COMITÉ D'EXPERTS

Vingt-septième session
Genève, 21 - 30 octobre 1998

DEMANDES DE RÉVISION DE LA
CLASSIFICATION INTERNATIONALE DES BREVETS (CIB)

Document établi par le Bureau international

1. L'annexe I du présent document contient une proposition de révision de la sous-classe G 01 M, soumise par la Fédération de Russie, qui complète l'annexe 11 du document IPC/CE/27/9.
2. Les annexes II à VI contiennent les observations sur les demandes de révision de la CIB (voir le document IPC/CE/27/9), soumises par la France, l'Allemagne, le Japon, la Suède et l'Office européen des brevets (OEB).

ANNEX II/ANNEXE II

FR - octobre 1998

OBSERVATIONS SUR LE DOCUMENT IPC/CE/27/9

Le tableau suivant donne la position de l'office français sur la nécessité ou non d'entreprendre une révision de la CIB dans les domaines concernés.

Pour les demandes de révision qui seront inscrites au programme, des observations plus détaillées sur les schémas proposés seront communiquées dans le cadre des travaux du Groupe de travail chargé de l'étude des propositions de révision de la CIB.

Ann.	Sous-classe	Office d'origine	Avis FR	Observations
1	A47B, G06K	SE	+	Nous sommes d'accord pour étudier cette proposition, il faudra entre autres indiquer clairement l'endroit correct pour classer les tapis de souris (voir les observations JP).
2	A61K	ES	x	La proposition nous paraît acceptable. Il faudra toutefois veiller à éviter les chevauchements avec la partie médicale, l'alopecie pouvant avoir des origines pathologiques.
3	A61K	ES	x	id.
4	B01D	GB	x	Il est bien sûr souhaitable de subdiviser le groupe B 01 D 15/08, mais cette proposition présente plusieurs inconvénients : <ul style="list-style-type: none"> – les chevauchements avec d'autres entrées risquent d'être multiples, notamment avec C 07 C 7/12, C 07 K 1/16, G 01 N 30/00; – il ne faut pas oublier que les matériaux adsorbants sont couverts par le groupe B 01 J 20/00 (groupe 15/34 proposé) – le groupe 15/34 "sorbent materials" devrait être limité à l'adsorption sélective, titre du 15/08.
5	B30B	PT	+	

Ann.	Sous-classe	Office d'origine	Avis FR	Observations
6	C08J	GB	+	
7	C10B	RU	+	Cette proposition est acceptable et elle doit être étudiée en liaison avec le projet C 391 (dans lequel toutefois la solution proposée ne nous paraît pas appropriée, voir EXEC/XX/9 paragraphe 12c)
8	F16N	PT	+	Nous avons aussi constaté qu'il manquait certains renvois dans la liste figurant après le titre de la sous-classe F 16 N, en particulier vers la sous-classe F 01 M.
9	F23C	SE	+	
10	G01C	GB	+	En voyant le nombre de documents, nous nous demandons si l'amendement proposé (que nous approuvons) ne devrait pas être complété par quelques subdivisions supplémentaires.
11	G01M	RU	+	Il paraît utile en effet de subdiviser le groupe G 01 M 15/00. Il faudra toutefois être attentif au risque de chevauchement entre le groupe 15/039 et les sous-classes G 01 L et G 01 N car la différence entre "surveillance" et "analyse" des gaz est faible.
12	G21B	RU	+	Nous pensons que ce projet doit absolument être mis au programme car il y a de nombreuses demandes concernant la fusion.

Re.: WIPO Circular No.C.PCIPI 2309 08.3 of Oct. 17, 1997;
IPC/CE/27/9

Ax.	Subclass/ Group	Request. Office	Cat.	Opinion	Remarks
					+ Improvement x Improvement if modified - No improvement
1	A47B 21/00 G06K 11/00	SE	C	x	In principle we are in favour of the request with the exception of subgroup G06K 11/24. There are only few documents in this special field.
2	A61K 7/06	ES	C	+	Revision is necessary, existing group covers too many documents, existing structure inefficient
3	A61K 7/48	ES	C	+	
4	B01D 15/08	GB	C	+	
5	B30B 11/00	PT	B	+	No objection, adding the reference, " <i>for doughs A21C</i> ", in B30B 11/00. Proposal: This subject could be dealt under item 6 of the Agenda of CE/27 "Checking of references".
6	C08J Title	GB	B	+	This amendment could/should also be dealt under item 6 of CE/27/1, improvement of a reference.
7	C10B 53/00	RU	C	+	
8	F16N Note after title	PT	B	+	We are in favour of adding further references to specific application places concerning "Lubrication" to the list. In our opinion this request could also be dealt under item 6 of CE/27/1 "Checking of references". It seems to be worthwhile to extend the request and to add further references in F16N, since we found more than 200 places in the IPC ⁶ dealing with Lubrication.

Ax.	Subclass/ Group	Request. Office	Cat.	Opinion	Remarks

ANNEX IV/ANNEXE IV

JP COMMENTS

Date 30.09.98

JP opinion (+)improvement
(x)improvement if modified
(-)no improvement

**CE/27/9 ANNEX1
A47B,G06K (-)**

1. A reference to G06K 11/00 in A47B 21/00

We think that a reference to be inserted in A47B 21/00 should be G06F 3/00 instead of G06K 11/00.

There already exists such reference in G06K 11/00 as “adapted as input device to computers G06F 3/00”. And G06K 11/00 is a group related to “methods or arrangements for graph-reading or for converting the pattern of mechanical parameters into electrical signals”. Thus, G06K 11/00 covers methods or arrangement for specific use and it is not proper to interpret this group as a place to cover a mouse in general. Therefore, a reference to be inserted in A47B 21/00 should be “mouse-mats or mouse platforms per se G06F 3/00”, not G06K 11/00.

2. Creation of G06K 11/22 and G06K 11/24

We are not in favor of the creation of G06K 11/22 and 11/24.

A mouse is exactly “a movable member co-operating with a display device” as set forth in G06F 3/033. It should be covered here and no creation of new subgroups is necessary.

Mouse-mats or mouse platforms are used together with a mouse, and it should be covered in a hierarchically lower subgroup under G06F 3/033 instead of creating 11/22 and 11/24.

**CE/27/9 ANNEX6
G08J (+)**

We agree with the proposal. The proposed wording of the reference could express the relation and difference between C08J and B29 more properly than the current wording “mechanical aspects”

CE/27/9 ANNEX8
F16N (x)

We generally agree with the proposal.

F01M 3/00 covers those engines with crankcase compression of fuel, and the proposed wording “Lubricating specially adapted for *crankcase engines*” has too narrow scope to cover ordinary “crankcase engines”.

We think that “crankcase engines” usually are reciprocating engines with ordinary crankshafts.

We propose, therefore, the following wordings

F01M 1/00~13/06 Lubricating adapted for internal combustion engines

(F01M 3/00: Lubricating adapted for crankcase compression engines)

Swedish Patent and Registration Office

Requests for revision of the IPC
October 2nd, 1998

COMMENTS on IPC/CE/27/9

We are in favour of adopting the revision proposals of annexes 1 to 12. We have the following comments:

- Annexes 2 and 3:** In view of the very big file sizes, we could imagine inviting proposals for more elaborate subdivisions.
- Annex 5:** We note that this would be an entirely informative reference, since the borderline between A21C and B30B is defined by Note after the B30B subclass title.
- Annex 11:** We have noted the detailed proposal dated 98-4-27.

Anders Bruun

L'annexe VI suit]

ANNEX VI/ANNEXE VI

EUROPEAN PATENT OFFICE
Principal Directorate Documentation

Comments on IPC/CE/27/9
30 September 1998

In general, we welcome the 12 revision requests presented in IPC/CE/27/9 and support their inclusion into the IPC revision program. However, we would like to make the following remarks:

Annex 4 We can agree in general lines with the scheme proposed. Attention however will have to be given to the relationship between the proposed new groups and other IPC entries, such as G 01 N 30/48.

Annex 7 We welcome RU's initiative for creating subgroups relating to the use of waste materials in the field of destructive distillation (C10B53/00). However, it should be kept in mind that project C391 also relates to this main group. Therefore it might be wise to combine this request with the said project C391.

J. Rampelmann
