with reference to C.SCIT 2617 MK Subject:

Dear Sirs,

In refrence to the Questionnaire Concerning Formats for Figurative Elements of Marks Currently in use in our Office we are sending you answers to the the questions that affect the State Office of Industrial Protection of Republic of Macedonia. Kind Regards,

Dejan Milanov IT Unit of the Macedonian SOIP

Additional questionnaire concerning formats for figurative elements of marks currently in use by Industrial Property Offices

Task No. 20: Prepare, for adoption as a WIPO standard, a recommendation for the electronic management of the figurative elements of trademarks.

Please provide the following contact information in order for us to contact the person responsible for the Questionnaire in case of need:

Contact details of the Reporting Office:				
Name of the Reporting Office	MK (ST.3 two-letter country/organization code) Republic of Macedonia			
Person to contact Name:	Dejan MILANOV			
Tel. number:	+ 389 2 3116 379			
E-mail:	dejanm@ippo.gov.mk			

QUESTIONNAIRE

SECTION I

QUESTIO	N 1
Does your	Office process electronically the figurative elements of marks?
	Fully YES (in case that whole process employs digital image)
	Partially YES (in case that some parts of the process employ paper)
	NO

If your Office processes electronically the figurative elements of marks (i.e., if you answered "Fully Yes" or "Partially Yes"):

- (a) Which format is your Office currently using?
 - (i) For scanning:

	Black White	Grayscale	Color	Others
Image format	tiff	tiff	tiff	tiff
Image resolution & Depth	200 dpi	200 dpi	300 dpi	
Minimum and Maximum size of image	5-150 KB	5-150 KB	5-150 KB	
Image color management techniques	none	none	none	
Compression technique & Rate	none	none	none	

Note: Please fill in the tables according to the comments as follow:

- **Image format:** (TIFF, JPG, GIF, PNG, CCITT...specify with the version, e.g., TIFF Group 4):
- Image resolution and Depth: (in dots per inch for resolution and dpi for depth)
- Minimum and Maximum size of image: (specify physical size of the input image with unit, not the storage size of the resulting image)
- Image color management techniques: (i.e., description of techniques applied to ensure reliable color reproduction)
- Compression technique and Rate: (specify general or IPO's specific compression technique and rate)

(ii) For publishing:

	Black White	Grayscale	Color	Others
Image format	jpg	jpg	jpg	
Image resolution & Depth	200 dpi	200 dpi	300 dpi	
Minimum and Maximum size of image	5-30 KB	5-30 KB	5-30 KB	
Image color management techniques	none	none	none	
Compression technique & Rate	none	none	none	

Note: Please refer to the above comments.

(iii) For displaying:

	Black White	Grayscale	Color	Others
Image format	jpg	jpg	jpg	
Image resolution & Depth	200 dpi	200 dpi	300 dpi	
Minimum and Maximum size of image	5-30 KB	5-30 KB	5-30 KB	
Image color management techniques	none	none	none	
Compression technique & Rate	none	none	none	

Note: Please refer to the above comments.

(iii) For other purpose (please specify):

	Black White	Grayscale	Color	Others
Image format				
Image resolution & Depth				
Minimum and Maximum size of image				
Image color management techniques				
Compression technique & Rate				

Note: Please refer to the above comments.

(b) What does your Office regard as an original image and how does your Office store it (please describe in detail)?

Insert your reply below (free text, table, etc.):

The Office regards as original only the images in the original application (paper) and stores it as paper. For the purpose of the management in our system we scan images and than load them in our electronic database.

QUESTION 4

Indicate how the images of figurative elements	of marks are	displayed (e.g.	, expandable
thumbnails, thumbnails only, full screen image)	:		

\times	Normal:
\boxtimes	Expandable thumbnails:
	Thumbnails only:
	Full screen image:
	Other (please specify):
	37 1 1 1

Note: You may choose more than one if applicable.

QUESTION 5

(a) If your customer files a digital image that does not fully comply with the relevant regulation or guideline, how does your Office handle it (please describe in detail)?

Insert your reply below (free text, table, etc.):

(b) Please identify if you "Touch Up" scanned images. What procedures and software tools do you have in place for "Touch Up"?

Insert your reply below (free text, table, etc.):

We do certain touch up of images to remove freckles, colour inconsistencies and the like. Tools used are IrfanView, AdobePhotoshop etc..

- (c) Please also specify which practice(s) is(are) used to ensure that the quality of mark images is identical to that of original images:
 - Skilled person:

Insert your reply below (free text, table, etc.):

Procedures (i.e., notification to applications, etc.):

Insert your reply below (free text, table, etc.):

We send a copy of the data entered in our database to confirmation to our customers before proceeding to work on a certain application

Regulations or guidelines:

Insert your reply below (free text, table, etc.):

The procedure above is also part of the Trademark regulation.

Imaging tool (i.e., scanner, software, etc.:

Insert your reply below (free text, table, etc.):

We do use scanners and the above mentioned software.

• Others (please specify):	_
Insert your reply below (free text, table, et	c.):
QUESTION 6	
How many mark images are stored with the computer system(s) (please list breakdown l	· · · · · · · · · · · · · · · · · · ·
Insert your reply below (free text, table, etc.): Around 6600 marks with figurative element.	s have been applied in front of our Office.
QUESTION 7	
Which color space does your Office current	ly use (i.e., RGB, sRGB, YcrCb, etc.)?
Insert your reply below (free text, table, etc.): RGB	
QUESTION 8	
Does your Office have a color management printer, etc., to ensure the image quality?	system for equipment such as scanner, monitor,
YES	NO 🖂
If "Yes," please specify your practice:	
Insert your reply below (free text, table	
None at the moment	. But we do plan to do calibration of our scanners.
(ii) Profiling (or characterizat	ion):
If applying ICC profile: In no	nsert your reply below (free text, table, etc.):
Others: Insert your reply below (fi	ree text, table, etc.):

(iii) Color transformation: Insert your reply below (free text, table, etc.):

no

QUESTION 9

Please indicate the list of software and hardware on which your Office depends to process electronically an image (in particular color image), which information could eventually be used to establish a new WIPO standard:

Insert your reply below (free text, table, etc.):

Kodak i260 scanner, Adobe Photoshop or IrfanView for cropping and certain touch ups and PageMaker or Indesign for preparation of our Journal.

QUESTION 10

Please identify any additional information that your Office has discovered related to the processing of images (i.e., best practices, problems, solutions, experiences, etc.):

Insert your reply below (free text, table, etc.):

SECTION II

QUESTION 1

Please indicate your Office's current and future direction for other types of marks (i.e., sound mark, smell mark, motion mark, etc.):

Insert your reply below (free text, table, etc.):

Our law allows for applications with the above mentioned types but only if they can be represented in a graphical manner.

QUESTION 2

Please indicate the number of applications/registrations your Office currently has, grouped by the type of mark:

Insert your reply below (free text, table, etc.):

We have no applications of these types as of yet.

QUESTION 3

Please indicate if your Office processes in electronic form any other types of marks besides those mentioned in Question 1 of Section II:

Insert your reply below (free text, table, etc.):

GLOSSARY

Color space:

A color model is an abstract mathematical model describing the way colors can be represented as tuples of numbers, typically as three or four values or *color components* (e.g., RGB and CMYK are color models). However, a color model with no associated mapping function to a reference color space is a more or less arbitrary color system with little connection to the requirements of any given application. For example, Adobe RGB and sRGB are two different color spaces, both based on the RGB model. (Wikipedia, the free encyclopedia)

Calibration:

The process of returning a device to known color conditions. Commonly done with devices that change color frequently, such as monitors (phosphors lose brightness over time) and printers (proofers and other digital printing devices can change output when colorant or paper stock is changed). (*Adobe.com*)

Profiling (Characterization):

Characterization is the process of identifying the relationship between a device-dependent color gamut and device-independent color. After a device has been calibrated, characterizing is the next process (sometimes referred to as profiling a device). Any production device that scans, displays, or prints a standard target comprised of many different solids and tints can be characterized. (*Adobe.com*)

ICC profile:

Set of transforms from one colour encoding to another, e.g. from device colour coordinates to profile connection space, prepared in accordance with ICC.1. (ISO 12231 and ISO 12647-1)

Color transformation:

A transformation process that begins with color information that is encoded in one color space, or appropriate for one device, and produces corresponding information in a different color space, or for a different device. Color transformations are of particular interest in digital imaging where they are used to transform images from one device space to another, e.g., monitor RGB to printer CMYK). (*Chem industry.com*)
