R	ES-16-1	1	99			Add	Presentation of culinary dishes		Ajouter	Présentation de plats culinaires			Culinary art is becoming more and more relevant. We expect an increase in such requests, as we have received enquiries on this issue. 	FR: Or cl.32-02?	We consider more appropriate 01-99. We consider that class 32.02 is referred to spatial arrangements.
A	FR-16-1	2	01			Add	Menstrual knickers / Menstrual panties		Ajouter	Culottes menstruelles			Avec les sous-vêtements <i>With underwear</i> 	IB: We suggest aligning the wording with the existing ID No.100053 Knickers / Panties // Culottes [sous-vêtements] entry in 02-01. Therefore, the EN would read as "Menstrual knickers / Menstrual panties" . Is the clarification [sous-vêtements] required in FR? // Nous suggérons d'aligner avec ID 100053 en 02-01. Par conséquent, en EN "Menstrual knickers / Menstrual panties" . La précision [sous-vêtements] est-elle nécessaire en FR?	OK pour la version anglais. En français, la précision [sous-vêtements] ne parait pas nécessaire <i>OK for the wording in English. In French the clarification doesn't seem necessary</i>
A	SA-16-94	2	02			Add	Abayas		Ajouter	Abayas				ES: We find the term too specific. We would use the current term "Cloaks" in class 02.02	We thank you for your comment, as for this proposal, we would like to keep it. And, we look forward to discuss it at CEL16.

IB: The definition of "Stole" is "a long wide scarf or similar covering worn by women usually across the shoulders" (Merriam Webster). However, it is also a liturgical vestment. If this is approved, is it necessary to add a clarification to the entry, such as "Stoles [scarves]" in 02-05 or is the ID 100123 "Religious apparel" sufficient to cover "Stoles [vestments]" in 02-02? // La définition du mot "Étole" est "large écharpe de fourrure portée sur les épaules" (Larousse). Mais une étole est aussi un vêtement liturgique. Si cela est approuvé, est-il nécessaire d'ajouter une clarification à l'entrée, comme "Étoles [écharpes]" en 02-05 ou l'ID no. 100123 "Vêtements sacerdotaux" est-il suffisant pour couvrir "Étoles [vêtements sacerdotaux]" en 02-02?	Oui, au moins pour les Boas [tours de cou] <i>Yes, at least for Boas [necklets]</i> <i>ok (IB comment)</i>

A	ES-16-5	2	02			Add	Dance costumes		Ajouter	Costumes de danse			There is a classification 100173 for Dancing shoes, and for Traditional dresses or costumes 104849 but not one for dance costumes.	IB: Note that there is an existing entry for Ballet skirts / Tutus // Tutus (ID No. 100117) in 02-02. Could you please provide more information about the type of "Dance costumes" (definitions, images, web links, etc.) that are referred to in this proposal?	There are other products that does not fit in tutus or ballets skirts.   	
A	ES-16-3	2	02			Add	Sleeveless tops		Ajouter	Tops sans manches / Hauts sans manches				There is already a classification for T-Shirts 100131 but this is more specific.	IB: A T-shirt generally has sleeves and is the same shape as the letter "T" (hence the name). A proposal to change 104673 to "Sleeveless shirts / Débardeurs" was withdrawn at CEL13, and an entry for "Sleeveless sweaters / Pull-overs sans manches" (ID 104847) was approved instead. However, it may be useful to include an indication for sleeveless clothing other than sweaters, such as "sleeveless tops" in the Classification.	We agree in "Sleeveless tops".

A	ES-16-2	2	02			Add	Sport shorts		Ajouter	Shorts de sport			We propose this product indication in parallel with the already existing 100100 "Singlets for gymnastics" and taking into account the number of garment designs that are being developed. 	IB: We agree that sports clothing belongs to 02-02 but wonder if it is necessary to add a specific indication for "Sports shorts" when there is an existing entry in 02-02 for: 100113 Shorts // Shorts	We consider sport shorts as a different kind of shorts. Nowadays there is an increasing interest in sports clothing.
A	SA-16-6	2	03			Add	Cords for securing headdresses		Ajouter	Cordons de fixation des coiffures				IB: In terms of wording, the IB suggests "Cords for securing headdresses". R	RU-16-6	2	04	Subclass Heading / Intitulé de sous-classe	FOOTWEAR, SOCKS AND STOCKINGS	Change	FOOTWEAR	CHAUSSURES, BAS ET CHAUSSETTES	Changer	CHAUSSURES			We propose to create a new subclass Cl. 02-08 SOCKS AND STOCKINGS. All goods of Cl. 02-08 are transferred from Cl. 02-04. The reasons are as follows: Goods of Cl.02-04 can be divided into two categories: (a) FOOTWEAR; (b) SOCKS AND STOCKINGS. Goods in Cl. 02-04 are numerous and miscellaneous but stockings and socks have the other appearance than footwear. At the same time, the number of items of socks and stockings is much less than the number of footwear. So it is difficult to find them when searching. In this regard, it seems appropriate to create a new separate subclass for socks and stockings.		
R	RU-16-6	2	04	Note(s)	Including special boots for sports such as football, skiing and climbing, orthopaedic footwear and socks, as well as tights, gaiters and other legwear.	Change	a. A+	SA-16-9	10	05			Add	Faciale recognition devices		Ajouter	Dispositifs de reconnaissance faciale				CN: we would prefer to classify it in 10-05. IB: In terms of wording, the IB suggests "Facial recognition devices". Moreover, could you please provide more information about the nature of these goods and/or the context of their use? For example, if they are used for access control purposes, then they would be classified in 10-05. ES: There is an existing entry "Biometric sensors". It could be reworded to "Biometric devices"	This device has the functions of access control management. We would like to modify it to 10-05.
A	SA-16-109	10	05			Add	Multi-sensor detectors		Ajouter	Détecteurs multicapteurs				ES: We would like to have more context on this	This good contains several sensors to measure the temperature with high efficiency in the work environment and early warning via GSM as well as the WiFi network, also its contains alarm sensors for gases, water leaks, or humidity in the sensitive environment, as well as sensors to monitor movements.
R	MX-16-1	10	05			Add	Sensor housings		Ajouter	Boîtiers de capteurs			 this is a specific sensor to vehicles with a design in casing	KR: We are curious about the difference from the devices classified in Cl 10. We'd like to have an additional explanation for this item. CN: We would classify sensors in 10-05. IB: This proposal seems to relate to two separate goods. "Vehicle sensors" would be classified in 10-05 as "checking" or "detection" apparatus. Whereas the "casing" or "housing" to cover such sensors could belong in 12-16.	Class 10-05 only define sensor-driven baby rocking devices, this proposal are for sensors installed in vehicle. According with IB comments, we divided into two proposals, "Sensor housing" in 10-05 as a "detection" apparatus and "Vehicle sensor [monitoring function]" in 12-16 to cover sensors installed in vehicle.
A	KR-16-6	10	06			Add	Emergency exit signs		Ajouter	Panneaux de sortie de secours			 Apparatus that guide the emergency exit, including lighting functions.	CN: To be considered with proposal NO-16-12. IB: See also proposal NO-16-12 for "Emergency signs" and proposal NO-16-13 for "Emergency lamps", both in 10-06.	
W	NO-16-12	10	06			Add	Emergency signs		Ajouter	Signalisation de secours				CN: See also the proposal KR -16-06 IB: See also proposal KR-16-6 for "Emergency exit signs" in 10-06.	We would like to keep our proposal as it is.
W	NO-16-13	10	06			Add	LuminousLight-emitting emergency signs		Ajouter	Signalisation de secours lumineuse				CN: See 105026 Emergency lights [except portable lamps] in 26-03 IB: The image provided seems to be of an illuminated emergency sign, not an emergency lamp.	We would like to modify our proposal to "Ligh emitting emergency signs".
A	ES-16-11	11	01			Add	Beads for jewellery		Ajouter	Perles pour bijoux			 We could find many different concepts related to Jewellery as 105054 "Jewellery clasps" but not this one.	IB: In terms of wording, the IB suggests "Beads for jewellery" as that is the spelling used in LOC. Note that 101925 "Pearls / Perles" is an existing entry in 11-01.	We agree in "Beads for jewellery"

A+	SA-16-60	11	01			Add	Jewellery components		Ajouter	Éléments de bijouterie				IB: The IB finds this term too broad and is not sure what goods the image is meant to portray. Please could you provide more information about the nature of the goods you are proposing? ES: We would like to have more context about it. We found the term too broad.	This good is used in the making of jewelry such as clasps, pins, and hooks.
A	FR-16-6	11	01	101926	Gems / Precious stones	Change	Precious or semi-precious stones	Pierres précieuses	Changer	Pierres précieuses ou semi-précieuses				IB: For the EN term, we suggest "Precious or semi-precious stones" (delete the synonym "gemstones"). // Pour le terme EN, nous suggérons "Precious or semi-precious stones" (supprimer le synonyme "gemstones").	ok
A	KR-16-7	11	01			Add	Smart rings		Ajouter	Bagues intelligentes			A smart ring is a wearable electronic device loaded with mobile components like sensors and NFC chips that are used for a variety of applications, mostly tracking daily activities and as a peripheral tool to support mobile devices. This makes smart rings a nifty alternative to smartwatches and fitness bands. 	IB: In line with the usual practice to classify smart objects in the same class as their traditional equivalent, we agree that "Smart rings" can be classified in 11-01.	
A	IB-16-20	11	02	101967	Magnets			Magnets	Changer	Aimants			Aimants is more commonly used in FR. This change would also harmonize with: 101476 Permanent magnets // Aimants permanents (08-99) 101965 Magnets for magnetic boards // Aimants pour tableaux magnétiques (11-02)		
A	SA-16-86	11	02			Add	Plant stands with wheels		Ajouter	Supports à roulettes pour pots de fleurs				KR: We suggest 'Flowerpot stands with wheels'. And, we would not classify these goods in 09-03. Perhaps 11-02 is more appropriate. CN: We would classify these goods in 11-02 by analogy with 101958 Flowerpots. IB: The image seems to show a "Plant stand with wheels", also known as a "Plant caddy with wheels" that is used to easily move plants around the garden or indoors. They may be analogous to 102027 "Dollies [wheeled platforms] / Socles roulants" in 12-02. ES: Please note that in class 11.02 there is an entry with "Flowerpots" therefore with find class 11.02 more appropriate.	We would like to modify it to "Plant stand with wheels", 11-02.

Is it really necessary to have two entries in different classes?</p> <p>Desserte: Meuble de salle à manger sur lequel on pose la vaisselle et les plats (Larousse)</p> 	CN: We suggest transferring to 12-02 by analogy with 102025 Trolleys for medical care.	IB: We thank CN for their comment. But the question remains, does the CE see these goods as "furniture" in Class 6 or as "transport" items in Class 12? We look forward to discussing these proposals at CEL16.
A	IB-16-5	12	02	102012	Dinner waggons [carriages]	Delete		Buffets roulants [chariots]	Supprimer				<p>Dinner wagon: a small wheeled table with shelves that is used for the service of a dining room (M-W)</p> 	CN: We don't think it is necessary.	IB: We are not clear what the CN comment means - is it not necessary to keep ID 102012 or not necessary to delete it? In any case, we look forward to discussing these proposals at CEL16.
A	IB-16-6	12	02			Add	Food carts		Ajouter	Chariots de nourriture			<p>Food carts (e.g. hot dog carts) are mobile kitchens that travel under their own power (Wikipedia)</p> 	CN: We believe that the goods shown in the picture belongs to 102222 Kitchen[mobile] in 12-13.	<p>IB: We thank CN for their comment. We understand the confusion, however "carts / chariots" refer to "handcarts" / chariots à main" in Cl.12-02.</p> <p>We wonder what other Member States understand by 102222 "Kitchens [mobile] / Cuisines roulantes" in 12-13? A	DE-16-16	12	02			Add	Library carts / Book trolleys		Ajouter	Chariots de bibliothèque / Chariots à livres			In order to clarify the class for this type of products, it seems helpful to add that term. The classes to be considered are 06-03, 06-04 and 12-02. We prefer class 12-02, as in our view similar product groups are already classified there, e.g. "Hand trolleys for transporting guidance barriers" or "Trolleys for medical care". Following the IB comment we modify our proposal to "Trolleys with shelves".
A	SA-16-85	12	03			Add	Maglev train carriages		Ajouter	Trains à sustentation magnétique				IB: Maglev (from "Magnetic levitation") is a type of train transportation using magnets that lift and propel trains along a guided track. We would therefore suggest "Maglev train carriages" in 12-03. ES: We propose "Maglev vehicles"	We would like to modify it to "Maglev train carriages", 12-03.

Note that there is an existing entry in 12-05 for: 102079 Conveyors [machines] // Transporteurs ES: Please note that in class 12.05 there is an already existing term "Floor conveyors"	This good is placed on the ground to place heavy objects on them to facilitate their movement and transportation. They are of high hardness to carry heavy objects, light in weight, and easy to carry and store. We could not find the term in Locarno classification.

IB: We thank CN for their comment, however we prefer to maintain this proposal in 12-14. We see these goods as "transport vehicles" (12-14) and not as "Elevators and hoists for loading or conveying" in 12-05. The "conveyors" in 12-05 refer to static machines (e.g. 102079, 102072, 102089), whereas these delivery robots are more analogous to vehicles. W	CH-16-1	14		Subclass Heading / Intitulé de sous-classe		Add Subclass	VIRTUAL OBJECTS		Ajouter sous-classe	OBJETS VIRTUELS		07	<p>Background The metaverse has been growing in relevance for some time now. This presents new challenges for the classification of (purely) virtual products. The Swiss office, and other offices such as the EUIPO, is increasingly considering the question of how virtual objects should be classified and whether a distinction or a means of distinction should be made for such objects.</p> <p>The following two questions have occurred to us in relation to future registrations: 1. Should it be possible to identify a purely virtual product as such in its designation? Example: 'virtual shoe' 2. How should exclusively virtual designs that can be purchased or worn by an avatar in the metaverse, for example, be classified?</p> <p>Designation In most states, the designation does not affect the scope of protection. For classification, the primary intended purpose must be stated, but the scope of protection is to be considered abstractly. We generally believe that it therefore does not matter whether a product exists purely virtually or not and that it also does not need to be</p>	<p>IB: We thank the Swiss Office for their proposal and look forward to further discussions at CEL16. 1. We wonder if General Remark c) namely: "In principle, goods are classified first according to their purpose and subsidiarily, if this is not possible, according to the object that they represent. This latter classification is optional." could be considered as an alternative option? This would mean that goods such as "virtual shoes" would continue to be classified in the same class as "real" shoes, as they would be classified according to the object that they represent. We would be interested to hear the views from the other delegations in that respect. 2. For a proposal for a new subclass to be approved, it would be necessary to propose at least one indication to be added to the new subclass. In other words, a subclass cannot be "empty". 3. The IB will liaise internally with colleagues in the Hague Registry to discover their experience of "virtual" objects being filed in</p>	<p>CH: We thank the IB for their comment and are also curious to see what the other states will contribute to the discussion.</p> <p>We think that in the future there will be an increasing need to protect purely virtual products. Here, a certain differentiation could become relevant when it comes to showing that the product explicitly does not physically exist. Therefore, one possibility would be to identify this in the designation as "virtual". Further, products such as a projected keyboard that is projected onto the table by means of a projector (and thus also exist only virtually) could be classified in this class. This is the case when not the appearance of the projector but the "object" is to be protected. Further examples of use would be, for example, projected clocks on a wall etc. For us, the question then arose</p>

R	ES-16-19	19	08			Add	Sketches for fashion figures		Ajouter	Croquis de mode			Our office has recently received several requests related to this product indication. 	KR: We suggest 'Fashion figurines [printed]'. DE: We are not sure about the product. What exactly is the design aspect here? Is it the clothing/fashion (class 02-02) or the graphic designs [two-dimensional] (class 32-01). We researched that the objects shown in the picture are usually offered as "Sketch templates for fashion figures". CN: We think these goods belong to 101946 Figurines in 11-02. IB: Please can you provide more information about these goods. As you have indicated 19-08, as they some form of printed picture? The wording could be interpreted as referring to some kind of mannequin in 20-02. Note that 103249 "Patterns for dressmaking / Patrons pour couture" is an existing entry in 19-08.	This product is a sketch for illustrating a fashion design as part of artist materials. We think that "fashion figurines" is broader than a template ("Sketch templates for fashion figures"). We suggest "Sketches for fashion figures" in class 19-08.

IB: We thank KR for their comment. Please note that our proposal is aimed solely at updating the wording. Nevertheless, it is true that 103422 "Exercising apparatus / Exerciseurs" is classified in 21-02. Should 103829 be transferred to 21-02 as well? Or should the wording be amended to reflect similar entries in 24-01, such as 104637 "Medical rehabilitation apparatus / Appareils médicaux de rééducation", 103830 "Physiotherapy apparatus / Appareils pour la physiothérapie"? We look forward to hearing the opinions from Member States at CEL16.

R	SA-16-72	24	01			Add	Medical robots		Ajouter	Robots médicaux				IB: The IB finds this term too broad to be classified in 24-01 as medical robots come in a number of different forms which we would classify in different subclasses, for example: Surgical robots in 24-01 Endoscope robots in 24-02 Robotic prosthetic limbs in 24-03 Robotic exoskeleton suits [walking aids] in 24-05 (ID No.105129) Therefore, please could you provide more information about these medical robots? ES: We would like to have more context about it. We found the term too broad.	CE: The CE considered this proposal to be too broad. It is a mobile robot that measures fluid levels in the body and can be used during kidney dialysis.

A	RU-16-5	24	02			Add	Catheters		Ajouter	Cathéters			<p>Catheters are medical devices that can be inserted in the body to treat diseases or perform a surgical procedure. Catheters are manufactured for specific applications, such as cardiovascular, urological, gastrointestinal, neurovascular and ophthalmic procedures. Catheters can be inserted into a body cavity, duct, or vessel, brain, skin or adipose tissue. Functionally, they allow drainage, administration of fluids or gases, access by surgical instruments, and also perform a wide variety of other tasks depending on the type of catheter. Special types of catheters, also called probes, are used in preclinical or clinical research... (Wikipedia). The appearance of catheters may differ significantly from probes.</p> 	<p>IB: The IB would classify catheters in 24-04 by analogy with:</p> <p>103916 Drainage tubes for medical purposes / Drains à usage médical</p> <p>103923 Irrigators [medical] // Irrigateurs [médicaux]</p>	<p>RU: catheters are used in many areas of medicine, particularly for angioplasty, for the delivery of stents, etc. Each type of catheter has its own appearance, e.g. catheters (for angioplasty) containing balloons.</p>

IB: While we agree, in principle, that occluders could be classified in 24-02, please could you provide us with more information about the goods portrayed in the image provided? ES: We would like to have more context about it. We found the term too broad.	This good is for closures fit that used with the medical feeding pump to deliver nutritional liquid to the patient. The occlusion usually prevents the nutritional liquid from flowing through the tube.
A	RU-16-3	24	02			Add	Otorhinolaryngological retractors		Ajouter	Écarteurs otorhinolaryngologiques			The otorhinolaryngological mouth gags are intended for mandatory opening of the mouth and hold the jaws and tongue in the required position during otorhinolaryngological surgery. 	IB: With regards to wording, the IB suggests "Otorhinolaryngological retractors". A	DE-16-21	30	12			Add	Signal-operated training devices for animals		Ajouter	Appareils de dressage commandés par signal pour animaux			<p>Proposed to clarify the class for this kind of devices. In the global design database you can find similar designs sometimes classified in class 30-04 and sometimes in class 30-99. In our point of view the newly class 30-12 seems to be correct.</p>  <p>Image source: Global design database_008823785-0001, www.amazon.de</p> 	<p>IB: Please can you clarify what you mean by "signal-operated"? Is the animal trained by signals emitted from the device that they can hear or see? Or are signals sent by the trainer to the device to make the device work?</p>	<p>The proposal relates to electronic devices for training animals by signals emitted by an electronic device via ultrasound or infrared.</p> <p>Ultrasonic frequencies can be used as signal emitters and receivers. However, such devices can also be controlled by signals via a remote control and react, for example, with sounds, smells or water splashes. In the case of the picture on the left, the device uses ultrasound technology. The device intelligently detects e.g. dog barking in the area covered by the system and automatically emits ultrasound to silence the dog and stop excessive and loud dog barking. The unit responds to the frequency of the dog barking. External control by another transmitter is not required. The device can be placed anywhere indoors or outdoors and is not attached to the animal.</p>
A+	KR-16-30	10	04			Add	Scales for animals		Ajouter	Balances pour animaux			 <p>CE: The CE considered that these goods were proper to Cl. 10-04 rather than Cl. 30.</p>	<p>IB: The IB would classify "Scales for animals" in 10-04 with other scales as we do not see them as "Articles for the care and handling of animals" but rather as measuring instruments in Cl. 10.</p>	<p>KR: Thank you for the comments.</p> <p>But, we have some problems with related issues. The interpretation of 'animal care' seems ambiguous. It seems difficult to ensure international classification standards for various animal-related items. For example, animal thermometers, medical equipment for animals, etc.</p> <p>Therefore, we'd like to hear more opinions on this.</p>

DE: We are not sure about the term and the class. Could you please provide further information about the product? What is the difference to 104564 "Graphic Symbols [comic figures]"? The object shown looks more like an animated or 3D character, which could fit in class 14-04. IB: Please can you clarify whether you mean cartoon in the sense of a drawing or an animated sequence? And could you also provide an explanation of the 3D nature of the cartoons? Note that 104562 "Graphic designs [two-dimensional] / Graphismes [bidimensionnels]" is an existing entry in 32-01.	We mean a bidimensional drawing, that represents a 2D or 3D cartoon. The difference with Graphic designs [two-dimensional] / Graphismes [bidimensionnels] is that this kind of cartoon can have several views due to its tridimensional nature. A bidimensional character (as a comic figure) is plane and only has one view. We consider more appropriate class 32.01.
