# OMPI AGENCIA MinCyT Development of Intellectual capital in Argentina

#### **INAUGURAL DISCUSSION**

# **Intellectual Capital and the Finance Market**

Bob Hodgson Zernike (UK) Limited

Buenos Aires July 2008

#### **Structure**

- Place topic in a broad developmental context
- Discuss some of the key challenges relating to:
  - > IP and its characteristics
  - Universities and the supply side
  - Companies and the demand side
  - Finance and its concerns and contribution
  - New technology firms and finance specifically
- > End with some key lessons learned from experience

# Messenger: Zernike model

## **PRIVATE** – with partnership culture

### International integrated technology entrepreneurship

- Specialist property
- Seed and start-up funds
- Business networks and globalisation
- Consultancy and positioning

#### **BIOLOGICAL CULTURE**

Divide to grow – combine for value

# IP its nature and challenges

- A legal monopoly to encourage invention
- Novel Useful Specific
- Explicit knowledge, but usually backed by tacit know how
- Complex and specialist so costly and uncertain

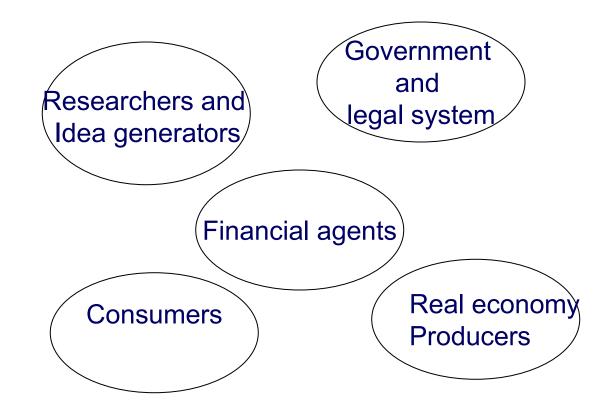

# Some key aspects

- Explicit v Tacit
- Legal Asset v Value Generation
- Creation v Defence
- Route choice to value
- Appraisal and valuation

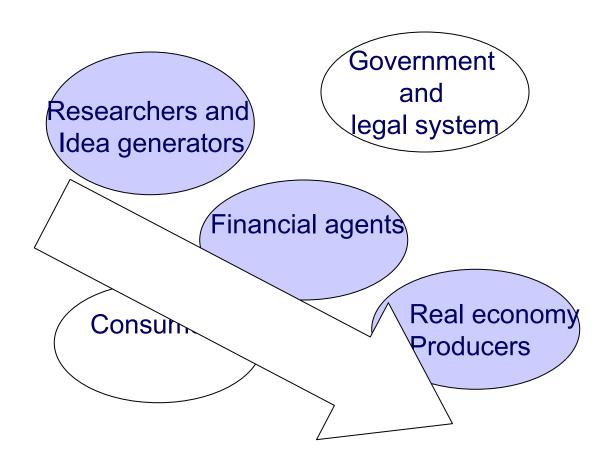

# Perspectives of five main actors

Buenos Aires, July 2008 Bob Hodgson

# Perspectives of five main actors

Buenos Aires, July 2008 Bob Hodgson

# Government: enabling and facilitating

Legal aspects – framing and applying Yes

Investor in knowledge generation
Yes

The economy stupid
Yes

Buyer and user
Yes

Commercialising agent
NO

**Bob Hodgson** 

# Consumers: willing buyers?

- Understanding and acceptance
  - segmented drugs market
- Fashion and valuation
  - establishing and sustaining the brand
- Culture ethics and risk
  - genetic engineering and acceptance

# Therefore leave

# Researchers and knowledge generators

- Legitimacy: ask the question right
  - use and benefit not exploitation
- Processes: develop a professional network
  - scale and specialism
- Institute incentives
  - equity and predictability
- Develop the commitment
  - Bayh Dole in USA
  - Christine Clements in Norway
  - ➤ CONNECT programme from UC San Diego
  - University of Manchester

- ➤ A research based university
- > Excellence in culture
- ➤ Started in 13<sup>th</sup> century
- ➤ Successful and adaptive yes
- ➤ Slim and agile perhaps not!

# Cambridge University roll call

SmithKline Beecham

Marconi

# Research agencies: interests and execution

The stage of process	Level of interest	Engagement in execution
The IP idea	++++	++++
The IP asset	++++0	+++00
The IP application	++000	++000
The IP profit	++++0	00000

**Bob Hodgson** 

# Trecture let

# **Building the bridge**

- Start with the protocol
  - Helpful, even necessary but not sufficient
- Work with all the tools and talents
  - > VTTs
  - ➤ Identifiers scouts and ferrets
  - ➤ Interpreters and translators
- Look early for the route choice
  - Alliances
  - Licencing
  - New business creation
- Ensure a two way flow

### Differentiation and focus

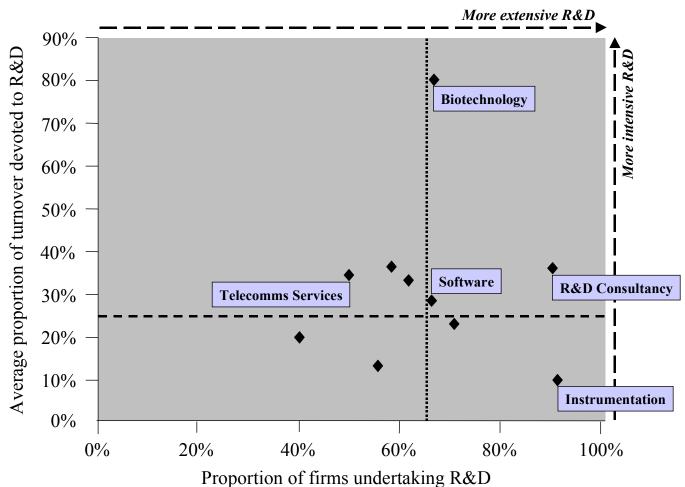

#### One size does not fit all

- Market dynamic innovate and die v innovate or die
- Technology imperative bio compared to ICT
- Purchasing dynamic security and health

#### **BUT SUSTAINED SUPPORT IS ESSENTIAL**

# Profit and differential research intensity

# Real Economy: innovation engines

- ARM Advanced RISC Machines
  - > IP generator
  - income from Licences and Royalties
  - market cap billions
- ➤ Generics Group Plc technology solutions provider
  - > IP accumulator
  - and commercialiser spinning out companies
  - massive P/E ratio on flotation hope value
- Supported by specialist service provides

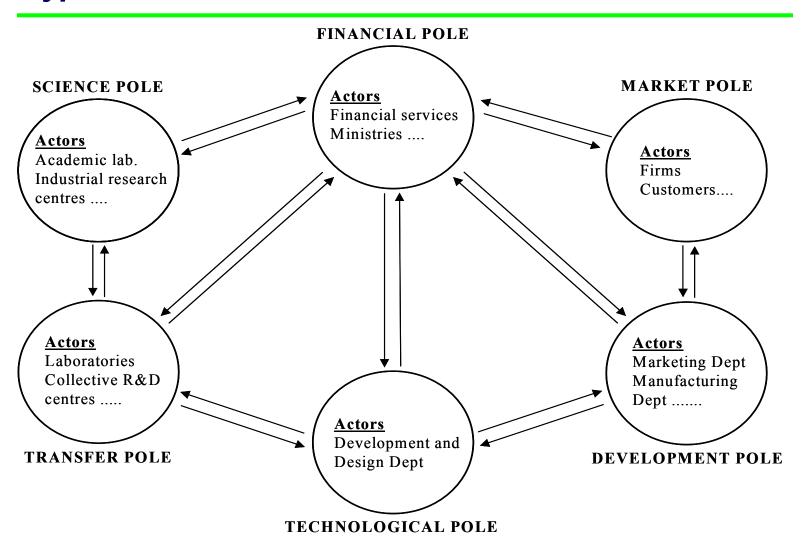

# Sources of innovative technologies

### Where do firms look for technology and innovation?

- Customers
- Capital equipment suppliers
- Competitors
- Shows and exhibitions
- Peer professionals
- Specialist media
- **>** .
- **>** .
- Public agencies
- Universities

# Typical model: Callon et al

Buenos Aires, July 2008 Bob Hodgson

# TERUTE CUK

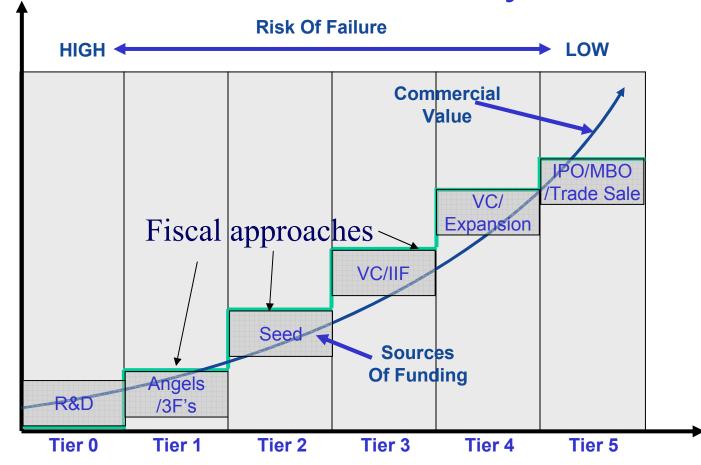

# Risks: real and perceived

- The benefit of collateral tangible and tradable
- > IP an asset but of what value?
- Austin Texas investment challenge!
- But the risks are still very real
  - technical
  - market/commercial
  - personnel
  - financial

# The Commercialisation Cycle

- > Market consolidation
- > Market expansion
- > Market penetration
- > Product enhancement
- > Sales & distribution
- > Product development
- > Marketing & research
- > Prototyping
- > Market definition
- > Innovation & R&D

#### **Business Development Tiers** Tiers 0/1 - Pre-incubation Tiers 4/5 - Commercial Tier 2 - Incubation Tier 3 - Post-incubation Mentoring Funding **Maturity** Direction Seed funding Collaboration Structuring Contacts Relationships etc Guidance Consulting Resources etc Pre-Seed funding Clients

# Challenges in commercialisation: hypothesis 1

We have great S&T and ideas for new businesses

**BUT** 

There is no money to take them forward

SO

Lets build a venture capital industry

# Challenges in commercialisation: hypothesis 2

We have lots of money which is prepared to invest in new businesses

**BUT** 

There are not enough good ideas coming forward from the knowledge base

SO

Lets change the orientation of the science base

# Challenges in commercialisation: hypothesis 3

We have great S&T and lots of investment money

**BUT** 

The two communities have opposite perspectives and cannot talk to each other

SO

Lets build a shared vision and learn a common language

# Valuation: the unresolved challenge

- Easy when there is a revenue stream
- But even then worries about sustainability
- Before the revenue stream it is much more uncertain
- And is characterised by information asymmetries
  - inventor knows the technology
  - entrepreneur knows the market
  - investor needs to independently evaluate both
  - and then to reach a deal!

#### Some additional limitations

- > IP system is not always applicable
  - advanced engineering around F1 racing
  - accumulated tacit knowledge
- Commercial perspectives can cripple business
  - Pro fit and its American licensee
  - defence costs can overwhelm revenues
  - all but a few USA universities spend more on IP than they receive

# Finally: some key messages

- Build a local consensus for legitimacy and transactions
  - more than engineering optimisation
- Get specialist help
  - develop specialist skill sets
- Provide smart incentives
  - for all who contribute not just the few
- Encourage reinvestment
  - > it is where the competitive future lies
