COPYRIGHTANDRELATEDRIGHTSINTHECONTEXTOFTHEINTERNET

PreparedbyDr.MihályFicsor,Director,
CenterforInformationTechnologyandIntellectualProperty(CITIP),Bu dapest

I. INTRODUCTION

- 1. The protection of copyright and related rights has a special role in electronic commerce.
- 2. Electroniccommerceiscategorizedindifferentways, suchas B2B (business to business), B2C (business to consumer), P2P (peer to peer), etc. It seems, however, that the most substantive categorization may be made between indirect electronic commerce and direct electronic commerce.
- 3. Inthecaseofindirectelectroniccommerce, manyactivities takeplace throug hthe Internet, such as offering products, advertizing, concluding contracts, transfering payments, etc., but the products themselves are not transferred through the digital network, they are rather are delivered traditionally in the "real world", and ift hey are to be delivered to another country, they have to cross national borders with the possibility of border control.
- 4. Directelectroniccommercediffersfromindirectelectroniccommerceinadecisive aspect. In the case of it, the same activities may take place through the network, but also the products themselves are transmitted through the Internet! For this, those products must be transformed into digital —binary—impulses ("zeros" and "ones"), since only such impulses may be transmitted int his way. The majority of works protected by copyright (texts, graphic works, photographic works, musical works, audiovisual works, etc.) and objects of related rights (performances, phonograms, broadcasts) may be transformed in this manner, and, thus, may be transmitted through the Net.
- 5. Worksandobjectsofrelatedrightsbecomeverymuchvulnerabletoinfringingand piraticalactivitieswhentheyareincludedin,andtransmittedthrough,interactivedigital networks. This and the questions relating to the legal characterization of the acts involved raised serious challenges to copyright and related rights. The sechallenges have been responded by the two WIPO "Internet treaties".
- II. THEDEVELOPMENTOFTHEINTERNATIONALNORMSONCOPYR IGHT ANDRELATEDRIGHTSAFTERTHEADOPTIONOFTHE1971PARISACTOF THEBERNECONVENTION;THEADOPTIONOFTHEWIPO"INTERNET TREATIES"
- 6. Afteritsadoptionin1886,theBerneConventionwasrevisedquiteregularly,moreor lessevery20 thyear,untilt he"twinrevisions"whichtookplaceinStockholmin1967andin Parisin1971.Therevisionconferenceswereconvened,ingeneral,inordertofindresponses tonewtechnologicaldevelopments(suchasphonography,photography,radio, cinematography,tele vision).Inthefieldofrelatedrights,theRomeConventioncontainsthe basicinternationalnorms.Itwasadoptedin1961,andhasnotbeenrevisedyet.
- 7. Inthe 1970s and 1980s, agreat number of important new technological developments took place (reprography, videotechnology, compact cassette systems facilitating "home taping," satellite broadcasting, cable television, the increase of the importance of computer programs, computer -generated works and electronic databases, etc.). For a while, the international copyright community followed the strategy of "guided development," through adopting mere recommendations, guiding principles and model provisions, rather than trying to establish new international norms.

- 8. Therecommendations, guidingpri nciples and model provisions worked out by the various WIPO bodies of feredguidance to government show to respond to the challenges of new technologies. They were based, in general, on the interpretation of the existing international norms (for example, concerning computer programs, databases, "hometaping," satellite broadcasting, cable television); but they also included some new standards (for example, concerning distribution and rental of copies).
- 9. Theguidancethusofferedinthesaid"guidedde velopment" periodhadquiteimportant impactonnationallegislation, and contributed to the development of copyright allover the world. However, at the end of the 1980s, it was recognized that mereguidance would not be sufficient anymore; new binding international norms became in dispensable.
- 10. The preparation of new norms started in two forums. At GATT, in the framework of the Uruguay Roundnegotiations, and at WIPO, first, in one committee of experts and, later, in two parallel committees of experts.
- The preparatory work in the WIPO committees was slowed down, since the governmentsconcernedwantedtoavoidanyundesirableinterferencewiththemuchmore complexnegotiationsonthetrade -related aspects of intellectual property rights (TR IPS) within the Uruguay Round. After the adoption of the TRIPS Agreement, an ewsituationemerged. The TRIPS Agreement included certain results of the period of "guided development,"butitdidnotrespondtoallchallengesofnewtechnologies, and, wher easit. ifproperlyinterpreted, has broad application to many of the issues raised by the spectacular growthoftheuseofdigitaltechnology,particularlythroughtheInternet,itdoesnot specifically address some of those issues. The preparatory work ofthenewcopyrightand relatedrightsnormsintheWIPOcommitteeswas,therefore,accelerated,andthatledtothe relatively quick convocation of the WIPO Diplomatic Conference on Certain Copyright and the convocation of the WIPO Diplomatic Conference on Certain Copyright and the convocation of the WIPO Diplomatic Conference on Certain Copyright and the convocation of the WIPO Diplomatic Conference on Certain Copyright and the convocation of the WIPO Diplomatic Conference on Certain Copyright and the convocation of the WIPO Diplomatic Conference on Certain Copyright and the convocation of the WIPO Diplomatic Conference on Certain Copyright and the convocation of the WIPO Diplomatic Conference on Certain Copyright and the convocation of the WIPO Diplomatic Conference on Certain Copyright and the convocation of the Copyright and the Copyright and Copyright andNeighboringRightsQuestions,whichtookplacein GenevafromDecember2to20,1996.
- 12. The Diplomatic Conference adopted two treaties: the WIPO Copyright Treaty (WCT) and the WIPO Performances and Phonograms Treaty (WPPT). The international press, which followed the Diplomatic Conference with great tention, frequently referred to those treaties simply as "Internet treaties". In a way, such are ference was quite justified. Although the treaties, as discussed below, contain also certain other provisions, their importance is mainly due to those provisions which of ferresponses to the challenges posed by digital technology.
- 13. ThefirstsentenceofArticle1(1)oftheWCTprovidesthat"[t]hisTreatyisaspecial agreementwithinthemeaningofArticle20oftheBerneConventionfortheProtect ionof LiteraryandArtisticWorks,asregardsContractingPartiesthatarecountriesoftheUnion establishedbythatConvention."Article20oftheBerneConventioncontainsthefollowing provision:"TheGovernmentsofthecountriesoftheUnionreserve therighttoenterinto specialagreementsamongthemselves,insofarassuchagreementsgranttoauthorsmore extensiverightsthanthosegrantedbytheConvention,orcontainotherprovisionsnot contrarytothisConvention."Therefore,theabove -quotedprovisionofArticle1(1)ofthe WCThasaspecificimportancefortheinterpretationoftheTreaty.Itmakesitobviousthat nointerpretationoftheWCTisacceptablewhichmightresultinanydecreaseofthelevelof protectiongrantedbytheBerne Convention.

- 14. Article1(4)oftheWCTestablishesafurtherguaranteeforthefullestpossiblerespectof theBerneConvention,sinceitincludes,byreference,allsubstantiveprovisionsoftheBerne Conventioninprovidingthat "ContractingParties shallcomplywithArticles1to21andthe AppendixoftheBerneConvention." Article1(3) clarifiesthat, inthis context, theBerne Conventionmeansthe1971ParisActoftheConvention. These provisions should be considered in the light of the provisi onsof Article17 of the Treaty, referred to below, under which not only countries party to the 1971ParisAct, and, in general, not only countries party to any act of the BerneConvention, but also any member countries of WIPO, irrespective of whether or not they are party to the Convention, and also certain intergovernmental organizations, may adhere to the Treaty.
- Article1(2)containsasafeguardclausesimilartotheoneincludedinArticle 2.2ofthe TRIPSAgreement: "Nothinginthis Treatysh allderogatefromexistingobligationsthat Contracting Parties have to each other under the Berne Convention for the Protection of the ProtectiLiterary and Artistic Works. ``The scope of this safeguard clause differs from the one and the contraction of the contractionincluded in the TRIPS Agreement. The latterhasimportancealsofromtheviewpointof at least one article of the Berne Convention which contains substantive provisionsArticle 6bisonmoralrights –sincetheTRIPSAgreementconfersnorightsorobligationsin respectofthatarticle. Ontheotherhand, Article 1(2)oftheWCTonlyhasrelevancefrom theviewpointofArticle 22to 38oftheBerneConventioncontainingadministrative provisions and final clauses which are not included by reference (either in the WCT or in the provisions and final clauses which are not included by reference (either in the WCT or in the provisions and final clauses which are not included by reference (either in the WCT or in the provisions and final clauses which are not included by reference (either in the WCT or in the provisions and final clauses which are not included by reference (either in the WCT or in the provisions and final clauses which are not included by reference (either in the WCT or in the provisions and final clauses which are not included by reference (either in the WCT or in the provisions and final clauses which are not included by reference (either in the WCT or in the provisions and the provisions are not included by reference (either in the WCT or in the provisions are not included by reference (either in the WCT or in the provisions are not included by reference (either in the WCT or in the provisions are not included by reference (either in the WCT or in the provision by the provision are not included by reference (either in the WCT or in the provision by the provisTRIPSAgr eement) and only to the extent that those provisions provide for obligations of the ContractingParties.
- TheWCTcontainsnowthemostup -to-dateinternational copyright norms since, in additiontotheobligationtoapplythesubstantivenormsofth eBerneConvention,it(i)also includes-notbyreferencebutbyreproducingtherelevantnorms with some wording changes-thesubstantivecopyrightnormsoftheTRIPSAgreementwhichmaybeconsidered clarificationorextensionoftheprotectiongrantedby theBerneConvention(namely,the same clarification as in the TRIPS Agreement concerning the protection of computer programs and databases, and there cognition of a right of rental for the same categories of worksandunderthesameconditionsasinthe TRIPSAgreement);(ii)providesforcertain newelementsofcopyrightprotectionnotnecessarilyrelatedtotheso -called"digitalagenda" (namely, the explicit recognition of a right of distribution of copies in respect of all categories ofworks – which u nderthe Berne Convention is only provided explicitly for cinematographic works-leavingtheissueofexhaustionofthisrighttonationallegislation, and assimilating the termofprotectionofphotographicworkstothetermofotherworks);and(iii)off appropriate response to the challenges of digital technology and particularly the Internet by clarifyingtheapplicationoftheexistingnormsoftheBerneConvention,andbyadaptingthe international system of copyright protection, where necessary, t otheconditionsand requirements of the digital environment.
- 17. Whenthepreparatoryworkstartedin1990 -91,onlyonesingletreatywasforeseen whichwastentativelycalledaprotocoltotheBerneConventionandwhichbecamelaterthe WCT.Accordin gtothetermsofreference,thattreatywastoalsocovertheprotectionof soundrecordingsandthusserveasa"bridge"betweenthevariouslegalsystems. Thatwas notacceptabletothosecountrieswhichfeelstronglyabouttheneedtoseparatecopyrig htand relatedrights. Thus, as Evewas born from aribof Adam, as eparate project was born under the (unofficial) name of "a New Instrument" to cover the rightsof producers of phonograms and, along with those rights, also the rightsof performers.

- Therelationshipbetweenthis "NewInstrument" -thatis,theWPPT -andtheRome ConventionhasbeenregulatedinawaysimilartotherelationshipbetweentheTRIPS AgreementandtheRomeConvention.Thismeansthat(i)ingeneral,theapplicationo fthe substantiveprovisionsoftheRomeConventionisnotanobligationoftheContactingParties; (ii)onlyasmallnumberofprovisionsoftheRomeConventionisincludedbyreference (Article3(2)and(3)onthecriteria of eligibility for protection); and(iii)Article1(2)ofthe Treatycontains, *mutatismutandis*, practicallythesameprovisionsasArticle2.2oftheTRIPS Agreement:itprovidesthatnothingintheTreatyderogatesfromobligationsthatContracting Partieshavetoeachotherunderthe RomeConvention.Thelevelofprotectionprovidedby the WPPT, in general, corresponds to the level of protection under the Rome Convention and theTRIPSAgreement; however (i) it does not extend to the rights of broadcasting organizations;(ii)asfara stherightsofperformersareconcerned,itonlyextendstotheaural aspectsofperformances and their fixations (on sound recordings); and (iii) it also contains pluselementsinrespectofthoseprovisionswhichhavebeenworkedoutonthebasisofth e so-called "digital agenda" of the preparatory work and the Diplomatic Conference.
- 19. Inthefollowingparts,the "digitalagenda" concerning both the WCT and the WPPT and the solutions chosen by the Diplomatic Conference are dealt with. This includes four majorissues: (i) the application of the right of reproduction in the digital environment; (ii) the right or right sapplicable for digital interactive transmissions; (iii) exceptions and limitations in the digital environment; and (iv) obligations concerning technological measures of protection and rights management information.

III. THE"DIGITALAGENDA":APPLICATIONOFTHERIGHTOFREPRODUCTION INTHEDIGITALENVIRONMENT

- 20. InthetextsoftheWCTandtheWPPTasadopted, this is notth ecase anymore, but their drafts contained provision stoclarify the scope of application of the right of reproduction. Those draft provision sturned out to be the most controversial ones, and an extremely great amount of time was spent on the discussion of them.
- 21. Theissuescoveredinthosedraftprovisionsmainlyrelatedtothefactthat,during transmissionsthroughdigitalnetworks,aseriesofreproductionstakeplaceandthattheon demanduseofworksandobjectsofrelatedrights(even"bro wsing")involvesthemakingof atleasttemporarycopiesinthereceivingcomputers.
- 22. Article7(1)ofthedraftoftheWCTincludedthefollowingclarification:"The exclusiverightaccordedtoauthorsofliteraryandartisticworksinArticle9(1) oftheBerne Conventionofauthorizingthereproductionoftheirworksshallincludedirectandindirect reproductionoftheirworks, whether permanentor temporary, in anyman neror form." Paragraph(2)ofthesamearticle, subject to the relevant general provisions on exceptions and limitations, provided for the possibility of specific exceptions or limitations "in cases wherea temporary reproduction has the sole purpose of making the work perceptible or where the reproduction is of a transientorincide ntal nature, provided that such reproduction takes place in the course of use of the work that is authorized by the author or permitted by law." Article 7 of the draft of the WPPT contained, mutatismutandis, the same provisions.

- 23. Thefactthatthes torageofworksinanelectronicmemoryisanactofreproductionhad beenrecognized –andhadneverbeenquestioned–foralongtime.Itwasasearlyasin June 1982thattheSecondWIPO/UNESCOCommitteeofGovernmentalExpertson CopyrightProblemsAr isingfromtheUseofComputersforAccesstoortheCreationof Worksclarifiedthisaspartofasetofrecommendations.Therelevantrecommendationreads asfollows:"Storageinandretrievalfromcomputersystems(inputandoutput)ofprotected worksmay,asthecasemaybe,involveatleastthefollowingrightsofauthorsprovidedforin eitherinternationalconventionsornationallegislationoncopyrightorboth:...(b) therightto reproduceanyworkinvolved..."(see"Copyright"(WIPO'smonthly review,September 1982,pp.244- 245).
- 24. Thequestionswhichemergedinrespectofthescopeofreproductioninadigital environmentdidnot,infact,concernstorageinelectronicformingeneral,butonlycertain kindsofstorage,namelythoset ransientandincidentalformsoftemporaryreproductions whichwerementionedinparagraph (2)ofArticle7ofbothdrafttreaties.Itwasbelievedby somedelegationsthatsuchreproductionsshouldnotbecoveredbytheoperationoftheright ofreproduction.
- TheDiplomaticConferencedidnotadopttheproposedArticles 7.Therewere delegationswhichsupportedthoseprovisions(infact,therewaswidespreadsupportfor paragraph (1), and the broad consensus only fell a part on the issue of limit a tionsand exceptionsaddressedbyparagraphs (2)). Therewere someothers which were infavour of excluding transient and incidental reproductions from the concept of reproduction (which wouldhavebeeninahead -oncrashwithArticle9(1)oftheBerneCo nvention), and there were also some delegations which, in principle, would have been ready to accept the above mentioned provisions, with the important difference, however, that the application of the exceptions and limitations mentioned in paragraph (2) o ftheArticleshouldnotbeonlya possibilitylefttoContractingStates,butthatitshouldratherbeanobligationofContracting States. Finally, the Diplomatic Conference was unable to reach agreement on those provisionsandtheArticlewasleftout fromthetextoftheTreaty.Thus,thepositionofthose delegationsprevailedwhichwereoftheviewthatthegeneralprovisionsofArticle9are sufficientandnospecificprovisionsareneeded.
- 26. Atthesametime,theDiplomaticConferenceadopt edagreedstatementswhich,in respectoftheWCT,readsasfollows:"Thereproductionright,assetoutinArticle9ofthe BerneConvention,andtheexceptionspermittedthereunder,fullyapplyinthedigital environment,inparticulartotheuseofwor ksindigitalform.Itisunderstoodthatthestorage ofaprotectedworkindigitalforminanelectronicmediumconstitutesareproductionwithin themeaningofArticle9oftheBerneConvention."A mutatismutandis versionofthisagreed statementwas alsoadoptedconcerningtherelevantprovisionsoftheWPPT.
- 27. Thefirstsentenceofeachoftheseagreedstatementswasadoptedbyconsensus, and it states the obvious: reproduction, under Article 9(1) of the Berne Convention (the application of which is an obligation following Article 1(4) of the WCT) extends to reproduction "in any manner of form"; therefore, it is not allowed to exclude a reproduction from the concept of reproduction just because it is indigital form, through storage in an elect ronic memory, or just because it is of a temporary nature. At the same time, it also follows from the first sentence of the agreed statement that Article 9(2) of the Berne Convention and Article 16 of the WPPT (on limitations and exceptions) are fully applicable, and this offers an appropriate basis to introduce exceptions in certain cases of transient and incidental reproductions in national

legislation,inharmonywiththe"three -steptest"providedforinthoseprovisions(ortosettle theissue, even withoutanyspecificstatutoryprovisions, on the basis of existing legal institutions such as fair use, fair dealings, the *deminimis* principle or the concept of implied licenses).

28. Thesecondsentenceofeachoftheagreedstatementswasnotadopte dunanimously(but byamajorityofthevotes, whichwasfarmuchlargerthanthetwo -thirdmajorityrequiredfor theadoptionofthetextoftheTreatyitself). The validity of what is included in that sentence, for the reasons explained above, could ha rdly bequestioned. Storage of works and objects of related rights is reproduction; the reseemed to be noneed to state this in agreed statements. In fact, even during the preparatory work and the preceding debates at the Diplomatic Conference, this was not an issue; what was only an issue was the legal status of certain temporary, transient act of storage (reproduction) taking place when works and objects of related rights are transmitted through a digital network (as discussed above).

IV. THE"DIGIT ALAGENDA":THERIGHTORRIGHTSAPPLICABLEFOR TRANSMISSIONSINDIGITALNETWORKS

- 29. Duringthepreparatoryworkofthetreaties,itwasagreedthatthetransmissionofworks ontheInternetandinsimilarnetworksshouldbesubjecttoanexclusiverigh tofauthorization ofauthors; with appropriate exceptions, of course.
- 30. Therewas,however,noagreementonwhichrightshouldbechosenofthetwomain candidates:therightofcommunicationtothepublicandtherightofdistribution. Theneed fortheapplicationofoneorbothofthoserightshademergedbecause, althoughitwas recognized that reproduction stake place throughout any transmission sindigital networks, the application of the right of reproductional one did not seem to be suffice in the Itwould not reflect which acts are truly relevant; it would not correspond to the extremely dynamic nature of the Internet -type networks, and, further more, it alone would not offersatis factory and readily enforceable basis for liability of those who make available works to the public in such networks.
- 31. "Makingavailableworksorobjectsofrelatedrightstothepublicinaninteractive electronicnetwork." This seems to be amore or less precise description of the act or series of acts which should be covered by appropriate rights. Thus, the idea might have emerged to simply recognize such a right to cover such acts. Why not, one might have said. We were not, however, completely free here. We did not actina tabular as a situation. We could not getrid of the categories, rights and exceptions included in existing treaties and laws. We could not forget that, on the existing categories, rights and exceptions, well—established practices were based, that, on the basis of them, long—term contractual relations had been formed, and so on. Thus, it was quite normal that, both at national level and at the level of international norms, there was quite ageneral wish to try and apply existing norms to this new phenomenon.
- 32. Inthisrespect ,wehadtofacetherealitythat,attheleveloftheexistinginternational norms,therewasnosuchbroadeconomicrightsasthe"righttomakeavailabletothepublic." (Itisanothermatterthattheconceptexistedinadifferentcontext;seethero leofthe(first) makingavailableofaworktothepublicinthecalculationofthetermofprotectionofcertain

worksunderArticle7(2)and(3)oftheBerneConvention.Anditwasstillanothermatterthat somenationallawsprovideforsuchbroadrig hts.)

- 33. Attheinternationallevel, and under the majority of national laws, the acts of making available awork or an object of related right to the publicare covered by two separate groups of rights: copy -related rights and non -copy-related rights.
- 34. Copy-related rights (such as the right of distribution, the right of rental or the right of public lending (where recognized)) coveracts by means of which copies are made available to the public; typically for "deferred" use, since the act of making available and the perception (studying, watching, listening to) of the signs, images and sound sin which a work is expressed or a sound recording (that is, the actual "use") by the members of the public differint ime.
- 35. Non-copy-relatedrights (suchastherightofpublicperformance,therightof broadcasting,therightofcommunicationtothepublicbywire),ontheotherhand,coveracts throughwhichworksorobjectsofrelatedrightsaremadeavailablefordirect —thatisnot "deferred"—use(perceiving,studying,watching,listeningto)bythemembersofthepublic.
- 36. Digitaltransmissionsscramblethebeautifullyarranged,dogmaticallyduly characterizedandjustifiedpictureofthesetwofamiliesofrights. Theyscrambleitintwo ways.
- First, its eemsthat the commercial dissemination of protected material in digital networkswilltakeplacewiththeapplicationoftechnologicalmeasureswhichwillallow accessonlyifcertainconditions are met by the members of the public. Itisforeseenthat,for example, so -called "softwareenvelopes" will be used. Such an electronic "envelope" containscertaininformationfreelyavailabletothepublic, withouttechnological protection, suchasencryption(hence,itssimilaritytotradit ionalenvelopesonwhichsomeinformation appears but the contents of the letter is only available to the person who has the right to open it). The information identifies the material and the owner of the rights, and indicates the licensing conditions. First, of course, a member of the public who would like to get access to thematerialshouldgivehissubscriptionnumberor, in open systems, for example, his credit cardnumber. Then hem ay study them enu of possible uses indicated on the "envelope." He maylearnthat, for browsing, at least to a certain extent, he does not have to pay anything or, perhaps, he has to payamini mum service charge; that, for being able to further study the material,towatchstillormovingimagesortolistentomusicor othersoundsincludedinthe material, hehastopayacertainamountofmoney; that, for downloading the material on a more permanent basis, he has to pay more. Thus, the actual extent of the use is not determinedatthemomentofmakingavailable(upl oading)andisnotdeterminedbythe personorentityalonewhoorwhichcarriesouttheactofmakingavailable,itisthegiven memberofthepublic, who, through his "virtual negotiation" with the system, determines the extentofuse, and whether theus ewillbe"deferred"(throughobtainingamorethantransient copy)ordirect(suchason -linestudyingadatabase,on -linewatchingmovingimages,on -line listeningtomusic).
- 38. Second, with digital transmissions, some hybrid forms of "making availab le" emerge which do not respect the pre established border between copy related and non copy-related rights. It is sufficient to refer to the fact that also on lineuses in such digital systems do involve-as an indispensable step obtaining, at least, temporary copies.

- 39. Itis,therefore,notasurprise,that,whenthestudystartedonthequestionofwhich existingrightsmightbeappliedtocoverdigitaltransmissions,thevariouscountriesdidnot findthemselvesnecessarilyonthesamesideof thecopy-relatedrights/noncopy-relatedrights border.Twomajortrendsemerged:onetryingtobasethesolutionontherightof distributionandtheotheronepreferringsomegeneralcommunicationtothepublicright.The UnitedStatesofAmericasee medtofavourthefirstoption,while,forexample,theEuropean Community(afterabriefadventurewiththeideatoapplytherightofrental)appearedto preferthelatter.
- 40. Itisnotbychancewhythisorthatcountryfavoursthisorthatsolution . Theresponses verymuchdependontheexistingnationallaws(whichrights,andtowhatextent,exist),on thepracticesestablished,thepositionsobtainedonthebasisofthoselaws,and,asa consequence,ontherelatednationalinterestsinvolved.
- 41. Whenitbecameclearthattheinternational copyright community was faced with two basic options the application of the right of distribution or the application of the right of communication to the public and, of course, also with the further possibility of combining these options somehow, it was soon recognized that the adoption of those options was not so easy, and certainly not something which would only require a simple decision and then the rest would be arranged automatically.
- First, the present concepts of distribution and communication to the public may not be 42. applieddirectlywithoutsomeimportantclarification. Asfarasdistributionisconcerned, in manycountries, its concept closely relates to the transfer of property and/or tangiblecopies. Thus, if the right of distribution is applied, it should be accepted and clarified $that \emph{distribution} through reproduction through transmission$ -thatis, making available copies bymakingsuchcopies, throughtransmissiono felectronic signals, in the receiving computers and/orbytheirterminals(suchasprinters) -isalsocovered by the concept of distribution. Similar clarifications are needed in respect of the concept of communication to the public. Firstofall, its houldbeaccepted and clarified that this concept extends not only to the acts thatarecarriedoutbythe"communicators"themselves(thatis,totheactsasaresultof whichaworkanobjectofrelatedrightis,infact,madeavailabletothepublicand the members of the public do not have to do more than, for example, to switch on a equipment necessaryforreception), but also to the acts which only consist of making the work accessible tothepublic, and in the case of which the members of the public stillhaveto causethesystem tomakeitactuallyavailable tothem.Furtherclarificationwasneededinrespectofthenotion ofthe "public," more precisely in respect of what is to be considered to be made available (accessible)"tothepublic."Ith adtobemadeclearthaton -demand"transmissions"arealso covered.
- 43. Second, as far as the international norms were concerned, the said clarifications were not sufficient, since, for example, the Berne Convention does not provide for a right of distribution for all categories of works, but only for cinematographic works (see Articles 14(1)(i) and 14 bis(1)), and, although the coverage of the right of communication to the public (see Articles 11(1)(ii), 11 bis(1), 11 ter(ii), 14(1)(ii) and 14 bis(1)) is broader, it still does not extend to all categories of works in all forms. In order that any of the above —mentioned solution might work, the gaps in the international norms had to be eliminated; the coverage of the rights involved had to be completed.

- 44. Third,andthisseemedtobeforalongwhilethemostdifficultproblem,itwasfound thatitwouldbedifficultforvariouscountriestogoalongwithaspecificsolutionwhich wouldnotrecognizeaslegitimateanyalternativesolution. At the same time, however, there wasquitegeneral agreement on which acts should be covered by exclusive rights, and the differences only related to the specific legal characterization of those acts.
- Therefore, a compromise solution was proposed; namely, that theactofdigital transmissionshouldbedescribedinaneutralway, freefromspecificlegal characterization (forexample, asmaking available awork to the public by wire or by wireless means, for access);thatsuchadescriptionshouldnotbetechno logy-specificand, at the same time, it shouldexpresstheinteractivenatureofdigitaltransmissionsinthesensethatitshouldgo alongwithaclarificationthataworkoranobjectofrelatedrightisconsideredtobemade available "tothepublic" al sowhenthemembers of the public may access it from different places and at different times; that, in respect of the legal characterization of the exclusive right-thatis, in respect of the actual choice of the right or rights to be applied freedomshouldbelefttonationallegislation; and, finally, that the gaps in the Berne Conventioninthecoverageoftherelevantrights --therightofcommunicationtothepublic andtherightofdistribution-shouldbeeliminated. This solution was re ferredtoasthe "umbrellasolution."
- The WCT applies this "umbrell a solution," in a specific way. Since the countries which preferredtheapplicationoftherightofcommunicationtothepublicasageneraloption seemedtobemorenumerous,theT reaty, first, extends the applicability of the right of communication to the public to all categories of works, and then clarifies that that right also coverstransmissionsininteractivesystemsdescribedinalegal -characterization-freemanner. This included in Article 8 of the Treaty which reads as follows: "Without prejudice to the provisionsofArticles11(1)(ii),11 bis(1)(i)and(ii),11 ter(1)(ii),14(1)(ii)and14 bis(1)ofthe BerneConvention, authors of literary and artistic works shall enjoy theexclusiverightof authorizinganycommunicationtothepublicoftheirworks, bywireorwirelessmeans, includingthemakingavailabletothepublicoftheirworksinsuchawaythatmembersofthe publicmayaccesstheseworksfromaplaceandata timeindividuallychosenbythem."Asa secondstep,however,whenthisprovisionwasdiscussedinMainCommittee I,itwasstated andnodelegationopposedthestatement -thatContractingPartiesarefreetoimplementthe obligationtograntexclusiverig httoauthorizesuch"makingavailabletothepublic"also throughtheapplicationofarightotherthantherightofcommunicationtothepublicor throughthecombination of different rights as long as the acts of such "making available" are fullycovere dbyanexclusiveright(withappropriateexceptions). Bythe "other" right, of course, first of all, the right of distribution was meant, but ageneral right of making available tothepublic, mightals obesuchan "other" right.
- 47. Theabove -quoted statementseemstobevalid,notonlybecauseitwasnotopposedby anydelegationparticipatingintheDiplomaticConference,butalsobecause,itisinharmony withanage -oldpracticefollowedbythemembercountriesoftheBerneUnioninthe applicationofthevariousrightsgrantedbytheConvention(practicethecompatibilityof whichwiththeBerneConventionhasneverbeenquestioned),namelythatthelegal characterisationofarightisfrequentlynotthesameundernationallawsasunderthe Convention.Forexample,incertaincountriestherightofpublicperformancecoversnotonly thoseactswhicharereferredtointheprovisionsoftheBerneConventionaspublic performancesofworksbutalsotherightofbroadcastingandtherightofcommuni cationto thepublicwhich,undertheBerneConvention,areseparaterights.Inothercountries,the

rightofcommunicationtothepublicissuchageneralrightcoveringallthethreecategories of rightsmentioned. Stillinothercountries, it is ther ightofbroadcasting which also covers communication to the public by wire.

- 48. Withthe "umbrellasolution," the differing legal characterization may involve crossing the border of copy related rights and non copy-related rights, but this is just the consequence of the fact that, with digital interactive transmissions, for the first time, we are faced with hybridacts. (The acceptability of such differing legal characterizations of acts, of course, depends on whether or not the obligation stogrant am inimum level of protection, in respect of the acts concerned, are duly respected. If, for example, the right of broadcasting were extended to acts which, under the Berne Convention are qualified as communication to the public by wire ("cable originated programs") and a compulsory license were applied also for the latteract, citing the fact that Article 11 bis (2) of the Berne Convention allows such licenses for broadcasting, this would be inclear conflict with the Berne Convention which does not allow such licenses for "cable originated programs.")
- 49. Inthecaseoftherightofdistribution, the WCT also eliminates the gaps existing in the Berne Convention. Article 6(1) of the WCT provides for an exclusive right to authorize the making available to the epublic of originals and copies of works through sale or other transfer of ownership, that is, an exclusive right of distribution.
- 50. Asmentionedabove,undertheBerneConvention,itisonlyinrespectof cinematographicworksthatsucharightis grantedexplicitly. According to certainviews, sucharight, surviving at least until the first sale of copies, may be deduced from the right of reproduction as an indispensable corollary of that right, and, in some legal systems such a right is actually recognized on suchabasis. Other experts are, however, of a different view and many national laws do not follow the solution based on the concept of implicit recognition of sucharight. Therefore, that provision of the WCT should be considered, as a minimum, a useful clarification of the obligation sunder the Berne Convention (and also under the TRIPS Agreement which includes by reference the relevant provisions of the Convention) but probably it is more justified to consider that provision as a Berne -plus-TRIPS-plus element.
- 51. The WPPT applies the "umbrella solution" in amore direct way. Its Articles 10 and 14 provide for a specific right of "making available to the public", an act which is described practically in the same way as the interacti veon-demand transmissions in digital networks are described in Article 8 of the WCT. Article 10 reads as follows: "Performers shall enjoy the exclusive right of authorizing the making available to the public of their performances fixed in phonograms, by wire or by wireless means, in such a way that members of the public may access them from a place and at a time individually chosen by them. "Article 14 provides essentially the same right for producers of phonograms.
- 52. ItshouldbenotedthattheDi plomaticConferencealsoadoptedanagreedstatement whichwasintendedtoaddresstheissueofliabilityofserviceandaccessprovidersandof "commoncarriers"inrespectoftransmissionsininteractive,on -demandnetworks.Itreadsas follows: "Itis understoodthatthemereprovisionofphysicalfacilitiesforenablingormaking acommunicationdoesnotinitselfamounttocommunicationwithinthemeaningofthis Treaty[theWCT]ortheBerneConvention.ItisfurtherunderstoodthatnothinginArti cle8 [oftheWCT]precludesaContractingPartyfromapplyingArticle11 bis(2)."

- 53. Theagreedstatementstatestheobvious, sinceithas always been evident that, if a person carries out an act other than an act directly covered by a right provided for in the Convention (and incorresponding national laws), that person has no direct liability for the act covered by such a right. It is another matter, that, depending on the circumstances, he may still be liable on the basis of some other forms of liability, such as contributory or vicarious liability. Liability is suesare, however, very much complex; the knowledge of a very large body of statutory and case law is needed in each country so that a given case may be judged. Therefore, international treaties on intellectual property rights, under standably and rightly, do not cover such is sues of liability. The Diplomatic Conference followed this tradition.
- Itseemsthat, depending on the legal system and tradition of the various countries, differinglegalsolutionswillbeusedtoaddresstheissueoftheliabilityofserviceandaccess providers. There are some countries, where this is intended to be left to case law (which has beenabletosettlesimilarissuesinrespectoftherightofrepro duction, the right of public performance, the right of broadcasting, and so on). In other countries, however, statutory regulationisseendesirable(anexampleistheUnitedStatesofAmericawherethe1998 DigitalMillenniumCopyrightAct(DMCA)contai nsdetailedprovisionsinthisrespectas wellasthe2000E -commerceDirectiveoftheEuropeanCommunitywithsimilar,although somewhatlessdetailedprovisions). Such statutory regulation will necessarily differed untry bycountryincloseconnectionw iththelegalstructureintowhichitshouldfitandwiththe legalanddraftingtechniquestraditionallyappliedinthecountriesconcerned. Thus, it would bedifficulttosuggestdetailednormshere.Someprinciplesmayonlybeoutlined, suchasthe following:theregulationshouldbeasmuchgeneralandaslittletechnology -specificas possible;marketplacesolutionsshouldbepromotedbasedonlicensingandcontract conditions; liability rules should encourage cooperation between service and access providers andownersofrightsinorderofdeterringtheuseofdigitalnetworksforcopyrightpiracy, detecting and eliminating infringements, applying a dequate technological measures, identifyingandpursuinginfringers; and, ingeneral, promoting appro priatebusinesspractices andresponsiblebehaviourofendusers.

V. THE"DIGITALAGENDA": LIMITATIONS AND EXEPTIONS

- 55. AnagreedstatementwasadoptedconcerningArticle 10oftheWCTonlimitationsand exceptions, which reads as follows: "It is understood that the provisions of Article 10 permit Contracting Parties to carry forward and appropriately extendint othe digital environment limitations and exceptions in their national laws which have been considered acceptable under the Berne Convention. Similarly, these provisions should be understood to permit Contracting Parties to devise new exceptions and limitations that are appropriate in the digital networked environment. It is also understood that Article 10(2) neither reduces no rextends the scope of applicability of the limitations and exceptions permitted by the Berne Convention. "This agreeds ta tement is applicable, mutatismutandis, also concerning Article 16 of the WPPT on limitations and exceptions.
- 56. Thisagreedstatementreq uiresappropriateinterpretation.BothArticle10oftheWCT andArticle16oftheWPPTprescribetheapplicationofthesamethree -steptestasacondition fortheintroductionofanylimitationonorexceptiontotherightsgrantedbytheTreatyas whatisprovidedinArticle9(2)oftheBerneConventionconcerningtherightofreproduction andinArticle13oftheTRIPSAgreementconcerninganyrightsinliteraryandartisticworks. Thus,anylimitationorexceptionmayonlybeintroduced(i) inaspec ialcase;(ii) ifitdoes

notconflictwithanormalexploitationoftheworks, performances or phonograms, respectively; and (iii) if it does not unreasonably prejudice the legitimate interests of the owners of rights.

- 57. The application of the three-steptest to rights of performers and producers of phonograms is of particular importance, since it means that the out -of-date provisions of Article 15(1) of the Rome Convention --which, for example, grantfull discretion to the Contracting Parties to treat any personal use as not infring in great edrights -have been rejected.
- 58. Article10(2)oftheWCT, similarly to Article13 of the TRIPS Agreement, extends the application of the three -step test to all economic rights provided in the Berne Conv ention, while Article16(1) of the WPPT provides that Contracting Parties may introduce "the same kinds of limitations and exceptions with regard to the protection of performers and producers of phonograms as they provide for, in their national legislation in connection with the protection of copyright in literary and artistic works".
- The WIPO study on the "Implications of the TRIPS Agreement on Treaties" 59. AdministeredbyWIPO"referstothefactthat"[t]heBerneConventioncontainsasimilar provisionconcerningtheexclusiverightofreproduction(Article9(2))andanumberof exceptionsorlimitationstothesameandotherexclusiverights(seeArticles 10,10 bis and 14bis(2)(b))and,itpermitsthereplacementoftheexclusiverightofbroadcastin g,andthe exclusiverightofrecordingofmusicalworks, bynon -voluntarylicenses(see Articles 11bis(2)and13(1))."Afterthis, itstates the following: "None of the limitations and exceptionspermittedbytheBerneConventionshould,ifcorrectlyap plied, conflict with the normalexploitation of the work and none of them should, if correctly applied, prejudice unreasonablythelegitimateinterestsoftherightholder. Thus, generally and normally, there is no conflict between the Berne Convention andtheTRIPSAgreementasfarasexceptions andlimitationstotheexclusiverightsareconcerned."
- 60. Asindicated in that analysis, the application of the three limitations and exceptions allowed by the Berne Convention is a uninterpretation to obtain the three limitations and exceptions and exceptions are the appropriate interpretation and application of those limitations and exceptions
- 61. Onthebasisofthisanalysis, it is clear that what the above -quoted agreed statement refers to -namely the carrying forward and appropriate extension into the digital environment of limitations and exceptions "which have been considered acceptable under the Berne Convention" should not be considered an automatic and mechanical exercise; all this is subject to the application of the three steptest. The conditions of normal exploitation of works are different in the digital environment from the conditions in a traditional, analog environment, and the cases where unreasonable prejudice may be caused to the legitimate interests of owners of rights may also differ. Thus, the applicability and the extent of the "existing" limitations and exceptions should be reviewed when they are "carried forward" to the digital environment, and they may only be maintained if -- and only to the extent that they still may pass the three steptest.

- VI. THE"DIGITALAGENDA":OBLIGATIONSCONCERNINGTECHNOLOGICAL MEASURESOFPROTECTIONANDRIGHTSMANAGEMENTINFORMATION; THEIRROLEINCOLLECTIVEMANAGEMENTOFRIGHTS
- 62. Itwasrecognizedduring thepreparatoryworkthatitisnotsufficienttoprovidefor appropriaterightsinrespectofdigitalusesofworksandobjectsofrelatedrights,particularly usesontheInternet.Insuchanenvironment,norightsmaybeappliedefficientlywithoutthe supportoftechnologicalmeasuresofprotectionandrightsmanagementinformationwhich arenecessarytolicenseandmonitoruses.Therewasagreementthattheapplicationofsuch measuresandinformationshouldbelefttotheinterestedrightsowners, buttherewasalso agreementthatappropriatelegalprotectionisneededfortheuseofsuchmeasuresand information.Article11and12oftheWCTobligesContractingPartiestograntsuchlegal protection.
- 63. Under Article 11, Contracting Parties mu stprovide "adequate legal protection and effective legal remedies against the circumvention of effective technological measures that are used by authors in connection with the exercise of their rights under this Treaty or the Berne Convention and that restrict acts, in respect of their works, which are not authorized by the authors concerned or permitted by law."
- 64. Article12(1)obligesContractingPartiesto"provideadequateandeffectivelegal remediesagainstanypersonknowinglyperforminganyof thefollowingactsknowing,or withrespecttocivilremedieshavingreasonablegroundstoknow, that it will induce, enable, facilitateorconcealaninfringementofanyrightcoveredbythisTreatyortheBerne Convention:(i)toremoveoralterany electronic rights management information without authority;(ii)todistribute,importfordistribution,broadcastorcommunicatetothepublic, withoutauthority, works or copies of works knowing that electronic rights management information has been re moved or altered without authority." Article 12(2) defines "rights managementinformation" asmeaning "information which identifies the work, the author of thework, the owner of any right in the work, or information about the terms and conditions of use of the work, and any numbers or codes that represents uchinformation, when any of these itemsofinformationisattachedtoacopyofaworkorappearsinconnectionwiththe communicationofaworktothepublic."
- 65. Anagreedstatementwasadoptedb ytheDiplomaticConferenceconcerningArticle12 whichconsistsoftwoparts. The first partreads as follows: "It is understood that the reference to 'infringement of any right covered by this Treaty or the Berne Convention' includes both exclusive rights and rightsofrem uneration." The second partreads as follows: "It is further understood that Contracting Parties will not rely on this Article to devise or implement rights management systems that would have the effect of imposing formalities which are not permitted under the Berne Convention or this Treaty, prohibiting the free movement of goods or impeding the enjoyment of rights under this Treaty."
- 66. Articles 18 and 19 of the WPPT contain practically the same provisions as Articles 11 and 12 of the WCT, and an agreed statement concerning Article 19 of the WPPT for essential mutatismutand is application of the above -quoted agreed statement also for that Article.
- 67. Theseprovisions are of a sufficiently general nature, but contain the necess any elements on the basis of which appropriate provisions may be adopted at the national level. It follows from the general nature of these provisions that national legislators may have to go further and

moreindetailinordertoofferefficientprotecti onfortechnologicalmeasuresandrights managementinformationwheretechnologicaldevelopmentssorequireandwheresuch protection, taking into account all the legitimate interests, is justified.

- 68. Inrespectoftechnologicalmeasuresofprotection ,itshouldbenotedthatitis impossibletoprovide "adequatelegalprotectionandeffectivelegalremedies" against the circumventionoftechnologicalmeasuresofprotectionifonly the actofcircumventionis prohibited. The prohibition should extend to the importation, manufacture and distribution of illicit circumvention tools. Furthermore, both technologies that control access to protected material and technologies that control certain specific restricted acts (such as reproduction) should be protected, and not only completed evices but also their specific circumventing components and functions should also be covered. Finally, the similarity between "traditional" piracy and the commercial importation, manufacture and distribution of circumvention tool is conspicuous; the latter, in fact, is a new form of piracy; therefore, meaning fulsanctions, including criminal penalties must be available against it.
- 69. The application of technological measures combined with appropriate rights management information of ferst he possibility and guarantee for an appropriate efficient exercise of rights in the network environment. This makes it possible for collective management organizations not only to authorize (or prohibit) and monitor the use of the works and /or objects of related rights in their repertoire but also a more precise and quicker distribution of the remuneration to their members.

VII. CONCLUSIONS

- 70. ThetwoWIPOtreatiesofferadequateresponsestothechallengesofdigitaltechnology, and particularlytotheInternet. Theyestablishtheindispensablelegalconditionsatthe internationallevelfortheuseofthedigitalnetworkasamarketplacefortheproductsof culturalandinformationindustries, and they regulate the copyright and related rights aspects of electronic commerce in a way that they maintain the existing balance of interests in this field and also leaves ufficient freedom for national legislation. It is certainly due to this that, at the end of 1997, which was the deadline for signing the treaties, there were no less than 51 signatories of the WCT and 50 of the WPPT.
- 71. The process of ratification of, or accession to, the treaties, as well as their implementation at regional and national levels, is going a head in a very promising way. For the entry into force, 30 instruments of ratification or accession had to be deposited with the Director General of WIPO. The WCT entered into force on March 20, 2002, while the WPPT didsoon May 20, 2002, and the process of ratification or accession by further countries is continuing in a promising way (at the moment of the completion of this paper at the end of September 2002—the rewere 41 instruments deposited for both treaties).
- 72. ItishopedthattheLibyanArabJamahir iyawillalsoactivelyconsideraccessionto theseimportantinstruments. Thisisclearlyintheinterestofanycountrywhichintendsto benefitfromthegreatopportunitiesofferedbytheGlobalInformationNetworkandby electroniccommerceforeconomi c,socialandculturaldevelopment.
