better than expected and those below are performing below expectations.

Singapore is an innovation leader, ranking in the top 25 of the GII.

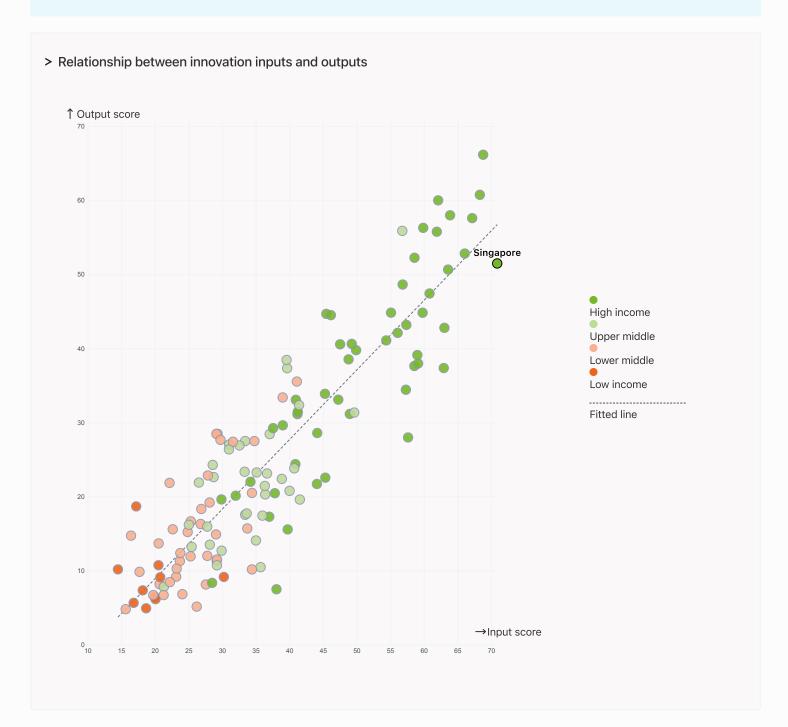

Effectively translating innovation investments into innovation outputs

The chart below shows the relationship between innovation inputs and innovation outputs. Economies above the line are effectively translating costly innovation investments into more and higher-quality outputs.

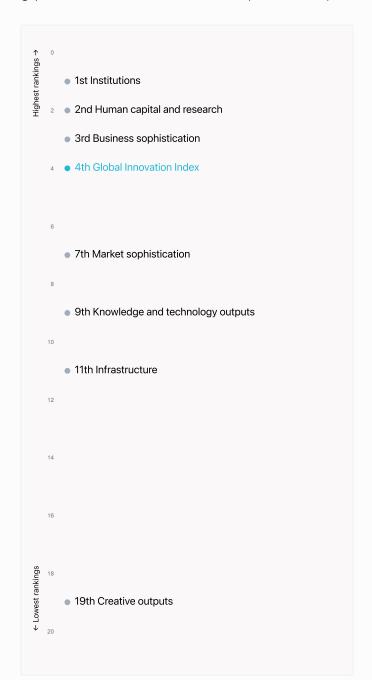

Singapore produces less innovation outputs relative to its level of innovation investments.

Overview of Singapore's rankings in the seven areas of the GII in 2024

The chart shows the ranking for each of the seven areas that the GII comprises. The strongest areas for Singapore are those that rank above the GII (shown in blue) and the weakest are those that rank below.

Highest rankings

Singapore ranks highest in Institutions (1st), Human capital and research (2nd) and Business sophistication (3rd).

Lowest rankings

Singapore ranks lowest in Creative outputs (19th), Infrastructure (11th) and Knowledge and technology outputs (9th).

The full WIPO Intellectual Property

Statistics profile for Singapore can be found on this link.

Benchmark of Singapore against other economy groupings for each of the seven areas of the GII Index

The charts shows the relative position of Singapore (blue bar) against other economy groupings (grey bars), for each of the seven areas of the GII Index.

High-Income economies

Singapore performs above the high-income group average in all

South East Asia, East Asia, And Oceania

Infrastructure

Singapore performs above the regional average in all pillars.

Singapore's innovation system

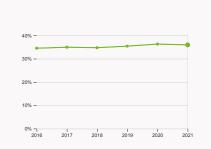

As far as practicable, the plots below present unscaled indicator data.

> Innovation inputs in Singapore

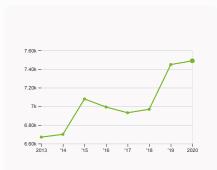

2.1.1 Expenditure on education

was equal to 2.39 % GDP in 2022, down by 0.44 percentage points from the year prior – and equivalent to an indicator rank of 116.

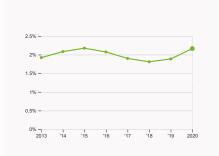

2.2.2 Graduates in science and engineering

was equal to 35.94 % of total graduates in 2021, down by 0.33 percentage points from the year prior – and equivalent to an indicator rank of 5.

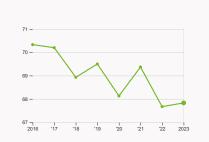

2.3.1 Researchers

was equal to 7488.43 FTE per million population in 2020, up by 0.54% from the year prior – and equivalent to an indicator rank of 5.

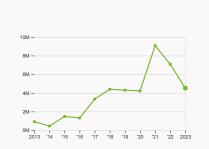

2.3.2 Gross expenditure on R&D

was equal to 2.16 % GDP in 2020, up by 0.28 percentage points from the year prior – and equivalent to an indicator rank of 17.

2.3.4 QS university ranking

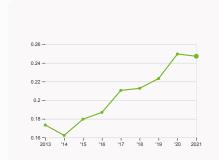

was equal to an average score of 67.83 for the top three universities in 2023, up by 0.24% from the year prior – and equivalent to an indicator rank of 13.

4.2.4 VC received, value

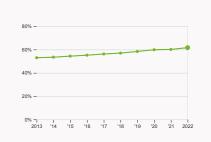

was equal to 4.52 million USD in 2023, down by 36.16% from the year prior – and equivalent to an indicator rank of 1.

4.3.2 Domestic industry diversification

was equal to an index score of 0.25 in 2021, down by 0.97% from the year prior – and equivalent to an indicator rank of 93.

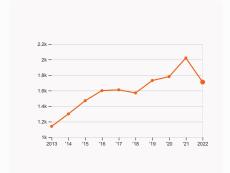

5.1.1 Knowledge-intensive employment

was equal to 61.69 % in 2022, up by 1.57 percentage points from the year prior – and equivalent to an indicator rank of 2.

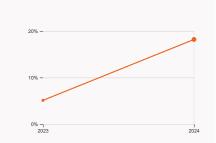

> Innovation outputs in Singapore

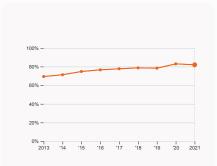

6.1.1 Patents by origin

was equal to 1.71 thousand patents in 2022, down by 15.35% from the year prior – and equivalent to an indicator rank of 27.

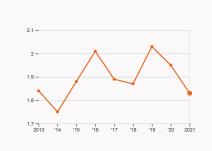

6.2.2 Unicorn valuation

was equal to 18.18 % GDP in 2024, up by 13.06 percentage points from the year prior – and equivalent to an indicator rank of 1.

6.2.4 High-tech manufacturing

was equal to 81.95 % of total manufacturing output in 2021, down by 1.04 percentage points from the year prior – and equivalent to an indicator rank of 1.

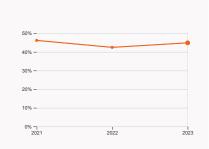

6.3.2 Production and export complexity

was equal to a score of 1.83 in 2021, down by 6.15% from the year prior – and equivalent to an indicator rank of 5.

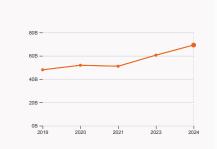

6.3.3 High-tech exports

was equal to 218.74 billion USD in 2022, up by 9.22% from the year prior – and equivalent to an indicator rank of 1.

7.1.1 Intangible asset intensity

was equal to 44.86 % for the top 15 companies in 2023, up by 2.42 percentage points from the year prior – and equivalent to an indicator rank of 54.

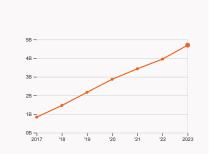

7.1.3 Global brand value

was equal to 69.26 billion USD for the brands in the top 5,000 in 2024, up by 14.35% from the year prior – and equivalent to an indicator rank of 11.

7.2.2 National feature films

was equal to 8 films in 2022, up by 100% from the year prior – and equivalent to an indicator rank of 59.

7.3.3 Mobile app creation

was equal to 4.7 billion global downloads of mobile apps in 2023, up by 18.99% from the year prior – and equivalent to an indicator rank of 5.

Top science and technology clusters in Singapore

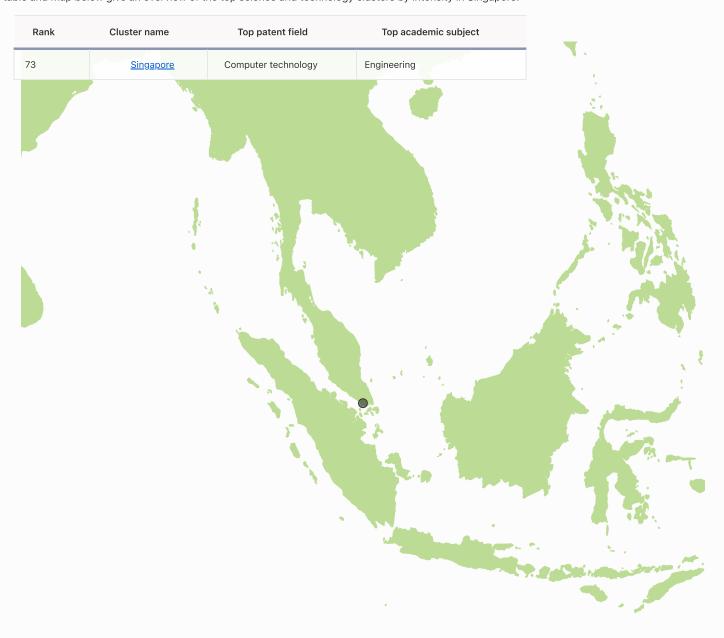

Singapore has 1 cluster in the top 100 S&T clusters of the Global Innovation Index, the same number as in 2023.

The table and map below give an overview of the top science and technology clusters in Singapore.

Rank	Cluster name	Top patent field	Top academic subject	
33	Singapore	Computer technology	Engineering	

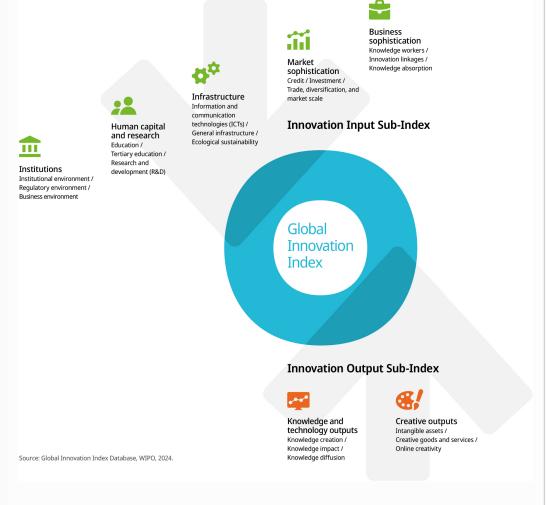

The table and map below give an overview of the top science and technology clusters by intensity in Singapore.

About the Global Innovation Index

- The Global Innovation Index (GII) is published by the World Intellectual Property Organization (WIPO), a specialized agency of the United Nations.
- Recognizing that innovation is a key driver of economic development, the GII aims to provide an innovation ranking and rich analysis referencing around 130 economies. Over the last decade, the GII has established itself as both a leading reference on innovation and a "tool for action" for economies that incorporate the GII into their innovation agendas.

The Index is a ranking of the innovation capabilities and results of world economies. It measures innovation based on criteria that include institutions, human capital and research, infrastructure, credit, investment, linkages; the creation, absorption and diffusion of knowledge; and creative outputs.

The GII has two sub-indices: the Innovation Input Sub-Index and the Innovation Output Sub-Index, and seven pillars, each consisting of three sub-pillars.
