## PREFACE

### HISTORY OF THE CLASSIFICATION OF FIGURATIVE ELEMENTS

At the request of a number of industrial property offices of member countries of the Paris Union, the United International Bureaux for the Protection of Intellectual Property (BIRPI), the predecessor of the World Intellectual Property Organization (WIPO), began working with a Committee of Experts set up in 1967 by the BIRPI Interunion Coordination Committee on the drafting of an international classification of the figurative elements of marks. The classification was introduced by an agreement concluded on June 12, 1973, at the Vienna Diplomatic Conference.

The countries party to the Vienna Agreement Establishing an International Classification of the Figurative Elements of Marks (hereinafter referred to as "the Vienna Agreement" and "the Classification" respectively) constitute a Special Union within the framework of the Paris Union for the Protection of Industrial Property. They have adopted and apply a common classification for the figurative elements of marks.

The Vienna Agreement entered into force on August 9, 1985. The following countries are party to it (as of January 1, 1988): France, Luxembourg, Netherlands, Sweden, Tunisia.

### PURPOSE AND SCOPE OF THE CLASSIFICATION

The purpose of the Classification is essentially the practical one of facilitating trademark anticipation searches and obviating substantial reclassification work when documents are exchanged at the international level. What is more, the countries party to the Vienna Agreement no longer need to draw up their own national classification or keep an existing one up to date.

Article 4 of the Vienna Agreement provides that, subject to the requirements prescribed by the Agreement itself, the scope of the Classification is that attributed to it by each country of the (Vienna) Special Union, and that, in particular, the Classification does not bind the countries of the Special Union in respect of the extent of the protection afforded to the mark. In itself, therefore, it has no effect on the nature and extent of the protection afforded to the mark, but it goes without saying that each of the countries party to the Vienna Agreement may give the Classification whatever legal scope suits it, over and above the purely administrative implications attaching to it by virtue of the Vienna Agreement itself.

### STRUCTURE OF THE CLASSIFICATION

The Classification consists of a list of categories, divisions and sections in which the figurative elements of marks are classified, with explanatory notes where appropriate.

This list, which is compiled according to a hierarchical system that proceeds from the general to the particular, thus divides all figurative elements into categories, divisions and sections. The explanatory notes concern either the Classification as a whole or any given category, division or section.

The sections are of two kinds. In addition to the main sections, there are also auxiliary sections intended for figurative elements that are already covered by other (main) sections, but which it is considered useful to group according to a particular criterion for ease of anticipation searching.

Every category, division and section is given a number according to a special coding system. Every figurative element in a section is referred to by three numbers: the first, which may be any number from 1 to 29, denotes the category, the second, which may be any number from 1 to 19, the division, and the third, which may be any number from 1 to 25, the section. For instance a representation of a young girl eating belongs to Category 2 (Human beings), Division 5 (Children), Main Section 3 (Girls) and Auxiliary Section 18 (Children drinking or eating).

The number of divisions and sections varies according to the categories and divisions to which they belong. Within the divisions and sections, certain numbers have been left vacant to accommodate whatever new divisions or sections it may be considered necessary to create in the future.

This publication contains the second edition of the Classification, which comprises a total of:

29 categories,  
144 divisions and  
1,569 sections.

The examples of figurative elements relating to certain divisions, which are reproduced on pages 83 to 102, are included for information purposes only, and are therefore not an integral part of the Classification.

#### USE OF THE CLASSIFICATION

The countries party to the Vienna Agreement may apply the Classification either as a principal or as a subsidiary system. They thus have the possibility of continuing, if they see fit, to use their national classification at the same time as the International Classification, either as a transitional or as a permanent measure.

The competent offices of countries party to the Vienna Agreement are bound to include in the official documents and publications relating to registrations and renewals of marks the numbers of the categories, divisions and sections in which the figurative elements of those marks have been placed. "Documents and publications" means, in particular, entries in the trademark register, registration and renewal certificates and publications of registrations and renewals in office journals or gazettes.

The numbers of the categories, divisions and sections appearing in official documents and publications relating to registrations should be preceded, for ease of comprehension, by the full name "Classification of Figurative Elements" or by the abbreviation CFE (see page 21).

The Classification is sufficiently detailed for each section to contain only a relatively small number of figurative elements, even when used by large industrial property offices, thereby facilitating anticipation searches. It is perhaps too detailed, however, for offices that register relatively few marks. Countries party to the Vienna Agreement may therefore declare that they reserve the right not to include the numbers of all or some of the sections in official documents and publications relating to registrations and renewals of marks (Article 4(5) of the Vienna Agreement). Moreover, the "auxiliary" sections, the numerical code of which is preceded by an A in the Classification, are in any event not mandatory; national offices may use them at their discretion.

#### REVISIONS, PUBLICATION AND LANGUAGES OF THE CLASSIFICATION

The Classification published here is based on that approved on June 22, 1973, at the Vienna Diplomatic Conference.

The original version of the Classification (the first edition) appeared in 1973.

Pending the entry into force of the Vienna Agreement, a provisional Committee of Experts, set up under the Resolution adopted by the Vienna Diplomatic Conference on June 8, 1973 (see page 20), met in 1975 and 1976 to draw up proposals for amendments and additions to the original version of the Classification. Those proposals, after having been incorporated in the original version of the Classification, were published in a provisional edition in 1977.

After the entry into force of the Vienna Agreement, the Committee of Experts set up by its Article 5 approved the majority of the amendments and additions proposed by the provisional Committee of Experts when it held its first session in Geneva in May 1987. The changes adopted were incorporated in the Classification, and it is the Classification thus amended that is published in this second edition of the Classification of Figurative Elements.

Pursuant to the decision adopted by the Committee of Experts on May 13, 1987, the second edition entered into force on January 1, 1988.

The Classification is in English and French, both texts being equally authentic. Official texts will be established in other languages as provided in the Vienna Agreement.

## Article 4

### Use of the Classification of Figurative Elements

(1) Subject to the requirements prescribed by this Agreement, the scope of the Classification of Figurative Elements shall be that attributed to it by each country of the Special Union. In particular, the Classification of Figurative Elements shall not bind the countries of the Special Union in respect of the extent of the protection afforded to the mark.

(c) Contributions shall become due on the first of January of each year.

However, any organ of the Special Union may allow such a country to continue to exercise its right to vote in that organ if, and as long as, it is satisfied that the delay in payment is due to exceptional and unavoidable circumstances.

(c) The proportion and the terms of payment shall be fixed by the Assembly on the proposal of the Director General and after it has heard the advice of the Coordination Committee of the Organization.

(7) (a) In the headquarters agreement concluded with the country on the territory of which the Organization has its headquarters, it shall be provided that, whenever the working capital fund is insufficient, such country shall grant advances. The amount of those advances and the conditions on which they are granted shall be the subject of separate agreements, in each case, between such country and the Organization.

(b) The country referred to in subparagraph (a) and the Organization shall each have the right to denounce the obligation to grant advances, by written notification. Denunciation shall take effect three years after the end of the year in which it was notified.

(8) The auditing of the accounts shall be effected by one or more of the countries of the Special Union or by external auditors, as provided in the financial regulations. They shall be designated, with their agreement, by the Assembly.

## Article 10

The country bringing the dispute before the Court shall inform the International Bureau; the International Bureau shall bring the matter to the attention of the other countries of the Special Union.

(2) Each country may, at the time it signs this Agreement or deposits its instrument of ratification or accession, declare that it does not consider itself bound by the provisions of paragraph (1). ## Resolution

Adopted by the Diplomatic Conference  
on the International Classification  
of the Figurative Elements of Marks on June 8, 1973

1. Pending the entry into force of the Vienna Agreement Establishing an International Classification of the Figurative Elements of Marks, a provisional Committee of Experts is hereby set up at the International Bureau of the World Intellectual Property Organization (WIPO).

2. The provisional Committee shall include a representative of each country having signed or acceded to the said Agreement. Intergovernmental organizations specialized in the field of marks, of which at least one of the member countries has signed or acceded to the Agreement, may be represented by observers. Any country member of WIPO or party to the Paris Convention for the Protection of Industrial Property which has neither signed nor acceded to the Agreement may, and, if requested by the provisional Committee, shall, be invited by the Director General of WIPO to be represented by observers.

3. The provisional Committee shall reexamine the International Classification of the Figurative Elements of Marks and shall prepare, if necessary, draft amendments or additions to be made to the said Classification.

4. The International Bureau is invited to prepare the work of the provisional Committee.

5. The International Bureau is invited to convene the provisional Committee, after consultation of the countries which have signed or acceded to the Agreement, if amendments or additions are proposed by any such country or by an organization referred to in paragraph 2 above, or if the International Bureau itself intends to propose amendments or additions.

6. The International Bureau is invited to transmit, as soon as the Agreement enters into force, any draft amendments or additions prepared by the provisional Committee to the Committee of Experts set up under Article 5 of the Agreement.

7. The travel and subsistence expenses of members of the provisional Committee and of observers shall be borne by the countries or organizations which they represent.

## Recommendation

Adopted by the Committee of Experts  
set up under Article 5 of the Vienna Agreement,  
at its meeting on May 13, 1987

It is recommended to the member countries of the Vienna Union that they apply, in their official documents and publications relating to registrations and renewals of marks, the International Classification of the Figurative Elements of Marks in the following manner:

(a) The numbers of the category and division, and of the division and sections should be separated by a point, and the numbers of two sections by a dash (e.g. Category 3, Division 9, Sections 10, 24 and 25 should be written as follows: CFE 3.9.10-24-25);\* if the numbers of the sections are not included in the classification, the numbers of categories and divisions should still be separated by a point (e.g. Category 3, Division 9 should be written as follows: CFE 3.9).

(b) If the numbers of several categories and divisions are necessary for the classification of one and the same registration, the classification for every category and division should be indicated separately, in numerical order; the various indications should be separated by a semicolon (e.g. CFE 1.1.2-10-25; 1.15.17; 2.9.1 or, if the section numbers are not included in the classification: CFE 1.1; 1.15; 2.9).

---

\* The Committee of Experts, at its session of May 13, 1987, determined that the abbreviation referred to in Article 4(4) of the Vienna Agreement, which was to precede the classification numbers where a country chose to use an abbreviation instead of the words "Classification of Figurative Elements," was to be CFE.

**INTERNATIONAL CLASSIFICATION  
OF FIGURATIVE ELEMENTS OF MARKS**

## GUIDANCE FOR THE USER

Pursuant to Article 4(1) of the Vienna Agreement, the scope of the Classification of the Figurative Elements of Marks (hereinafter referred to as "the Classification") is that attributed to it by each country of the Vienna Union. Its main purpose, however, is in all cases to facilitate anticipation searching. For that searching to be effective, the following two operations have first to be completed:

- (i) consistent and correct classification (coding) of the figurative elements of the marks that are to constitute the search file, due account being taken of the future needs of anticipation searching;
- (ii) correct definition of the sections in which the prior marks have to be searched, due account being taken of the specific characteristics of coding.

The two operations are thus interdependent, and responsibility for them must be entrusted to persons with proven skills in the trademark field. Those persons should among other things be able to assess the figurative elements of marks according to their distinguishing properties.

Before starting to use the Classification, it is essential that the user familiarize himself, in this publication, with the Preface (pages 5 to 7), the Recommendation of the Committee of Experts (page 21) and the General Note (page 36).

When using the Classification, the user should abide strictly by the explanatory notes and the references given in them.

The Classification itself is reproduced under the following three headings:

- (1) the Table of Categories (page 24), which affords rapid guidance as to the categories available in the Classification;
- (2) the Table of Categories and Divisions, with Explanatory Notes (pages 25 to 33), which gives an outline of the divisions available in a given category and thus makes it possible to confine the subject matter to the division that seems the most appropriate;
- (3) the List of Categories, Divisions and Sections, with Explanatory Notes (pages 35 to 82), which, with the aid of the complete information given by the explanatory notes on the categories, divisions and sections, makes it possible to decide finally where the figurative element concerned is classified.

The explanatory notes on a category apply also to all its divisions, even if they are not repeated every time.

The divisions are reproduced in the order of their categories, each division being followed by the sections relating to it.

Sections with a letter A before their numerical code are auxiliary sections, which group figurative elements contained in the main sections according to specific criteria. The letter A should not however appear in the numerical code assigned to the figurative element of a mark at the time of coding.

The examples of figurative elements reproduced on pages 83 to 102 are given for information purposes only, and therefore do not form an integral part of the Classification.

LIST OF CATEGORIES, DIVISIONS AND SECTIONS, WITH EXPLANATORY NOTES

## LIST OF CATEGORIES, DIVISIONS AND SECTIONS, WITH EXPLANATORY NOTES

### GENERAL NOTE

=====

(a) Figurative elements should be placed in the different categories, divisions and sections on the basis of their shape, regardless of their material composition or the purpose of the object in which they are incorporated. Consequently, toys in the forms of dolls, animals and vehicles will be placed in the categories for human beings, animals and vehicles, respectively. Similarly, persons, animals or objects of any kind represented in pictures or sculptures, for instance, will be placed in the categories for human beings, animals, or the objects concerned. If the pictures or sculptures are widely known and famous, they should also be placed in the division provided for that purpose (division 22.5).

(b) The representation of an object forming part of another object should be classified under the same category, division and section as the object of which it forms part, unless expressly classified in another category, division and section. Thus, the bodywork of a motor vehicle is to be placed in sections 18.1.7 and A 18.1.9, as are motor vehicles, whereas the tyres, wheels or steering wheel of such a vehicle are to be placed in section 18.1.21, expressly intended for these parts of motor vehicles.

(c) If a figurative element is presented in such a way that it is not possible to determine clearly whether it belongs to a given division or section, it should be placed in both divisions or sections to be taken into account, unless there is a special note to the contrary. If, for example, the representation of a human being is not such that it can be clearly determined whether it is a man or a woman, it will be placed in both of the divisions 2.1 and 2.3.

(d) The representation of an object or of a living creature similar to that of an object or of a living creature mentioned in the text of a given section will be placed in that section even if it is not expressly mentioned there or in any other section.

(e) It is understood that, if a mark comprises several figurative elements each of which has its own distinctive characteristic and is classified in a different category, division and section, these figurative elements will be placed in the appropriate different categories, divisions and sections. Thus, the label of a bottle comprising the representation of a castle and a characteristic form of writing will be placed in the appropriate divisions and sections of categories 7 and 27; in the same way, the representation of a man in uniform, on horseback and playing a trumpet, will be placed in the three sections 2.1.2, 2.1.20 and 2.1.9.
