

Dr. Richard Gooch

Richard is Chief Technology Officer at IFPI.

He works on different music industry and metadata initiatives, including the operation of the ISRC Registration Authority.

Richard also delivers technology leadership and advice on a wide range of policy issues. He has recently worked closely with two projects in the performance rights area:

- Repertoire Data Exchange (RDx) is a hub for the exchange of recording and rights data, using the DDEX RDR standard; and
- SoundSys, a cloud-based back-office system for Music Licensing Companies which uses DDEX RDR and other data in calculating the distribution of performance rights revenues.
