

Topic 3: **Examination Status and Databases for Researching Status**

Lutz Mailänder

Head, International Cooperation on Examination and Training Section

**Cybercity
October 20, 2021**

Agenda

- Examination status
 - Types of status
 - Why do we need to know?
- Overview of options and sources for retrieval
 - Patent registers (primary sources)
 - Secondary sources (Inpadoc)
 - Prosecution history reflected in dossiers

Work-Sharing in the PCT national phase

Utilizing examination work products from other national phases for improving **efficiency** and **quality** requires

- **Databases/platforms** providing
 - Patent **family information** (family table) [>Topic 2]
 - **Examination status** of family members [>Topic 3]
 - **Access to examination work products** (**dossiers**, file wrappers) of family members [>Topic 3]
- Ideally, platforms which integrate this information in a user-friendly manner, e.g. within family table; and with additional tools, for example, for comparing work products (Common Citation Document - CCD)
- Information on differing national practices (naming and content of work products; important case law; exclusions; ..)

Status and life cycle stages of patents

- **Pre-grant phase** (before decision to grant or refuse/reject)
 - Pending
 - With request for examination
 - Awaiting request for examination (some jurisdictions with 'deferred' examination)
 - Withdrawn by applicant
 - Deemed to be withdrawn, abandoned (lack of action by applicant)
 - Rejected, refused by examiner
- **Grant phase** (between publication of decision to grant and the entry into force of grant)
 - Intend to grant (notice of acceptance)
 - Publication of grant
 - Opposition, reexamination; appeal
- **Post-grant phase** (after the entry into force of grant)
 - Lapsed
 - Reexamination, nullification, revocation, invalidation

Why do we need to investigate status?

- Whether patents have been granted:
 - > full set of examination work products available (intermediary and final)
 - Whether opposition/invalidation was requested
 - > additional very relevant prior art
- If patents have not (yet) been granted, whether
 - Note of 'intention to grant' or 'acceptance'
 - > full set of examination work products available
 - Still pending examination
 - estimate by when next action (intermediary work product) can be expected
 - Rejected; indicator for
 - > very relevant prior art, and/or
 - > other important deficiencies (clarity, sufficient disclosure)
 - Many abandonments indicate
 - > relevant prior art
 - lack of interest
 - relevant for backlog processing (saving examination resources)

Legal status

- Status is related to legal **events or actions** as defined by the respective patent law and regulations of a particular **jurisdiction**

events > status changes over the lifetime of patents

jurisdiction > different definitions limit comparability; differing terminology

- Be aware:
 - Same terminology does not imply same conditions for and implications of status
 - Different terminology may be used despite similar conditions and implications of status
- For more see WIPO Standard [ST. 27](#)
- Status may change from one day to another which poses challenges for maintaining respective databases up-to-date
- > National **registers** as primary (authoritative), up-to-date sources

Status Information and Dossier Access

- **Primary sources:** each jurisdiction defines how **authoritative (official)** patent information is published and the respective authority in charge
- **National Patent Registers** are **authoritative** sources for
 - national **legal status: all do (many online)**
 - national family relations (divisions, continuations)
 - national publications
 - online access to national **dossiers** (public file inspection): **some do**
- **Secondary sources:** aggregate data from various primary sources; one-stop shops to access information from several primary sources through a unified user interface (building on a table of the patent family); access with English user interface:
 - **Inpadoc database** (public; status only)
 - **IP5 Global Dossier** (public; status derived from dossier, prosecution history)
 - **WIPO CASE** (non-public; status derived from dossier, prosecution history)
 - **WIPO PATENTSCOPE** (public; status derived from dossier, prosecution history)

Patent Register Portal

The Patent Register Portal is your gateway to online patent registers and gazettes and to legal-status-related information from over 200 jurisdictions and patent information collections. Use it as a first step to identify what information can be retrieved online and how to access it.

Contact us with any suggestions for improvements or updates.

[Map view](#) [Map view with filters](#) [Table overview](#) [Detailed jurisdiction files](#)

Browse the table for an overview of information available for each jurisdiction or patent information collection. For additional information consult the [Detailed jurisdiction files](#).

Note: N/A = Not applicable
 By clicking the link in the Jurisdiction column, you can access the website of the relevant authority or service
 By clicking the link in the Online Register column, you can access either the register ("Yes") or alternative contact details for researching the legal status of a patent ("No")

Legal status of CA2663217 (A1) 2008-05-22:

CA F 2663217 A (Patent of invention)

Event date : 2012/07/25

Event code : FZDE

Code Expl.: - DEAD

Quick help -

→ [What happens if I click on "In my patents list"?](#)

INPADOC legal status

- INPADOC data produced by EPO based on information received from primary sources (registers)
- Accessible through Espacenet as a **secondary source** of legal status data
- Not necessarily up-to-date because it is not retrieved on the fly, but in batches, for example, once a week
- Only certain jurisdictions sharing data with EPO are covered

Status derived from prosecution history

- **Prosecution history** is the sequence of office and applicant actions (events)
- **Examination status** usually derives from the last office or applicant action (event), or the lack of such action after expiry of time limit
- Some registers provide prosecution (event) history (EP-Register)
- Communications (documents exchanged) in dossiers reflect prosecution history
