Questionary Subject:

Best regards! B. Philipov BPO

Head of IT Department

Additional questionnaire concerning formats for figurative elements of marks currently in use by Industrial Property Offices

Task No. 20: Prepare, for adoption as a WIPO standard, a recommendation for the electronic management of the figurative elements of trademarks.

Please provide the following contact information in order for us to contact the person responsible for the Questionnaire in case of need:

Contact details of the Reporting Office:				
Name of the Reporting Office	BG (ST.3 two-letter country/organization code) BPO			
Person to contact Name:	Aglaida Ignatova			
Tel. number:	359 2 9701476			
E-mail:	aignatova@bpo.bg			

QUESTIONNAIRE

SECTION I

QUESTIO	N 1
Does your	Office process electronically the figurative elements of marks?
	Fully YES (in case that whole process employs digital image)
\boxtimes	Partially YES (in case that some parts of the process employ paper)
	NO

If your Office processes electronically the figurative elements of marks (i.e., if you answered "Fully Yes" or "Partially Yes"):

- (a) Which format is your Office currently using?
 - (i) For scanning:

	Black White	Grayscale	Color	Others
Image format	gif		gif	
Image resolution & Depth	max 100 dpi		max 100 dpi	
Minimum and Maximum size of image	(70x70) mm		(70x70) mm	
Image color management techniques	NA			
Compression technique & Rate	NA			

Note: Please fill in the tables according to the comments as follow:

- **Image format:** (TIFF, JPG, GIF, PNG, CCITT...specify with the version, e.g., TIFF Group 4):
- Image resolution and Depth: (in dots per inch for resolution and dpi for depth)
- Minimum and Maximum size of image: (specify physical size of the input image with unit, not the storage size of the resulting image)
- Image color management techniques: (i.e., description of techniques applied to ensure reliable color reproduction)
- Compression technique and Rate: (specify general or IPO's specific compression technique and rate)

(ii) For publishing:

	Black White	Grayscale	Color	Others
Image format	tif		tif	
Image resolution & Depth	max 300 dpi		max 300 dpi	
Minimum and Maximum size of image	(70x70) mm		max (70x70) mm	
Image color management techniques	NA			
Compression technique & Rate	NA			

Note: Please refer to the above comments.

(iii) For displaying:

	Black White	Grayscale	Color	Others
Image format				
Image resolution & Depth				
Minimum and Maximum size of image				
Image color management techniques				
Compression technique & Rate				

Note: Please refer to the above comments.

(iii) For other purpose (please specify):

	Black White	Grayscale	Color	Others
Image format				
Image resolution & Depth				
Minimum and Maximum size of image				
Image color management techniques				
Compression technique & Rate				

Note: Please refer to the above comments.

(b) What does your Office regard as an original image and how does your Office store it (please describe in detail)?

Insert your reply below (free text, table, etc.):

Keep them on the paper dossiers.

ESTIC	ON 2						
s your	Office receive e	electronica	ally trade	emark image	es in digi	ital format?	
		YES		NC			
(a)	If "Yes," please (specifically ab	out size,	format, n	-		es for accepting of	digital images
(b)	Does your Offi	-	color im	•			
(c)	-			_	or guide	elines depending id color image)?

	Applicant Your Office Applicant and yo	our Office	2				
	Other (please sp						

QUESTIC	ON 4
	ow the images of figurative elements of marks are displayed (e.g., expandable s, thumbnails only, full screen image):
	Normal: As it is foreseen in the application software (Common software) Expandable thumbnails: Thumbnails only: Full screen image: Other (please specify): You may choose more than one if applicable.
QUESTIC	ON 5
(a)	If your customer files a digital image that does not fully comply with the relevant regulation or guideline, how does your Office handle it (please describe in detail)? Insert your reply below (free text, table, etc.): NA
(b)	Please identify if you "Touch Up" scanned images. What procedures and software tools do you have in place for "Touch Up"? Insert your reply below (free text, table, etc.): We don't process additionally scanned image.
(c)	Please also specify which practice(s) is(are) used to ensure that the quality of mark images is identical to that of original images: Skilled person: Insert your reply below (free text, table, etc.):
	 Procedures (i.e., notification to applications, etc.): Insert your reply below (free text, table, etc.): Regulations or guidelines:
	Insert your reply below (free text, table, etc.): Imaging tool (i.e., scanner, software, etc.: Insert your reply below (free text, table, etc.): Imaging tools only.

Others (please specify):
 Insert your reply below (free text, table, etc.):

QUESTION 6
How many mark images are stored with the above-indicated format(s) in your Office's computer system(s) (please list breakdown by format)?
Insert your reply below (free text, table, etc.):
40 000
QUESTION 7
Which color space does your Office currently use (i.e., RGB, sRGB, YcrCb, etc.)?
Insert your reply below (free text, table, etc.): RGB
QUESTION 8
Does your Office have a color management system for equipment such as scanner, monitor, printer, etc., to ensure the image quality?
YES NO 🖂
If "Yes," please specify your practice:
(i) Calibration (please indicate specification of scanner, monitor, printer, etc.): Insert your reply below (free text, table, etc.):
(ii) Profiling (or characterization):
If applying ICC profile: Insert your reply below (free text, table, etc.):
Others: Insert your reply below (free text, table, etc.):
(iii) Color transformation: Insert your reply below (free text, table, etc.):

QUESTION 9

Please indicate the list of software and hardware on which your Office depends to process electronically an image (in particular color image), which information could eventually be used to establish a new WIPO standard:

Insert your reply below (free text, table, etc.):

Scanners – not professional scanners regularly offered on the market; preferred producer – HP

Software – we use the software accompanying the purchase only (i.e. Twain, HP Precision Pro, ACD See, etc.)

QUESTION 10

Please identify any additional information that your Office has discovered related to the processing of images (i.e., best practices, problems, solutions, experiences, etc.):

Insert your reply below (free text, table, etc.):

It is better the offices to organize acceptance and performance of images without any additional intervention:

- receive and accept image(s) on the file(s) from the customer ready for publication
- image from the file accompanies the application during the next procedures according to the used application information system (stored in the relevant DB or stored in different satellite DB)

That approach will warranty of the customers that its creation will not be manipulate any way and the office will not support unwanted staff.

SECTION II

QUESTION 1

Please indicate your Office's current and future direction for other types of marks (i.e., sound mark, smell mark, motion mark, etc.):

Insert your reply below (free text, table, etc.):

Currently BPO take in orders sound marks only. It is under consideration the processing of other types of marks (i.e. smell, motion, etc.) in the future.

OUESTION 2

Please indicate the number of applications/registrations your Office currently has, grouped by the type of mark:

Insert your reply below (free text, table, etc.):

Type of marks	Applications	Registrations
Verbal marks	5500	20000
Figurative marks	300	2000

Annex to C. SCIT 2617, page 8

Mixed marks	6000	18000
Three-dimensional marks	150	450
Sound marks	<10	<10
Combination of colors marks	0	<10

QUESTION 3

Please indicate if your Office processes in electronic form any other types of marks besides those mentioned in Question 1 of Section II:

Insert your reply below (free text, table, etc.):

In framework of the consideration mentioned in Question 1 will be discussed the forms and ways of processing of new types of marks.

GLOSSARY

Color space:

A color model is an abstract mathematical model describing the way colors can be represented as tuples of numbers, typically as three or four values or *color components* (e.g., RGB and CMYK are color models). However, a color model with no associated mapping function to a reference color space is a more or less arbitrary color system with little connection to the requirements of any given application. For example, Adobe RGB and sRGB are two different color spaces, both based on the RGB model. (Wikipedia, the free encyclopedia)

Calibration:

The process of returning a device to known color conditions. Commonly done with devices that change color frequently, such as monitors (phosphors lose brightness over time) and printers (proofers and other digital printing devices can change output when colorant or paper stock is changed). (*Adobe.com*)

Profiling (Characterization):

Characterization is the process of identifying the relationship between a device-dependent color gamut and device-independent color. After a device has been calibrated, characterizing is the next process (sometimes referred to as profiling a device). Any production device that scans, displays, or prints a standard target comprised of many different solids and tints can be characterized. (*Adobe.com*)

ICC profile:

Set of transforms from one colour encoding to another, e.g. from device colour coordinates to profile connection space, prepared in accordance with ICC.1. (ISO 12231 and ISO 12647-1)

Color transformation:

A transformation process that begins with color information that is encoded in one color space, or appropriate for one device, and produces corresponding information in a different color space, or for a different device. Color transformations are of particular interest in digital imaging where they are used to transform images from one device space to another, e.g., monitor RGB to printer CMYK). (*Chem industry.com*)
